

## BENCH LEG INSTRUCTIONS

Remove the legs and the hardware from the inside of the black bottom fabric that is stapled to the bench bottom. There is an area that you can open the black fabric at the ends where the Velcro is located.

Lay the bench on a soft surface like a rug or your carpet. The legs are designed to fit tight into the wooden corner brackets as shown for better support. You might need to use a rubber mallet and tap them in from the bottom on the leg.

Next, slide the bolt into the flat washer first then the lock washer. Then put the bolt into the pre drilled holes that are on the corner bracket as pictured and then tighten the bolts with a Phillip screwdriver. Repeat this in all four corners.

You are ready to enjoy your new bench!
