

16FT Trampoline with Enclosure

DANGER

- DO NOT attempt somersaults or flips. Paralysis or death can result if you land on your head or neck!
- No more than one person on the trampoline at a time. Multiple users increase the risk of injury.
- Use trampoline only with mature, knowledgeable supervision.

WARNING

- These instructions are important to minimize chances of injury. Please read each of them thoroughly before you assemble and use this trampoline. Retain this manual for future reference.
- Maximum weight of the user shall NOT exceed 330lbs/150kg for this product.
- Trampoline must be used with enclosure that is properly installed and maintained.

For Customer Services, please contact:
service@merscosports.com

DANGER

NO SOMERSAULTS OR FLIPS – PARALYSIS OR DEATH can result if you land on your head or neck!

No more than ONE user at a time (maximum weight - 330 lbs/ 150kg).

Do not use if in a cast or have previous leg, arm, head, neck or back injury.

Do not allow children under six (6) year old to use.

Remove all hard or sharp objects including jewelry, eyeglasses, sunglasses or hairclips before jumping.

Do not use without the consent of your physician, if pregnant.

Daily Pre-Inspection:

- >Inspect legs for proper attachment or cracks
- >Inspect netting for tears and sagging
- >Inspect for loose or damaged springs
- >Inspect mat for tears or worn stitching
- >Inspect frame for sagging or cracks

Inspect prior to use – check that the legs are properly attached and stable on the ground; no loose springs; mat and enclosure net are in proper place and in good condition with no tears.

DANGER

- Use trampoline only with mature, knowledgeable adult supervision.
 - Do not attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
 - Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chance of injury.
-

WARNING

Carefully read and understand all of the instructions and warnings in this manual before assembling and using this product. It is the responsibility of the owner of this trampoline to ensure that all users of this product are fully informed on the proper use and the inherent risks of jumping on a trampoline. Failure to do so can result in serious injury or death.

Before you start to assemble...

- Check the package and make sure you have all of the parts listed in the Parts List section of this user manual. IF ANY PARTS ARE MISSING, Please contact the email on the cover page.
- Do not install or use the product if any parts are missing or damaged. Store in a safe place until ready to install.
- Make sure that you have plenty of space and a clean dry area suitable for the assembly of this trampoline. **IT IS ESSENTIAL THAT THE INTENDED SITE FOR THIS TRAMPOLINE IS COMPLETELY FLAT AND LEVEL.** If the ground is uneven, this could cause movement in the frame and stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury.
- Three adults are needed to assemble this trampoline.
- Heavy gloves must be used to protect your hands from pinch points during assembly and goggles must be worn to avoid injuries to the eyes.
- Never modify the construction or the design of the product.
- This pack may contain small parts and is not suitable for children under six (6) years of age to be nearby during assembly.
- **IMPORTANT:** Save this manual for future reference.

Before using the product...

- Use of this trampoline requires constant adult supervision. Use the trampoline only with mature and knowledgeable **ADULT** supervision.
- Ensure that the trampoline enclosure has been assembled correctly, as per the instructions in this manual and that the zip and attachment system are fully attached before use.
- Trampolines over 20 in. (51 cm) tall are not recommended for use by children under 6 years of age.
- There must be no more than one person at a time on the trampoline.
- Maximum weight of the user shall NOT exceed 330lbs/150kg for this product.
- This product is for household and family domestic use only— It is not for use in schools, playgrounds, rental or commercial use.

DANGER

- Use trampoline only with mature, knowledgeable adult supervision.
 - Do not attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
 - Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chance of injury.
-

Important Warnings

Carefully read these warnings before using this product. Failure to follow these warnings can result in serious injury or death.

DANGER

- Only one user at any one time! Multiple users can cause loss of control, collision or falls on the trampoline. This could result in serious injury to legs, arms, back, neck or head.
- Do not use the trampoline when under the influence of alcohol, drugs or medication, which may impair the jumper's judgement.
- Always consult your physician before performing any kind of physical activity.
- Do not use the trampoline if you have high blood pressure.
- Do not use the trampoline if you have a medical history of neck or back injuries or mental or physical conditions that could cause injury.
- Do not use if the user has any broken bones (casts) or has recently been in the hospital for extensive treatments (operations, severe wounds, stitches, back injury or concussion).
- Do not use without the consent of your physician, if pregnant.
- Do not use the trampoline during windy conditions or if the user or the trampoline surface is wet. These conditions can cause the user to lose control and fall resulting in serious injury. Damage from the wind or other severe weather is not covered by the manufacturer's warranty. Because the manufacturer warranty does not cover wind or weather related damage and damage can be caused to your property or the property of others by a windblown trampoline, it is strongly advised that you provide site specific anchoring through a licensed local contractor.

DANGER

- Use trampoline only with mature, knowledgeable adult supervision.
 - Do not attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
 - Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chance of injury.
-

Carefully read these warnings before using this product. Failure to follow these safety instructions can result in serious injury or death.

WARNING

Proper Play Conditions:

- Always use the product in a well-lit area. Do not use without lighting during dawn, dusk or in complete darkness!
- The trampoline must be placed on a surface that is **COMPLETELY FLAT AND LEVEL**. If the ground is uneven, this could cause movement in the frame and could cause stress on the joined sections of the frame that could damage the trampoline and/or can cause serious injury.
- DO NOT install or position this trampoline on a hard surface such as concrete, tarmac or paving. Suitable surfaces are grass, sand or a play area covered with an appropriate depth of play bark material.
- Maintain clear space on all sides of the product. Make sure that there are no hazardous objects above, below or near the trampoline. Such objects include walls, fences, tree limbs/ trunks, electrical power wiring, rocks, sprinkler heads or other recreational objects (i.e. swing sets, swimming pools). Children can be seriously injured by colliding with such obstacles.
- Adequate overhead clearance is essential. A minimum of 24 ft (7.3 meters) from ground level is recommended. Provide clearance for wires, tree limbs, and other possible hazards.
- Do not use the trampoline indoors, as this product is intended for outdoor home use only.
- The product must not be used in windy conditions as wind can cause unexpected movement of the product. Wind can cause the trampoline to be lifted off the ground and become airborne. This can present a danger to individuals and to property. Winds can be especially strong in open areas, foothills, mountains, locations subject to hurricanes and tornadoes, areas between homes that create wind tunnels and anywhere else where local weather conditions can create high winds. We recommend that you anchor the trampoline or otherwise secure the trampoline to prevent it from moving as a result of the wind. One possible way to anchor the trampoline is to secure the trampoline to a concrete footing under each leg. We recommend consulting a local licensed contractor to best determine how the anchor system should be constructed for your specific conditions.

DANGER

- Use trampoline only with mature, knowledgeable adult supervision.
 - Do not attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
 - Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chance of injury.
-

Carefully read these warnings before using this product. Failure to follow these safety instructions can result in serious injury or death.

WARNING

Appropriate Use Conditions:

- Children must always be supervised while they are playing on the trampoline and must be instructed not to use the trampoline in an inappropriate or hazardous manner. Take precautions to prevent access to the trampoline by children when there is no adult supervision.
- Restrict access to the trampoline by any unauthorized users without your consent.
- Trampolines are rebounding devices, which propel the user to unaccustomed heights, and into a variety of body movements. Rebounding off of the trampoline, striking the frame or springs, or improperly landing on the trampoline mat may cause serious injury.
- Always start and maintain your jump at the center of the trampoline mat in order to reduce the risk of landing on the frame or springs or falling off the trampoline.
- Avoid bouncing too high. Stay low until you can control your bounce and land consistently in the middle of the trampoline mat.
- Ensure the trampoline frame and springs are fully covered by the frame pad to avoid any direct contact with metal parts.
- Do not stand or jump on the springs while using the trampoline. The springs are not designed to support such stress and weight. This can result in serious injuries and/or product damage. If you see any signs of stretched or damaged springs, do not use the trampoline until replacement springs are properly installed.
- The trampoline is several feet off the ground. Jumping off the trampoline to the ground or any other surface may result in injury. Smaller children may need assistance getting up onto or down from the trampoline. Mounting and dismounting properly should be followed as a strict rule. Users should climb onto the trampoline by placing their hands on the frame and stepping or rolling up onto the frame, across the springs and onto the mat. Do not step directly on the frame pad or grasp the frame pad when mounting or dismounting the trampoline. To dismount, jumpers should walk to the side of the mat, bend over and place their hands on the frame, then step from the mat to the ground. Users should always place their hands on the frame while mounting or dismounting.
- Do NOT use the trampoline as a springboard to jump onto other objects.
- Remove all objects not designed for use with the trampoline from the trampoline before use. Do not let children take toys or other items onto the trampoline.

DANGER

- Use trampoline only with mature, knowledgeable adult supervision.
 - Do not attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis, or death, even when landing in the middle of the mat.
 - Do not allow more than one person on the trampoline. Use by more than one person at the same time increases the chance of injury.
-

Carefully read these warnings before using this product. Failure to follow these safety instructions can result in serious injury or death.

WARNING

- Do not jump or step onto the frame pad as it was not designed to support the weight of a person.
- Do not use the trampoline while holding or wearing any type of sharp or pointed objects such as jewelry, watches, rings, eyewear and necklaces before using this product. This will prevent the jewelry from tearing the mat or getting caught in the enclosure netting.
- Do not wear loose fitting clothing that may catch or snag during play.
- Never wear footwear (e.g. shoes) when using the trampoline.
- Always tie back long hair so that it does not block user's vision or get caught in the enclosure netting.
- **FRAME PADS** – Frame pads are there to protect user from any fall or landing on the springs and frame. On no account should people be permitted to sit or stand on them when the trampoline is in use. You should also make sure that smaller users do not use the inside edges of the pads as a “handle” when getting up on to the trampoline.
- Never use the trampoline without the frame pad being securely attached. Properly tie down the frame pad before each use. Improper assembly of the frame pad may lead to injury!
- Always check to ensure there are no obstructions or objects under the trampoline that could cause injury or obstruct movement of jump mat. Also check that there are no pets or other people underneath the trampoline.
- Do not jump on the trampoline with a snowboard, skateboard, roller blades, bicycle or any other equipment. **DO NOT** hold any foreign objects not authorized by the manufacturer in your hand and **DO NOT** place any objects on the trampoline while anyone is jumping on it. Please be aware of your surroundings to ensure there are no objects that could cause harm when you are playing on the trampoline.
- The frame of your trampoline is made of steel and it will conduct electricity. No electrical equipment (lights, heaters, extension cords, household appliances, etc.) should be permitted in or on the enclosure under any circumstances to avoid the risk of electrocution.

Enclosure Netting and Mat – Appropriate Use Conditions

- Children **MUST NEVER** be left unattended inside the enclosure at any time.
- The enclosure is **ONLY** intended to be used to reduce the risk of injury from falling off the trampoline. Do not intentionally kick, bounce against, climb on, hang from, jump over or crawl under the netting.
- Enter and exit the enclosure only through the zipper door. Do not go through the gap between the netting and the mat. Trying to exit this way poses a risk of strangulation, especially for young children.
- The enclosure netting and mat must be inspected prior to each use. If there are any signs of weakness, you must stop using the trampoline immediately.

Important Instructions for Enclosure Netting and Mat

Failure to follow these instructions to ensure proper operational condition of your trampoline may lead to serious injury or death.

1. Maintenance of Trampoline Enclosure Net, Mat and Pad

Enclosure nets and padding are prone to wear and tear like tires on a car. Gradual deterioration of the material will occur; the speed of which will depend on the level of exposure to UV rays, airborne pollution and outdoor weather conditions such as rain and wind.

The net and padding needs to be properly maintained and checked by following the Maintenance Schedule set out in these instructions. When the material shows any signs of weakness, you must stop using the trampoline immediately, properly store the trampoline and restrict access by users until a new replacement net or padding is properly installed.

2. Maintenance Requirement for Enclosure Net

Your trampoline enclosure netting is manufactured with UV resistant material. Despite this the netting is exposed to the outdoor elements including sunlight, wind, rain and wildlife. The net surrounding the trampoline must be checked prior to each use. This includes, but is not limited to inspecting the net for cracks, excess wear, brittleness, and stretching. Also inspect all connections and the entire enclosure for overall integrity. The net must be immediately replaced if it shows any signs of wear, damage, stretching, cracking, looseness, brittleness or other losses in integrity. The following Maintenance Schedule must be followed:

1 to 3 Months	3 to 6 Months	6 to 12 Months
Inspect the enclosure (net, net hanger, and straps) prior to every use.	Thorough inspection for UV damage and prior to every use for net, net hanger and straps.	Thorough inspection before every use on net, net hanger, straps, zippers, ties and strings. Replace after 12 months or earlier if necessary.

IT IS RECOMMENDED THAT THE NET BE REPLACED ON A YEARLY BASIS UNDER NORMAL USE, EVEN IF IT DOES NOT SHOW ANY VISIBLE SIGNS OF DAMAGE.

IMPORTANT INSTRUCTIONS FOR ENCLOSURE NETTING AND MAT

How to Inspect the Trampoline Net for Proper Use

Always check the enclosure netting for signs of UV damage, deterioration, brittleness, cracking, and tearing every time before using the trampoline and enclosure.

Step1 - Inspect the enclosure netting before **EACH** use for wear or tear by pinching and pulling a section of the netting between fingers and pulling downward. Please see diagram below.

If it produces any tear or cracking or ripping sound, then the net is unsafe and **MUST** be taken down immediately. **STOP USING THE TRAMPOLINE ENCLOSURE IF YOU FIND ANY SIGNS OF WEAR OR TEARING ON THE NETTING.**

Step 2 - Walk around the whole perimeter of the trampoline to visually check for material deterioration or other damage.

3. Maintenance Requirement for Trampoline Pad

Walk around the whole perimeter of the trampoline to visually check for material deterioration, tears, looseness, loss of elasticity or other damage in the pad.

It is recommended that you replace the trampoline enclosure net and pad every 12 months. Replace the enclosure net and pad earlier if there are any signs of wear, tear, brittleness, cracking, stretching or any other signs of weakness.

NO	Part Picture	Desprictuon	QTY
1-A		Leg Extension two holes	6
1-B		Leg Extension three holes	6
2		Base Leg	6
3		T-Connector	12
4		Top Rail	12
5		Balance Bar	6

9		Spring Tool	1
10		Frame Pad	1
11		Upper Pole B	6
12		Backboard Pole Upper Pole A	1 5
13		Screw For poleB	12

Note: The rust-proof oils are coated on the surface of the tubes which is essential to prolong the product's service life. Wearing gloves before assembling can prevent the oils from getting onto the skin.

Trampoline Parts List

NO.	Part Picture	Description	Quantity
14		Safety Net	1
15		Rope	10
16		Wrench	1

PRIOR TO ASSEMBLING

Before assembly, please ensure that you have all the parts required to assemble the product.

If you are missing any parts, please contact our Customer Support agents.

NOTICE

DO NOT use other parts to assemble the trampoline. This may damage the integrity of the product and will void the manufacturer's warranty.

DO NOT use electric power tools to tighten or loosen bolts and screws as this can damage the hardware.

Trampoline Frame Assembly

BEFORE YOU BEGIN: Review all steps before assembly and read all precautions before using the trampoline. At least two adults are required to assemble this trampoline. Protective gloves should be used during assembly to avoid injuries during installation. Goggles should be worn to avoid injuries to the eyes.

Step 1-Frame Assembly

Locate the following 24 pieces parts that are needed to assemble the trampoline frame:

12-Top Rail (#4)

12-T-Connector (#3)

Lay out all the parts on dry flat surface as shown below.

Attach the Top Rail (#4) to the T-shaped Connector (#3) until you form the circle. As shown in Fig. (You can use great force if it is too tight)

WARNING

- Make sure that you have plenty of space and a clean dry area suitable for the assembly of this trampoline.
- Make sure the trampoline is assembled where it is to be used. The trampoline should not be moved after completion.

TIP: Install the larger end of the top rail first, and then the smaller one.

Leg Support

Step 2-Leg Support

At this point, two people will be needed to assemble the trampoline.

- Insert the Leg Extensions(#1-B) into the left side of Leg Base(#2), and insert the Leg Extensions(#1-A) into the right side of Leg Base(#2)
- Repeat this step and install all of the Leg Support.

TIP: Please pay attention to distinguishing between the left and right sides of the Leg Support; each complete leg support component must be identical in appearance..

Step 3-Top Rail with Leg Support Assembly

At this point,two people will be needed to assemble the trampoline.

One person lifts up the circle frame, while the other lifts the Leg Support to a standing position and inserts the T-shaped Connector (#3) into a W-shaped leg tube.Ensure the locking holes are aligned.As shown in Fig.

Repeat in the same manner to assemble all Leg Supports.

WARNING

WARNINGDO NOT PLACE HANDS NEAR THE OPENING WHEN CONNECTING THE TUBES. WEAR PROTECTIVE GLOVES TO PROTECT FROM INJURIES DURING ASSEMBLY.

Step 4

Assemble Balance Bar(#5) behind the hole of leg extension, and lock it with screw.

Tip: please install it between the two leg base. And it is installed on the inner side of the leg.

[5]

Trampoline Mat Assembly

WARNING

When attaching the springs, do not place your hands, arms, legs or any other body part close to the connector points (i.e. joints connecting the steel tubes). The connector points can become pinch points as the trampoline springs tighten up. Wear heavy duty working gloves to protect your hands from injuries during installation by the springs and protective goggles to avoid injuries to the eyes. Be steady when installing the springs as it can rebound and fly off if you inadvertently let go when not hooked properly. Make sure no children are playing nearby when installing the trampoline.

Step 5-Spring Assembly

- To install the springs, hook one end of Spring (#8) into the triangle-ring on Mat (#7), then pull the other end with Spring Tool (#9) and latch it into the corresponding hole on the frame. Tap on the spring with the handle of the spring tool to make sure it is securely latched into the hole.
- There are a total of 108 springs. For even distribution of spring tension and ease of assembly, install the springs in the order instructed in the next pages. The number of triangle-rings sewn on the mat is equal to the number of holes on the frame. If you notice that you have miscounted a hole or triangle-ring, remove and reinstall the springs as necessary while maintaining an even distribution of tension.

Important: The two ends of the spring are different. Make sure to install the correct ends to the mat and rail as shown below.

Spring Installation Order .

Locate these four points that are used to assemble the spring:

- 1.point#1-Select any top rail,the first hole on the left side is point#1
- 2.point#28-Calculate clockwise, find the 28st position and hang the spring
- 3.point#55-Calculate clockwise, find the 55st position and hang the spring
- 4.point#82-Calculate clockwise, find the 82st position and hang the spring.

IMPORTANT: The number of triangle-rings sewn on the mat is equal to the number of holes on the frame

Spring Installation

Install the spring between the Mat and the Top Rail with spring tool.

Tip: Please take care not to pinch your hands and other body parts.

Spring Assembly

Continue to attach springs in the same manner. For even distribution of tension and ease of assembly, the springs must be placed on opposite sides of the mat in an alternating manner 14 then 68, 41 then 95 as shown below.

Spring Assembly

Continue to attach springs in the same manner. For even distribution of tension and ease of assembly, the springs must be placed on opposite sides of the mat in an alternating manner 8 then 62, 21 then 75, 35 then 89, 48 then 102 as shown below.

Spring Assembly

Continue to attach the remaining springs in the same manner as the previous step. the springs must be placed on opposite sides of the mat in an alternating manner to ensure even distribution of tension.

Frame Pad Assembly

Never use the trampoline without the Frame Pad, the Frame Pad reduces the risk of getting injured by hitting the metal frame or springs. Inspect the Frame Pad before each and every use to ensure all exposed metal parts are fully covered by the Frame Pad!

Step 5-Frame Pad Assembly

Lay Frame Pad(#10) over the trampoline so that the springs and steel frame are fully covered.

Trampoline Enclosure Assembly

WARNING

BEFORE YOU BEGIN:

● This trampoline must only be used when the enclosure netting is properly assembled. The trampoline netting must be checked thoroughly before each use to ensure there are no tears or damages. Please carefully read all the Important Warnings contained in this manual and all warnings on the product before use.

● Review all steps before assembly and read all precautions before using the trampoline. At least two adults are required to assemble this trampoline enclosure. Protective gloves must be used during assembly to avoid injuries during installation and goggles must be worn to avoid injuries to the eyes.

Step 6-Assemble the Enclosure Poles

The Upper Pole B(#11) is locked and fixed in the two holes at the upper end of Leg Extension (#1-B) with screw (#13). As shown in fig.

WARNING

DO NOT PLACE HANDS BETWEEN THE POLES DURING ASSEMBLY. MAKE SURE TO WEAR PROTECTIVE GLOVES TO AVOID INJURIES DURING ASSEMBLY.

Trampoline Backboard Parts

Number	Part Picture	Description	Quantity
17		Net	1
18		Hoop	1
19		Backboard	1
20		Screw	4
21		L-Wrench	1
22		Basketball	1
23		Pump	1

Step 7-Assemble the Backboard

Install the Backboard(#19)and Hoop(#18) onto the Backboard Specific Pole(#12), secure them with screw(#20).

Trampoline Enclosure Assembly

Please insert the Upper Pole A (#12) into the Upper Pole B (#11).As shown in fig.

Step 8-Assemble the Safety Net

Spread Safety Net (#14) out on the trampoline mat. Pass the strap through the ring of the Upper Pole Cap (#12), along the Upper Pole Cap (# 12), and through the buckle, and lock the buckle. As shown in fig.
Hint: Please make sure the cap holder is facing outward.

Step 9-Tie the Safety Net to the Mat

- Secure the trampoline netting to the trampoline frame using the rope(#15).Lift up the frame pad and tie one end of the cord to any one of the triangle-rings on the trampoline mat as shown below.
- Loop the other end of the cord through the next hole on the mat and then the adjacent triangle-ring. Continue in the same manner until the end of the cord is reached and tie it to a triangle-ring. Repeat the same process for all the cords provided until the enclosure netting is fully secured to the trampoline mat.

WARNING

1. To install the net rope, the zipper door needs to be fixed first, and the ropes need to be fixed to the same triangular ring.
2. Make sure the zipper is closed when installing the rope.

Step 10-Ladder Assembly

Number	Part Picture	Description	Quantity
24		Frame Pole	2
25		Step Pole	3
26		Bolt Pack	6

Locate the following 11 pieces parts that are needed to assemble the trampoline Ladder:

2-Frame Pole (#24)
 3-Step Pole (#25)
 6-Bolt Pack(#26)

Screw the Step Pole(#25) above the Frame Pole(#24) with Screw(#26) as shown in the figure.
 Hang the installed Ladder on the trampoline top rail.

IMPORTANT

Once you have finished the assembly of the trampoline, go back over all of the nuts and bolts and properly tighten all of them before using.

Read this entire manual and make sure all jumpers completely understand all of the safety rules printed in the manual and on the various warning signs. Instruct all jumpers in the basic bounces described in the manual.

CARE AND MAINTENANCE AND USE INSTRUCTIONS MUST BE READ CAREFULLY BEFORE USING THE TRAMPOLINE. ADULT SUPERVISION IS REQUIRED AT ALL TIMES

Disassembly of the Trampoline and Enclosure

If you need to disassemble the trampoline, please follow the assembly instructions in reverse and take special care to retain all parts. Retain the original packaging for transport purposes.

Do not attempt to disassemble any frame components until all of the springs and the trampoline mat have been removed. Wear heavy duty working gloves to protect your hands from injuries during installation by the springs and protective goggles to avoid injuries to the eyes.

Moving the Trampoline and Enclosure

To move the trampoline, it is recommended for the trampoline to be disassembled and then reassembled in the new location. However, if you need to move the trampoline a short distance for any reason, you must use duct tape or heavy industry tape to tape all leg joints together. To move the trampoline requires two or more people to lift the trampoline from contact with the ground. Do not drag the trampoline along the ground. The trampoline must be kept steady and horizontal to the ground during the move. Failure to follow these instructions may result in the leg support coming loose which may cause serious injury or death.

Care and Maintenance

Failure to follow these instructions to ensure proper operational condition of your trampoline may lead to serious injury or death.

WARNING

- The springs, trampoline legs and enclosure netting must be inspected prior to every use. The legs should be locked securely into place, all the springs attached to the frame and there should be no tears in the enclosure netting. If any part becomes damaged or worn, please stop using the trampoline immediately .
- If you see any signs of stretched or damaged springs, do not use the trampoline until replacement springs are properly installed.
- To move the trampoline, it is recommended for the trampoline to be disassembled and then reassembled in the new location. However, if you need to move the trampoline a short distance for any reason, you must use duct tape or heavy industry tape to tape all leg joints together. To move the trampoline requires two or more people to lift the trampoline from contact with the ground. Do not drag the trampoline along the ground. The trampoline must be kept steady and horizontal to the ground during the move. Failure to follow these instructions may result in the leg support coming loose which may cause serious injury or death.
- The trampoline and enclosure must be stored away during harsh weather conditions including extreme wind, heat and freezing temperatures.
- Always properly store away the trampoline and enclosure when not in use and secure from any unauthorized use.
- Inspect the trampoline before each use and replace any worn, defective or missing parts. The following conditions could represent potential hazards:
 - Missing, improperly positioned or unsecured enclosure support system, frame padding and pole caps
 - Punctures, frays, tears or holes in the trampoline mat or enclosure support system or frame padding
 - Deterioration in the stitching or fabric of the mat, enclosure netting or frame padding
 - Ruptured or loose springs
 - Bent or broken support system(frame)
 - Sagging trampoline mat and/or sagging enclosure netting
 - Sharp protrusions on the support (frame) or suspension system
- If you live in area with high salt and moisture content in the air, we strongly recommend that you paint the trampoline frame and springs with a rust resistant clear coat paint to add protection to the steel components.

Proper Use Instructions

Read and understand the use instructions in this manual prior to using this product. Failure to do so can result in serious injury or death.

Responsibilities of the user

The key here is to stay in control of your jumps. DO NOT move onto more complicated, more difficult maneuvers until you have mastered the basic, fundamental bounce. Read, understand, and practice all precautions and warnings prior to using the trampoline. A controlled jump is when you land and take off from the same location. For additional tips and instructions, contact a certified trampoline instructor.

Supervisor's or owner's role in preventing injuries

It is the responsibility of the supervisor(s) of the trampoline users to provide knowledgeable and mature supervision. They need to know and enforce all the rules and warnings set forth in this manual in order to minimize the likelihood of accidents and injuries and to inform users of these rules. During the periods of time when supervision is unavailable or inadequate, the trampoline should be disassembled and stored in a secure place to prevent unauthorized use. The supervisor is also responsible to ensure that the safety placard is placed on the trampoline and that the jumpers are informed of these warnings and instructions.

All jumpers need to be supervised, regardless of skill level or age.

- DO NOT attempt or allow somersaults. Landing on the head or neck can cause serious injury, paralysis or death, even when landing in the middle of the mat.
- Do not allow more than one person on the trampoline. Use by more than one person at the same time can result in serious injuries.
- Trampolines over 20 inches (51 cm) tall should not be used by children under six (6) years of age.
- Wear clothing free of drawstrings, hooks, loops or anything that could get caught while using the trampoline/enclosure and result in entanglement or strangulation, or both.
- Climb on and off the trampoline. It is a dangerous practice to jump from the trampoline to the floor or ground when dismounting, or to jump onto the trampoline when mounting. Do not use the trampoline as a springboard to other objects.
- Keep enclosure tightly fastened to the trampoline in accordance with the manufacturer's instructions. Failure to properly assemble and maintain a tight, secure trampoline/enclosure boundary may result in serious injury, strangulation or death.
- Completely close the opening of the enclosure before jumping. Close the opening of the enclosure after using the trampoline.
- Do not use the trampoline while under the influence of alcohol or drugs.
- Do not attempt to jump over the enclosure barrier.
- Do not intentionally rebound off the enclosure barrier.

LIMITED WARRANTY

Ours trampoline products to be free from defects in material and workmanship under normal use and service conditions. The steel frame is warranted for one (1) year after the date of purchase. All other parts are warranted for six (6) months after the date of purchase. Wind or weather damage is not warranted.

All warranty coverage extends only to the original retail purchaser from the date of purchase. . This Warranty does not extend to any product or damage to a product caused by or attributable to freight damage, abuse, misuse, improper or abnormal usage, or to products used for commercial or rental purpose.

In addition, in order to meet the possible demand, our accessories can also be obtained for a fee. The fee will include the value of accessories and the delivery fee.

You can contact us through the following email address: service@merscosports.com

OUR COMPANY IS NOT RESPONSIBLE OR LIABLE FOR INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THE PRODUCT OR OTHER DAMAGES WITH RESPECT TO ANY ECONOMIC LOSS, LOSS OF PROPERTY, LOSS OF REVENUE OR PROFITS, LOSS OF ENJOYMENT OR USE, COST OF REMOVAL, INSTALLATION OR OTHER CONSEQUENTIAL DAMAGES. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. ACCORDINGLY, THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

THE WARRANTY EXTENDED HEREUNDER IS IN LIEU OF ALL

OTHER WARRANTIES AND ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE IS LIMITED IN ITS SCOPE AND DURATION TO THE TERMS SET FORTH HEREIN. SOME STATES DO NOT ALLOW LIMITATIONS ON HOW LONG AN IMPLIED WARRANTY LASTS. ACCORDINGLY, THE ABOVE LIMITATION MAY NOT APPLY TO YOU. This Warranty gives you specific LEGAL RIGHTS. You may also have other rights which vary state to state.

THIS WARRANTY IS VALID ONLY IN THE UNITED STATES.
