Note

At the *behest* of one of our distributors, four braces were added. But according to our test, these braces do not contribute to the stability of the frame. So it's up to you to decide whether you want to use them or not.
Use a power tool to drill the screws into the tubes. There are no predrilled holes on the tubes.

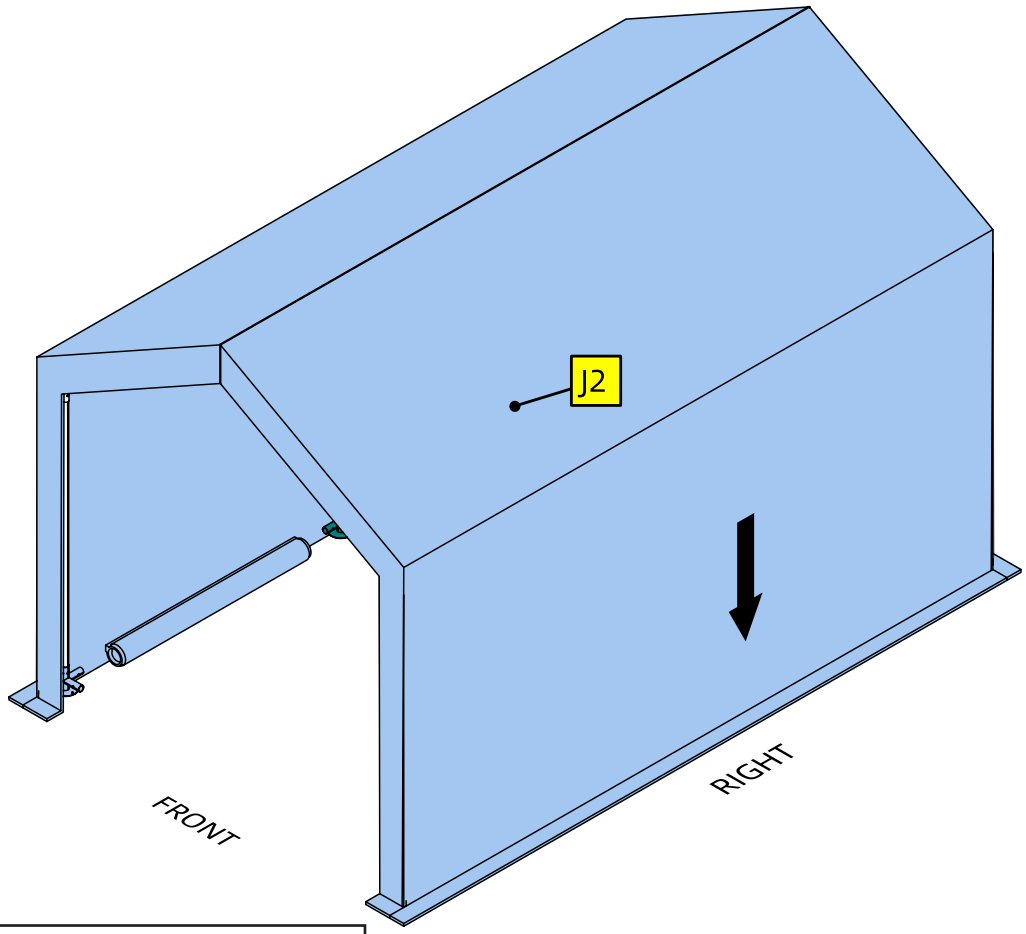

10

Temporarily remove B1 from the frame.

Note

Where there is a tube, there is a corresponding grommet on the cover. Use the bungee cord to fasten the covers to the tubes.

Notice that, at the front and back where the front/back cover and the middle cover are connected by Velcro tapes, two grommets, one from the front/back cover, and one from the middle cover, are sitting next to each other. Use the bungee cord to go through the two grommet at once and fasten the two covers to the tubes. There are nine at the front and nine at the back of such cases.

Note

When you feel like you have chosen a perfect spot for your canopy and do not plan to move it, you can fasten it to the ground using the anchor M. Notice that although C and D each have two holes, only use M with one of the holes.
