

Flush Mount Size & Placement Guide

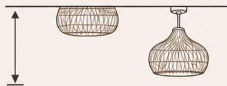

How to Choose the Right Diameter

Add your room's length and width together (in feet) — that number is your ideal fixture diameter, in inches.

Golden Rule

Room's length + width
(in feet) = Ideal Flush Mount
diameter (in inches)

Ceiling Height Guide

Under 8 ft → Flush Mount
8–9 ft → Semi-Flush Mount

Hallway or Entryway

Keep at least 7 feet of clearance
from the floor to the bottom
of the fixture.
