Aluminium

Aluminium

Aluminium is a non-ferromagnetic metal obtained from bauxite, a mineral found in the earth's crust. It is characterised by its low density and high resistance to corrosion and impact. It is also 100% recyclable.

At Vondom we work with two types of aluminium: AISI12 (EN AC-44100) and 6060 (AlMgSi, 3.3206,A96060). Both aluminiums are painted with baked epoxy paint.

Aluminium AISI12

The material is extracted through aluminium smelting. At Vondom we use this material to offer contract tables for restaurants, cafés, offices or commercial spaces.

At Vondom we develop die-cast aluminium tables with HPL, or glass tabletops of the highest quality. Tables that combine the technology of their function and the elegance of their shape.

Their folding option makes them functional pieces, ideal for indoor and outdoor use. Tables that are resistant to time, of different dimensions and that can be adapted to any environment, giving an exceptional touch to spaces.

Aluminium 6060

This material is produced by moulding or extruding aluminium. At Vondom we use it to create tables with serene and timeless forms, using the frame as the elemental geometry.
Motivated by the infinite possibilities offered by the material, we design tables that are visually light, but at the same time strong and robust.
Thanks to the flexibility of the profiles of this material, we create tables of different heights and dimensions to offer unlimited innovative and sustainable solutions for both residential and commercial spaces.

Cleaning and care

Our production is governed by the standards of our quality assurance system ISO 9001:2008 and environmental system ISO 14001:2004. And we use only the highest quality materials to guarantee a long product life.

Steps to clean aluminium furniture:

1. Spray a grease remover on the surface to be cleaned.
2. Wipe with a damp cloth and water.
3. Rinse with plenty of water using a pressurised water system.
4. Leave to dry outside.

All our products are suitable for both indoor and outdoor use.
Place the piece on an even surface with no slope to avoid uncontrolled movement.
Keep it away from excessive heat sources.
For a better conservation of the furniture, it is advisable to cover each item with covers.
