# Assembly Instructions

## A Guide to Wall Mounting & Fixings

### Important notes:

Important: To make sure there is NO hidden wires or pipes inside the walls when drilling.

If plastic wall plugs (rawl plugs) are supplied with your product, eg:

For Block Masonry Walls.

If you have any doubt about the correct wall plugs for your walls, please seek professional advice before assembling.

Make sure that the screws and wall plugs being used are suitable for supporting your unit. Consult a qualified tradesperson if you are not sure.

Hints:

1. General rule: always use a larger screw and wall plug if you are not sure.
2. Ensure you use the recommended drill bit to match the wall plug and hole size.
3. Ensure you drill the hole horizontally; do not force the drill or enlarge the hole.
4. Take extra care when drilling high walls, ceilings and ceramic tiles. Ensure
5. Ensure wall plugs are inserted beyond the thickness of the ceramic tiles to avoid the tiles splitting or cracking.

### Types of walls

You can use one of the following types of wall plug if your walls are made of brick, breeze block, concrete, stone or wood.

No. 1 "General Purpose" wall plug

Generally aerated blocks should not be used to support heavy loads,

For light loads, general purpose wall plugs can be used.

No. 3 "Cavity Fixing" wall plug

For use with plasterboard partitions or hollow wooden doors.

No. 5 "Hammer Fixing" wall plug

rather than the plasterboard. the retaining wall.

No. 2 "Plasterboard" wall plug

For use when attaching light loads onto plasterboard partitions.

No. 4 "Cavity Fixing - Heavy Duty" wall plug

heavy loads such as shelving, wall cabinets and coat racks.

No. 6 "Shield Anchor" wall plug - heavy loads

For use with heavier loads such as TV and HiFi speakers and satellite dishes etc.

### Care & Maintenance

Safety: Always check the fitting and location to ensure your safety in and around the home.

Fitting: From time to time check the fitting to ensure the wall plugs or screws do not become loose.
