

Size Guide For Two Panels Set

CURTAIN LENGTH

1. Measure the length from the top of the rod to the desired endpoint (e.g., floor, window sill, etc.), and mark this length as H.
2. Different curtain top styles (such as rod pockets, back tab, ring clips and hook belts) will have slight variations in length. Please choose the curtain length based on the following guidelines:

a) Back Tab/Rod Pocket: Curtain Length = H1

b) Ring Clips/Hook Belts: Curtain length = H2 + Ring Length (Approx. 2")

CURTAIN WIDTH

1. To achieve a beautiful and full look, we recommend selecting curtain widths that are 1.5 - 2 times the width of your rod.

Curtain width = Curtain rod width × 1.5 - 2

2. Sold in pairs, each panel is 50 inches wide.

Recommended Panel Count by Window Width

Window Width	You will need
Up to 55 in wide	2 Panels(1 Package)
Up to 110 in wide	4 Panels(2 Packages)
Up to 160 in wide	6 Panels(3 Packages)
Up to 220 in wide	8 Panels(4 Packages)

NOTE

1. Rings & hooks are not included (for ring clips & hook belts hanging).
2. Each panel width is 50", 8 back loops per panel.
3. Please iron the curtains before measurement and without folding.
4. Please allow ±1-1.5 inches for measurement error.
