F6839

Lamp structure explosion diagram

model:F6839			
NO	Parts-Shape	Specification	Qty
1		Connector cap	3
2		∅ 105 American-style hanging board	1
3		M5*30 screw	2
4		ϕ120*25 lamp holder	1
5		Locking iron parts	2
6		ϕ11*9 - M5 Flower Branch	2
7		1.5-meter braided cable	1
8		ϕ80*85mm	1
9		E26 ceramic lamp cap	1
10		ϕ250*105mm Glass cover	1

Installation steps

Installation steps are only applicable for indoor installation.

1. Carefully disassemble and identify each component to ensure that you have everything ready for installation. Place each part on a clean surface, such as a table or the floor.
2. Cut off the main power supply of the fuse box or circuit breaker inside the house or building.
3. Unscrew the M4 screw and remove the mounting bracket.
4. Use 8/32 screws to securely fasten the mounting bracket to the socket box.
5. Use the cross-head screwdriver (not provided) to unscrew the M4 screws on the bracket.
6. Connect the wires from the fixture to the power line from the outlet box and the cover using the wire connector. Twist the live wire on the lamp driver together with the live wire on the outlet box, and cover it with a wire cap. Remove the grounding wire from the fixture and the outlet box, and place them under the green screw head of the installation bracket.
7. Be careful to insert all the wires into the socket box.
8. Insert the lamp panel into the bracket fixed on the junction box. Pass the head of the M4 screw through the holes of the lamp panel. Tighten the bracket to fix the lamp, and then adjust the balance of the entire lamp body.
9. Put the (10) lampshade over the E26 threaded lamp socket and secure it.
10. Turn on the power and test the light source. Save these instructions for future use. If the light does not work, you can contact our customer service team to solve the problem.

Maintenance method

Clean the water waves with a soft dry cloth or an electrostatic duster. Avoid using irritating chemicals and abrasives to clean the fixtures; instead, treat the damaged surfaces smoothly.

Safety Precautions for Use

Your lamp is in the water. This will damage the wiring.

After-sales issues can be contacted on the platform order page.

We hope you will like your new lighting just as much. If your project meets or exceeds your expectations, we would be honored. If you write a review for us and share your experience, it can help others and other customers understand your ideas. Supporting us like you does help us make money, and we really appreciate it. After installation, the finger marks and sweat stains left on the metal part of the lamp body and the surface of the lampshade can be cleaned gently with a soft dry cloth or an electrostatic duster.
