How to use the cam lock system

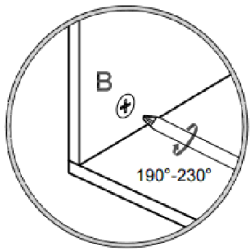

1.Screw cam boit into panel

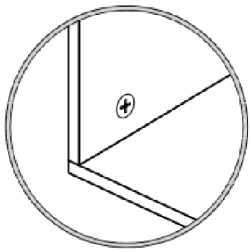

2.Push cam into panel - arrow feature on cam top points to panel edge

3.Aligu cam bolt(s) with cam(s) and insert all the way into cross-bored hole(s)

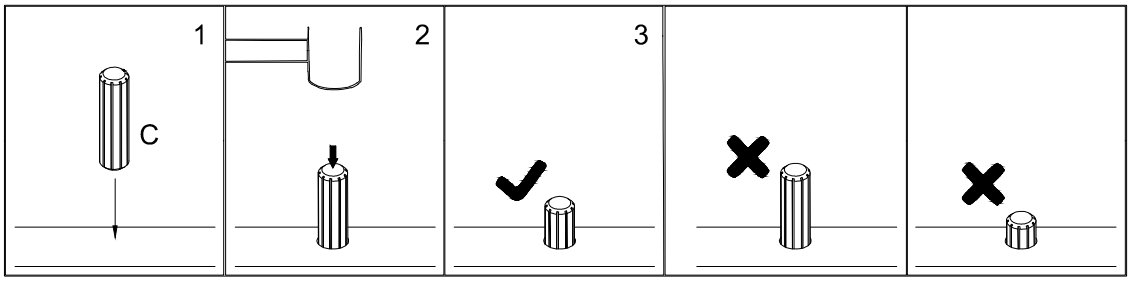

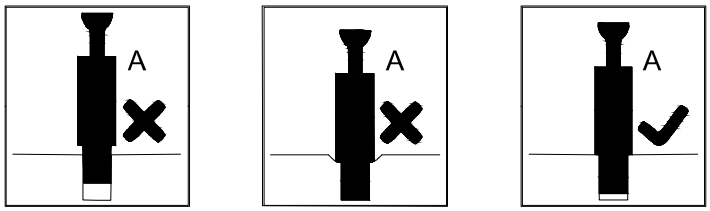

4.Rotate cam(s) clockwise 190°-230° to lock panels together

5.Panels should be tight against each other and connection should be rigid

Insert the wood dowel (C) at least half way by tapping lightly with a rubber mallet, IT NECESSARY.

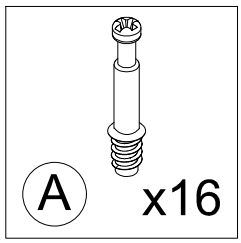

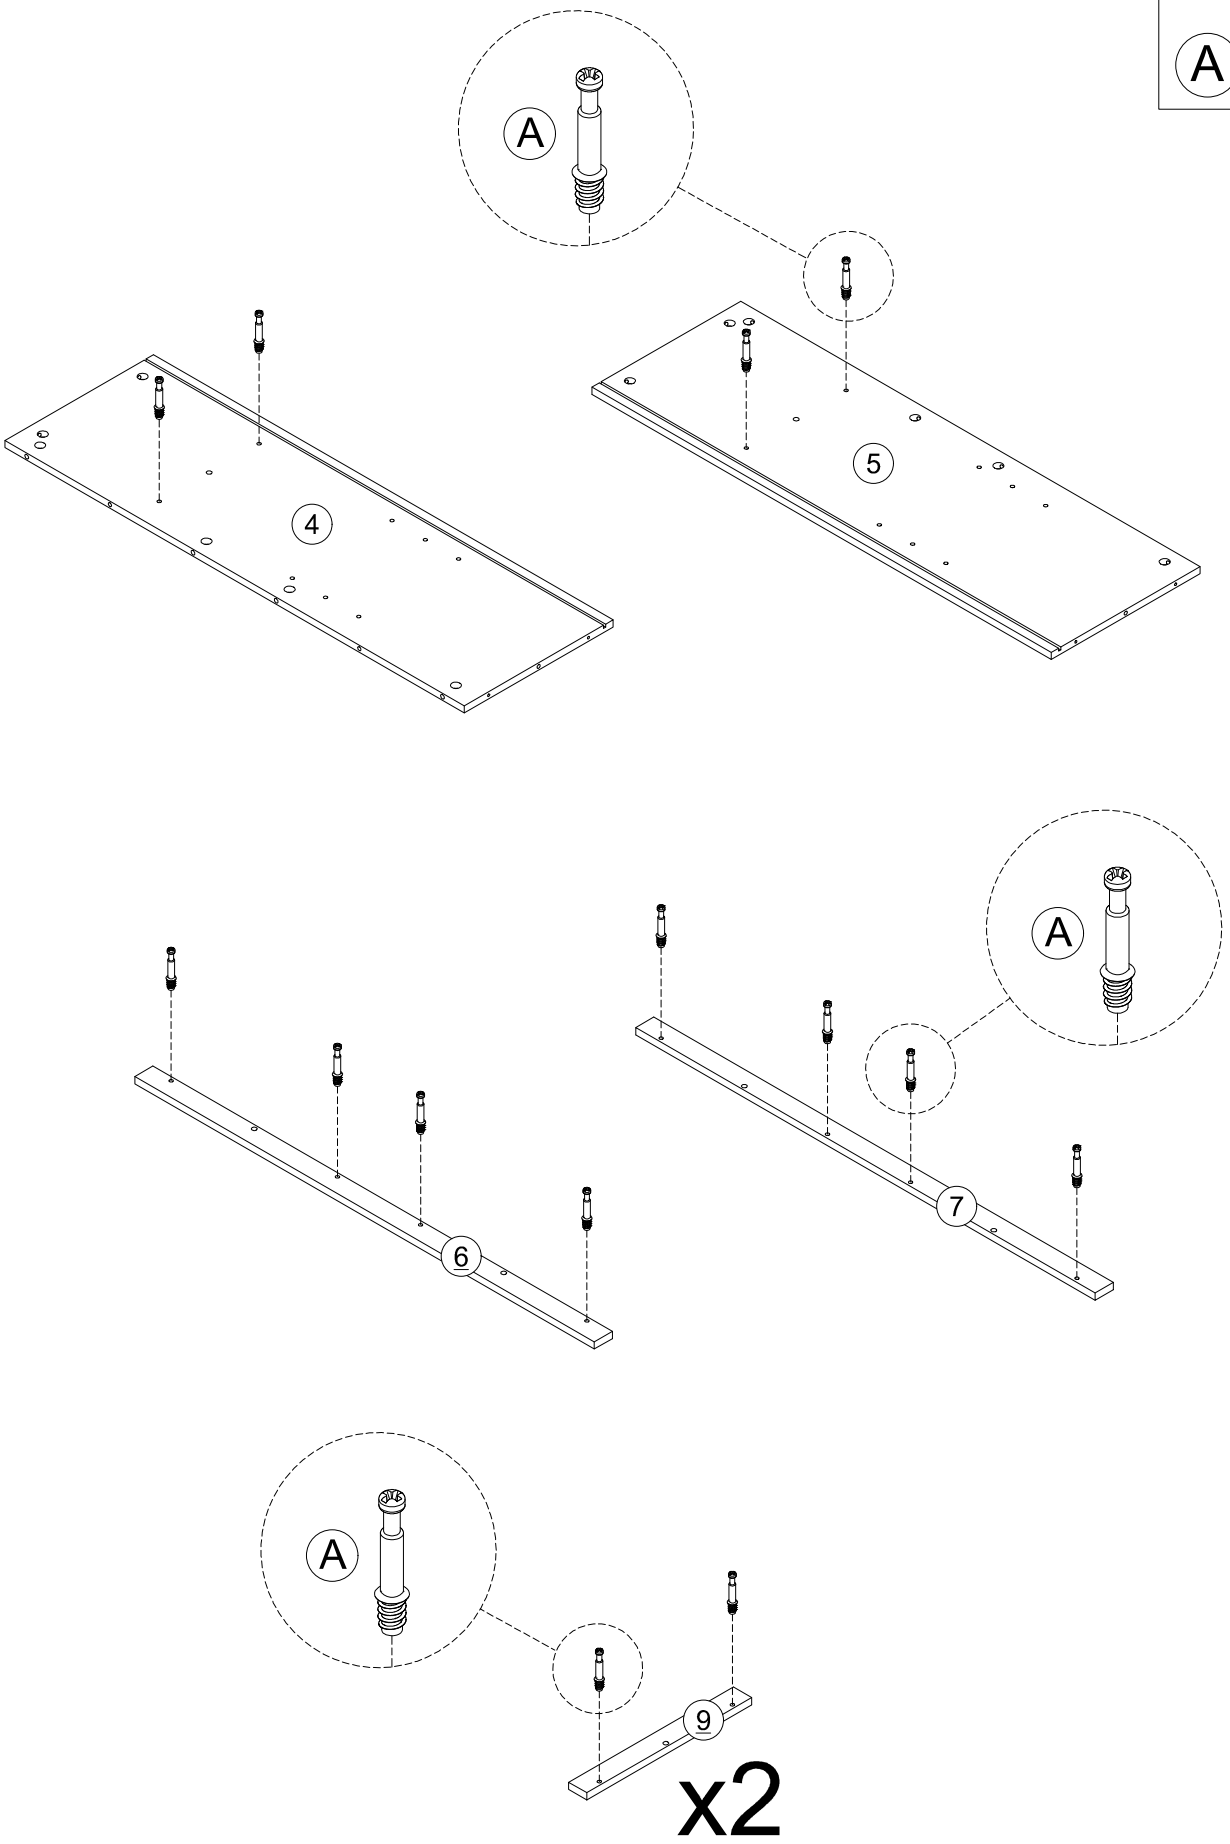

⚠ WARNING

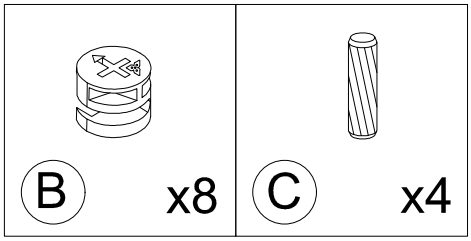

- Unit must be placed on a level surface or leveled with included hardware (when applicable).
- Do not sit or stand on or allow children to climb, sit or stand on the assembled product.
- For safety reasons, it is imperative that this unit be mounted to the wall.
- Do not use without installing the tip restraint.
- Unit can tip over causing severe injury or death.
- Do not exceed the recommended weight limits.
- Evenly distribute the weight on each level and always keep the heavier loads on the bottom.
- Before cutting, drilling or hammering into any wall or floor surface, verify the location of electrical, plumbing and gas lines. Cutting may cause serious injury.

STEP 23

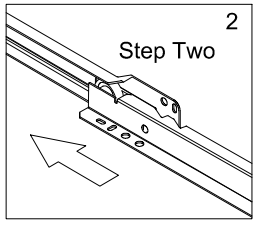

1. When you put the drawer,please note that the drawer wheels on top of the wheels of the slide, then check whether the drawer is smooth when pulled out. Otherwise,the drawer will not be aligned with other drawers.

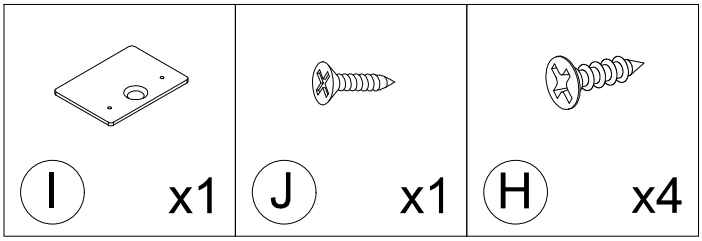

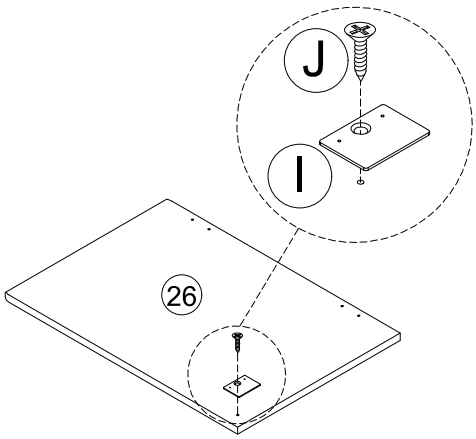

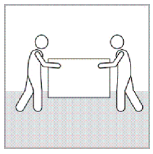

2. Note: When installing, ensurethat the sub-rail is fully inserted into the main rail

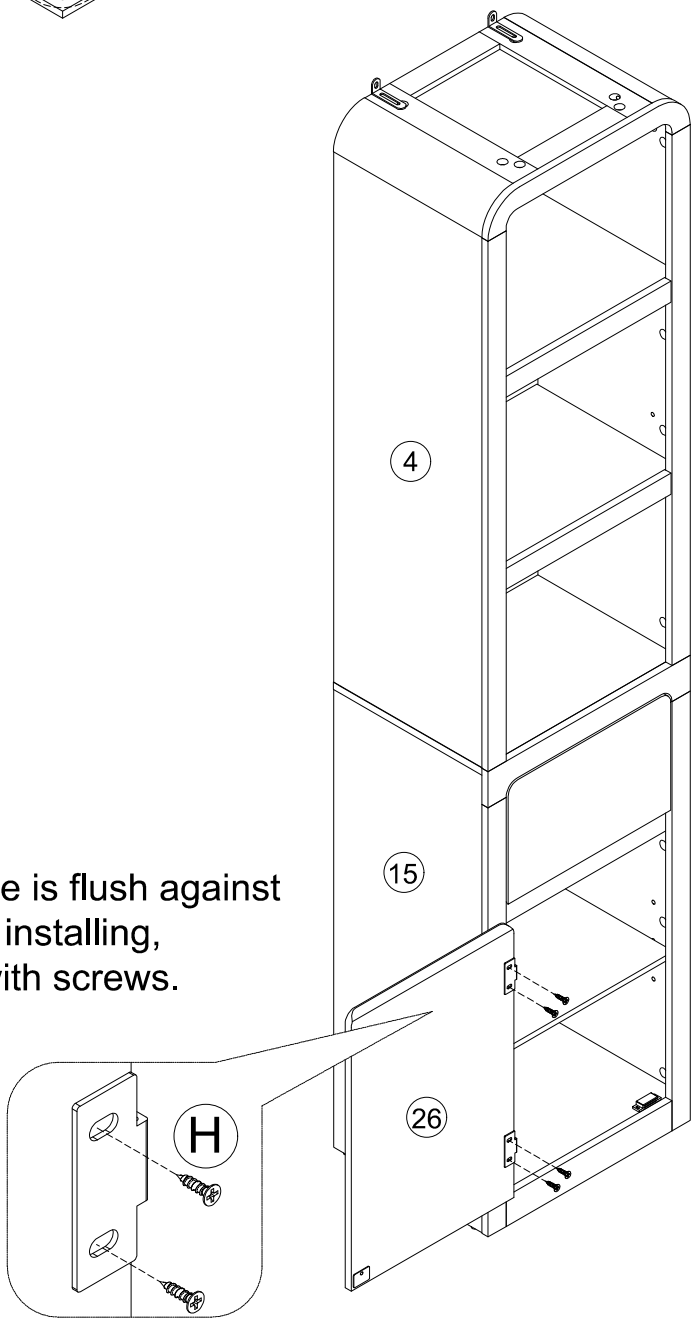

STEP 24

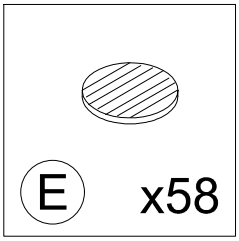

It is recommended
that two people work
together to install

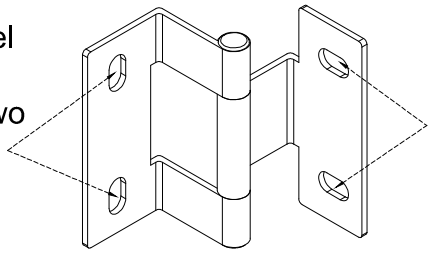

Ensure the hinge is flush against
the panel when installing,
then secure it with screws.

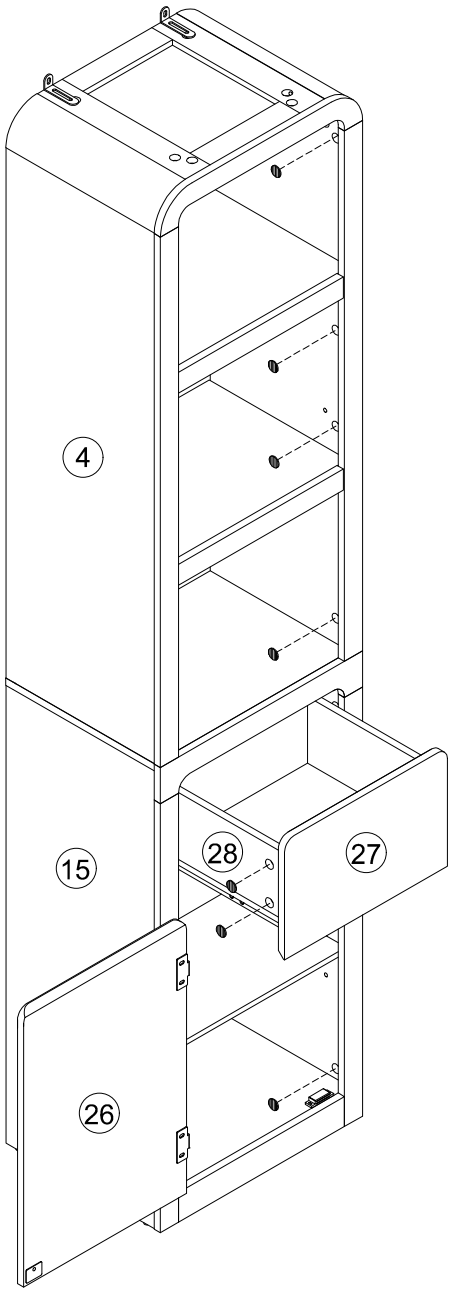

STEP 25

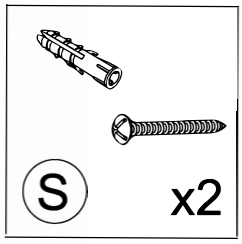

If the gap between the door panel and the cabinet is uneven after installation, you can use these two holes to adjust the vertical alignment of the door panel.

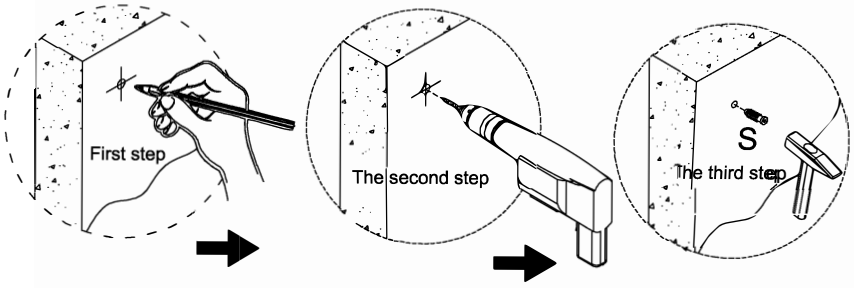

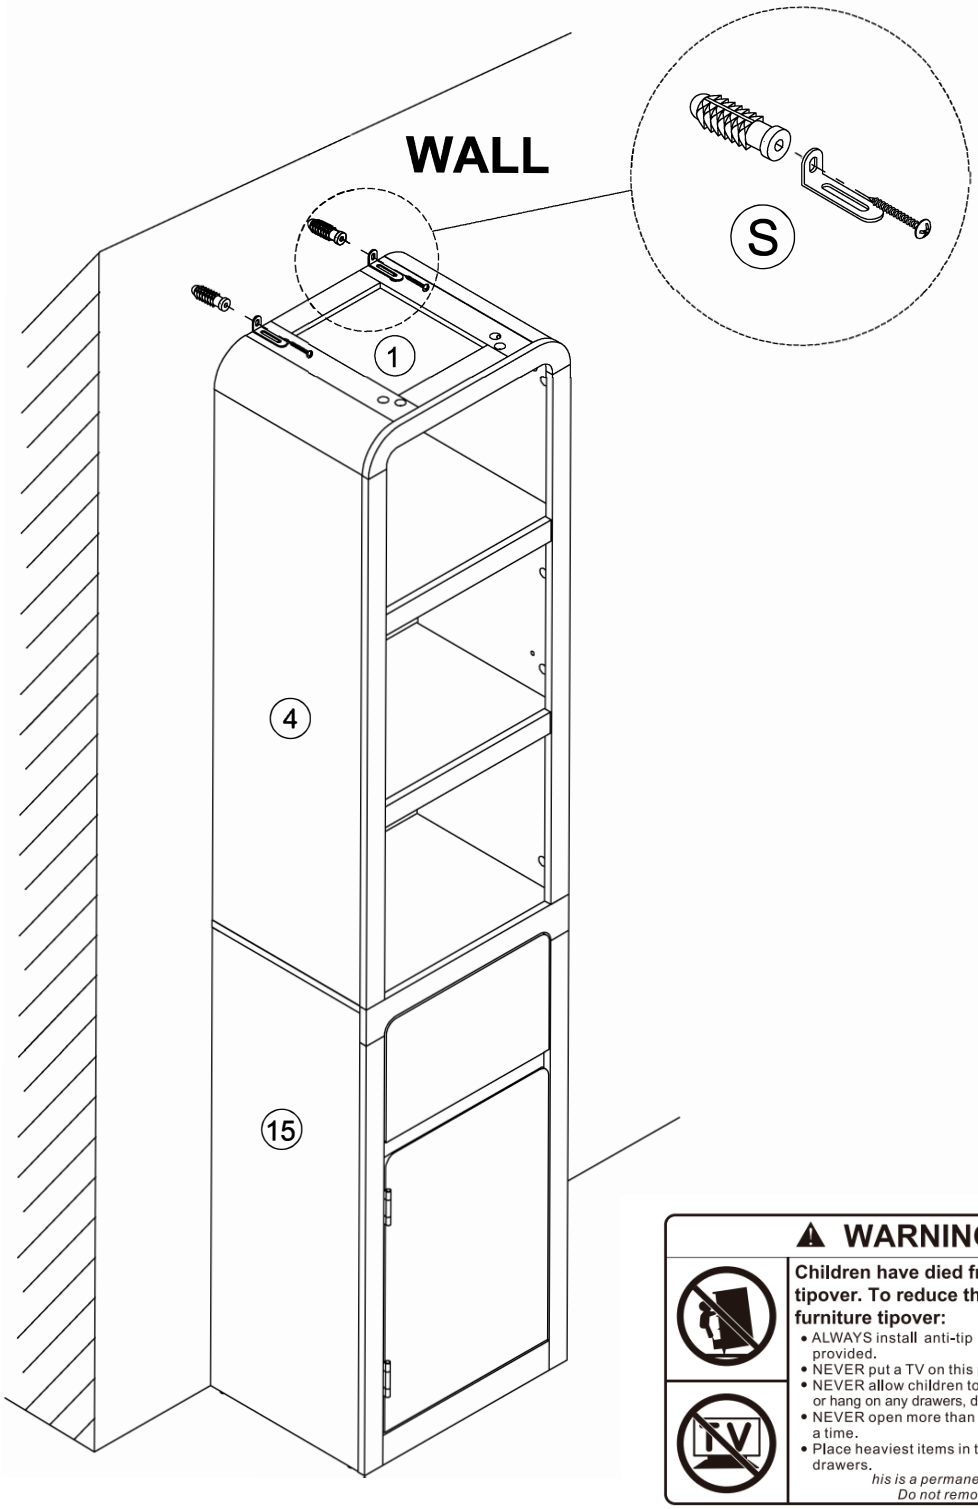

If the gap between the door panel and the cabinet is uneven from left to right after installation,you can use these two holes to sdjust the horizontal alignment of the door panel.
