Installation and Assembly

VA100010 Sun and Moon Solar Stake

1. Locate pieces of stake.
2. Simply screw pieces together by hand.
3. Make sure each is tightly secured before using item.
4. Place in desired location.
5. Enjoy!

How the Solar Light Works:

During the day, the solar panel converts solar power into the rechargeable battery. At night, the light turns on automatically by the stored energy. How long the lights lasts depends on its location, weather conditions, and seasonal lighting availability.

Precautions:

To note that the light is designed to work when ambience turns dark, if there are strong light sources nearby then the lamp might be very dim or not work at all.

Although the battery has been charged by the manufacturer the **electric levels will have dropped when you receive it. Please charge it for a full day to optimize performance.** The surface of the solar light must be kept clean, if not this will influence the efficiency of charging.

How to Use the Solar Light:

Push the switch to the "ON" position (located under the black base at the top of the stake, under the solar ball and Sun/Moon) and make sure panel in a sunny location. If the light does not turn on, automatically after a 6 hour charge, please check the following:

1. Check the batteries to ensure that they are making correct contact with terminals.
2. Check the lamp is place in a sunny location and that the solar panel is facing the sun.

Replacing the Batteries:

If the light stops working after it has been used for a long time (approx. 18mths), the battery may be beyond its lifespan. You may open the cover of the battery compartment (normally located underneath product) to change to a new battery – use small screwdriver to remove 4 small screws and take off cover.

Battery Specs: 1xAAA 1.2V 200MAH Ni-Mh rechargeable battery

***The lifetime of LEDs are over 10,000 hours. You should never change the LEDs as they are a non-replaceable LED.**

Disposal and Recycling Batteries:

To protect the environment, **batteries must NOT be thrown in domestic garbage**, nor disposed of in a fire as they contain dangerous materials. Dispose of batteries by taking them to your local waste collection service to be recycled. Replacement batteries can be [purchased at most electrical retailers.
