

SKY Colors LED Floor Lamp

Assembly Instructions for the Brightech SKY Colors LED Floor Lamp:

- 1- Connect pole (B) to base (A), then pole (C) to pole (B) and pole (D) to pole (C). Gently pull the excess cord out through the bottom of pole (B) as you connect the pole, making sure the excess wire does not get caught in the threading.
- 2- Thread the wire protruding from head (F) through the hollow pole (E) and plug it into the socket of pole (D).
- 3- Connect pole (E) into place on pole (D), then head (F) to pole (E). Take care not to unplug wire connection when screwing the poles and head into place.
- 4- Plug power adapter (G) into lamp first, then into outlet, then flip switch to power the lamp on.

Installing the SmartLife App :

Please note - you **MUST** have a 2.4Ghz Wi-Fi network setup to use the lamp with this app.

- 1- Download the Tuya Smart Life App and follow the prompts to register and create an account for full feature access. You will need to provide an email for a verification code confirmation, and set a password for the app.
- 2- Open the app, and from the Home Screen (house icon highlighted), click Add Device.
- 3- A popup with installation details will open. We recommend reading the 4 short tabs for relevant troubleshooting and installation facts, but you can tap the back button to skip and proceed to the next step if desired.
- 4- Press the Lighting button on the side menu, then press Lighting (Wi-fi) from the category options. Make sure your lamp is on. (See Image 1 below)
- 5- Enter your 2.4Ghz Wi-Fi network name and password when prompted, or first follow the in-app directions to set your router to 2.4Ghz.
- 6- Check the light on your Wi-Fi router to see if it blinks quickly or slowly and choose the correct speed when the popup appears. (See Image 2 below)
- 7- The app will scan for devices and successfully connect the lamp. You can change the name listed in the app if desired. (See Image 3 below)

Note - if the app is unable to find your lamp please follow the in-app instructions on how to restart and reconnect your lamp.

Adding to Amazon Alexa:

1. Download and create an Amazon Alexa account if you don't already have one.
2. Turn light on.
3. In Amazon Alexa App: click on Devices Icon on bottom left menu.
4. In upper right hand corner click on plus sign.
5. Click Add Device at top of pop-up menu.
6. Click the Light Icon.
7. Scroll down and click Other.
8. Click Discover Devices.
9. Once Detected, click Set Up Device.
10. Set up according to your personal home organization.
11. Under the Devices menu your light should now appear in the lights icon.

Google Nest:

1. Download and create a Google Home App account if you don't already have one.
2. Turn light on.
3. From Home Screen click the plus sign on the upper right.
4. Click Set up device.
5. Click under Works with Google.
6. Have something already set up?
7. Search for Smart Life from list.
8. Click on Smart Life App icon.
9. Enter Smart Life username and password and click Link Now.
10. Click the Authorize button to link Smart Life.
11. When it says choose device, check the Light - Smart Light Icon and click the Next button.
12. Choose your Google Home and click Next.
13. Choose which room your light will be located.
14. Your light will appear in your designated Room.
