

INSTRUCTIONS

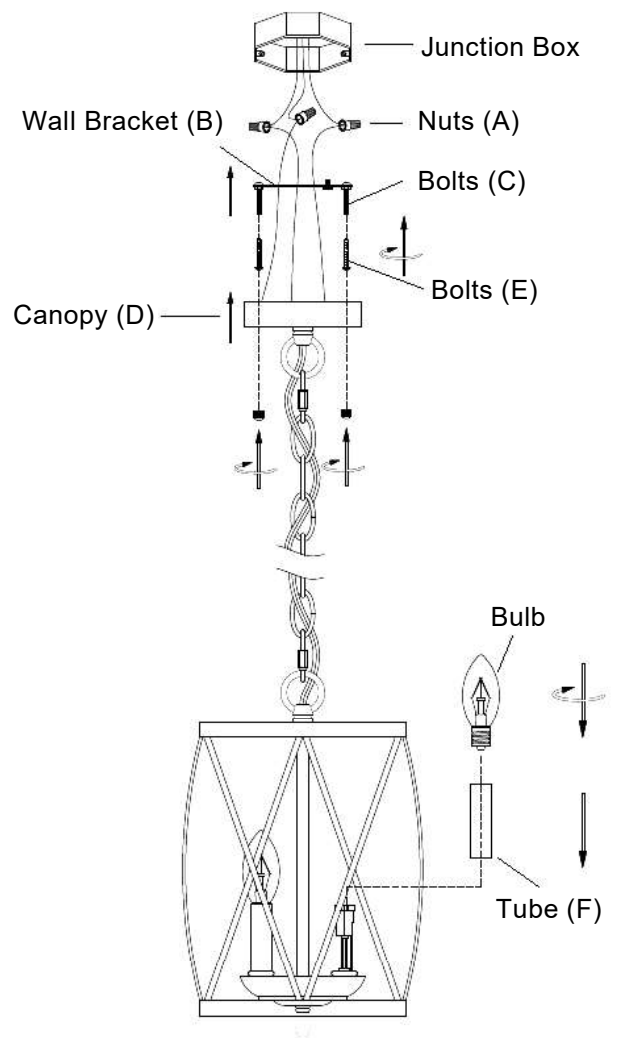

⚠ WARNINGS

Read these instructions carefully prior to installation.

- Check for electric, gas, plumbing lines before drilling or consult a professional.
- **ALWAYS** cut **ALL** relevant power before installing a lighting fixture, and do not restore power to the line until the lamp has been **FULLY** installed.
- **DO NOT** use with bulbs exceeding the recommended wattage.

ASSEMBLY

1. Prepare the wiring on your wall for the desired location of your new lamp. Prepare your junction box (not included).
2. Take the wall bracket (B) off the canopy (D). Connect your wall bracket to your junction box using the provided bolts (E).
3. Make electrical connections using the wire nuts (A).
4. Being careful that no wiring is left exposed, place the canopy against the mounting surface. Secure the canopy to the wall bracket with the 2 previously removed bolts (C).
5. Install the tubes (F).
6. Install your bulbs into their sockets. This fixture has been rated for up to 3 E12 40-watt maximum bulbs (not included).
