HL10000 SERIES® PEDESTAL DESK SPECIFICATIONS

GENERAL INFORMATION:
Hirsh's HL10000 Series® pedestal desks are commercial grade, and are constructed with heavy gauge steel and a laminate work surface. They are available in single ped, double ped, and return desk configurations. There is one handle style available: full width J-pull. Each pedestal has one file drawer and one box drawer. The file drawers are designed to accept letter size hanging folders. Each drawer suspension utilizes a pair of high quality, commercial grade, steel ball-bearing slides. These slides allow, smooth, quiet and full drawer extension while exceeding all applicable BIFMA test requirements. Each desk comes complete with a core removable central locking system. Modesty panels are ¾ height. The legs ship unattached.

DESK DIMENSIONS:

Sizes:

Single ped: 30" x 48" and 30" x 66"

Double ped: 30" x 60"

Return: 24" x 48"

Corner: 66" x 72"

Height: 29.5"

CABINET CONSTRUCTION:
The pedestal shell is made with a 3-piece side-bottom-side construction. The fully enclosed shell is assembled using resistance welds and MIG welds. A front and rear steel posts extending the height of the cabinet, are resistance welded and MIG welded to each side panel. Front and rear kick-plate brackets are resistance welded. Hanging brackets are MIG welded to the vertical posts.

DRAWER CONSTRUCTION:
The drawers are constructed from a one-piece Side/Bottom/Side Body. A back plate is resistance welded at both sides and across the drawer bottom. The drawer front interlocks with the drawer bottom along the entire width of the drawer. Drawer front is attached with screws and is field replaceable.

STEEL GAUGE SPECIFICATIONS:

	HL10000 Series®
Cabinet:	
Modesty Panel	23 gauge
Ped Bottom Panel	25 gauge
Ped Side-Panel	25 gauge
Desk Side Panel	25 gauge
Vertical Reinforcement Posts	24 gauge
Lock Bars	16 gauge
Hanging Bracket	16 gauge
Kickplate Bracket	20 gauge
Drawers:	
Drawer Front	24 gauge
Side-Bottom-Side	25 gauge
Back Panel	25 gauge

SUSPENSION:
Three-piece, full extension steel ball-bearing slides are utilized, on file and box drawers. Center drawer uses a two-piece ¾ extension ball bearing slide. Drawer suspensions exceed ANSI/BIFMA requirements.

LOCK FEATURES:
For excellent security, a barrel style lock with removable core and two keys come standard with each desk. The central lock systems locks all desk drawers. The desk can be locked with the file or box drawers in the extended position. They will be locked upon closing. Returns are non-locking. Master keys are available upon request.

FINISH:
All post-painted metal components complete a three-stage power wash system, washing and treating each component with an iron phosphate conversion coating. An industrial grade baking enamel is then applied and baked for a durable and long lasting finish.

TOPS:
The tops are constructed from a 1-1/8" thick particle board core with a durable melamine laminate surface. Edgebanding is 1/2mm thick. Tops are California CARB Phase II compliant.

LEGS:
Legs are constructed from 1" square tubular steel. Legs are painted to match the pedestals. Each leg includes a leveling glide. Legs ship unattached.

PERFORMANCE:
Meets or exceeds all applicable ANSI/BIFMA tests.

WARRANTY:
Hirsh Industries offers a Limited Lifetime Warranty on all of our HL10000 Series® Pedestal Desks. Laminate surfaces have a 12 year limited warranty.
