**Color** = Clear glass

**Glass** = New clear glass less green tint with flat edge for more elegant style.

**Overflow** = all vessel sinks do not have an overflow and my require specific drain such as pop-up or twist.

### Care & Maintenance

Our stylish vessel sinks are scratch resistant, but to ensure your glass sink continues to look its best, proper steps in care and maintenance must take place. The glass vessel sink will chip or fracture with impact of a hard or heavy object, or if improperly installed. The most frequent cause of damage is over tightening the drain hardware at the installation. The glass surface can become spotted by hard water deposits or even damaged by abrasion caused by improper cleaning. A warm water rinse followed by a towel dry is recommended to prevent water streaks or spots. The mineral water deposits can be cleaned with a non-abrasive cleaner. DO NOT apply force when scrubbing the glass this may scratch or break the vessel.
