

INSTALLATION

Product Manual

IMPORTANT INFORMATION!

please read the entire manual before starting to assemble and/or using this product. follow the manual thoroughly and keep it for further reference.

AVOID SCRATCHES!

In order to avoid scratching this furniture should be assembled on a soft layer-could be a rug.

IMPROVE EFFICIENCY !

Try to find a partner to install with you, which can speed up the installation efficiency and shorten the time.

ANTI-TOPPLE WARNING !

Overturnd furniture can cause serious or fatal crush injuries. To prevent tipping over, be sure to use the wall attachment, if not included with this product. Please purchase the wall attachment that fit your wall. If unsure, seek professional advice. Please read and follow each step of the instructions carefully.

IMPORTANT !

It is important that any product which is assembled using any kind of screw is re-tightened 2 weeks after assembly, and once every 3 months - in order to assure stability through-out the lifespan of the product.

For regular maintenance and cleaning of the product, for the frame, please use a rag dipped in neutral detergent to fully wipe it, and then dry it with a clean rag. For glass materials, wipe with a rag dampened with water glass cleaner, and then dry with a dry rag.

Do not use an electric screwdriver, and do not use too much force when installing, because the board is easy to break.

Please prepare the following tools

When installing, please carefully confirm whether each screw corresponds to the manual, accessories with similar shapes can be distinguished by size

Cup Washer x 1

Faucet x 1

Soap Dispenser x 1

Drain x 1

Drain Cover x 1

Roller Shutter x 1

Sink Grate x 1

Strainer Basket x 1

Cutting Board x 1

Product installation diagram

Please check each accessory before installing the product, and then follow the installation schematic step by step.

EN

1 Introduction

Conformance

This product conforms to EC Regulation 1935/2004 on materials and articles intended to come into contact with food.

2 Warnings and personal safety

Care and use of kitchen sinks

"Do's"

- Clean the sink everyday by thoroughly rinsing with a mild soap and warm water then wipe it dry.
- Rub lightly with a soft cloth in the direction of the grain lines on a regular basis for additional preventive cleaning.
- Keep the sink free of any standing water as this can cause a buildup of mineral deposits, which can affect the appearance of your sink.
- Any stubborn stains should be removed by scrubbing in the direction of the grain using a mild abrasive such as Comet. Always rinse the sink thoroughly after using any cleaning agent and wipe it dry.
- Clean any mineral deposits built-up with a mild solution of vinegar and water followed by a thorough flushing with water.
- Remove any scratches with a Scotch-Brite pad and cleaning agent rubbing in the direction of the grain. NOT RECOMMENDED FOR MIRROR FINISH.

"Don'ts"

- Do not allow food or beverage residue as well as metal canned products to remain on the sink surface.
- Do not leave pots, steel cookware, or utensils in the sink for a lengthy period; iron particles often develop rust spots in the stainless steel surface.
- Do not use a steel wool or scouring pad as it damages the sink surface and causes discoloration.
- Do not set hot pans or other kitchen products directly in the sink.
- Never leave rubber mats, sponges, or cleaning pads in the sink overnight as this will trap water and could stain and discolor the sink surface.
- Do not use any drain cleaning products containing sulfuric or hydrochloric acid as this will damage the sink. Silver cleaners can also contain acids that could damage the sink surface.
- Never let the sink come into contact with water containing heavy metals which can make its color fade or get it rusty.
- Never use the inside of the sink as a cutting surface.

3 Installation instructions

Remarks: While installing, please apply sealant or adhesive tape on the screw thread in case of leaks.

4 Maintenance and cleaning

After use, please clean the product by rubbing the stainless surface with a clean, damp cloth and wipe it dry. Avoid fluoride from household products, bleach, food, silver cleaning materials, sulfur, and hydrochloric acid cleaning products which may cause potential corrosion damage on the sink.

Draw the kitchen sink faucet

Before installation

All information is compiled according to the latest published product information. The company reserves the right to change the characteristics, packaging or type of product available at any time without notice.

The manual contains important information on installation, maintenance and cleaning. Please provide this information for users to read.

Points to note

1. Be sure to flush the water supply pipe thoroughly to remove impurities from the pipe.
2. If it installs the new washbasin, may install the faucet first to the washbasin.
3. Maximum working pressure: 0.5 MPA (5 bar). Pressure relief valve must be installed when water pressure exceeds 0.5 mpa (5 bar). The highest working temperature and ambient temperature of shower: 60°C. Please pay special attention to the arm tube connected with the shower should be away from the heater, otherwise it may damage the shower and its seals, or even harm the users.

Instructions for use

. Handwheel switch, turn right cold water-mixed water-hot water, return to the middle off;

. Handwheel switch, turn to the left cold water-mixed water-hot water, return to the middle off;

Installation dimensions

Use Strategy

- . Handwheel switch, turn right cold water-mixed water-hotwater, return to the middle of the closed;
- . Handwheel to the left turn cold water-mixed water-hot water, return to the middle off.

- . Draw head free draw

- . Press to switch the shower spray

- . Press the bubbles out of the water

Faucet maintenance:

1. Turn on the faucet and rub the nozzle to remove impurities.

2. When there are impurities to make water flow small, remove the head of the shower frother, cleaning blistering. Just put it back on.

Check for installation results

Check and make sure all joints are tight and the handwheel is in the closed position. Open the main water and drainage system. Inspect and repair leaky connections.

Cleaning instructions

Apply to all processed surfaces; clean the coated surface with neutral soapy water, then thoroughly wipe the entire surface with a clean soft cloth, many detergents, such as ammonia, detergent and toilet cleaner, etc., will cause damage to the plating surface, do not use.

Abrasive cleaning appliances or detergents should not be used with faucets and their accessories.

1

Fix the sink to countertop at first.

2

Begin by loosening the central screw in the drain assembly. Attach three components beneath the basin, securing the fourth component from above using a screw as shown.

3

Twist straight on.

4

Place the stainless steel strainer basket and drain cover in position as shown.

5

Start by unscrewing the soap dispenser cap. Thread the soap dispenser pump head through the corresponding hole, and then tighten the cap clockwise from below as shown.

6

Next, screw the soap dispenser bottle clockwise into place as shown.

7

Loosen the cup washer nut, insert the cup washer into the designated hole, and then tighten the nut clockwise from below as shown.

8

Secure the hose clockwise to the bottom of the cup washer as shown.

9

Begin by unscrewing the washer under the faucet and the nut below it. Insert the faucet into the corresponding hole, and then tighten the washer and nut clockwise from below. Ensure that the screws underneath the waterfall faucet are also tightened as shown.

10

After unscrewing the screw for the gravity ball, attach it to the faucet's water pipe position. Then connect the two water pipes as shown.

Attach the cold and hot water pipes to their respective positions and tighten them clockwise as shown.

If the water inlet hose does not match the customer's pre-installed water pipe, this adapter can be connected to the water inlet hose and then to the customer's pre-installed water pipe. If the water inlet hose matches customer's, this adapter is not required.

12

Place the drain cover in its designated position as shown.

13

Place the bottom basket into the sink as shown.

14

Place the roller shutter in its designated position as shown.

15

Place the strainer basket in its designated position as shown.

16

Place the cutting board into its designated position as shown.
