

Outdoor 5' x 3' Storage Shed Installation Guide

If you have any questions about the outdoor storage shed, please feel free to contact us.

E-Mail: Patiofurniture Serviceteam@outlook.com

E-Mail: Patiofurniture Serviceteam@outlook.com
Please be careful of any sharp edges & corners.

SAFETY & PRECAUTIONS

Before You Begin...

1. Check your local building codes regarding footings, location, etc.
2. Select a site that allows enough working space around the shed.
3. Determine building foundation and anchor system.
4. Read and understand the Owner's manual enclosed in the package.
5. Follow all directions and dimensions thoroughly.
6. Follow the steps given in the manual carefully for correct assembly.
7. Make sure all parts are present before you start assembling.
8. BE SAFE: Follow safety instructions and avoid injury. (See inside page).
9. GROUND MUST BE EVEN: Make sure the foundation frame lies flat on the ground.
If the earth bed is uneven, remove the sod and other debris and level it with a flat shovel.
10. Separate contents of the carton by the part number and review the list. Be sure you have all the necessary parts for your shed. Refer Owner's manual for the part list.

For your own safety, please read and follow these instructions during the shed assembly.

1. Always wear work gloves, long sleeves, and eye protection during assembly of the shed. Some pieces of the shed contain sharp edges and can cause injury.

2. Be cautious with the tools used for the assembly of the shed. Familiarize yourself with the operation of all the power tools.

3. Children and pets should be kept away from the assembly site to avoid any distractions and accidents.

4. When using a step ladder, make sure it is on even ground and fully open with the safety latch in place. Never concentrate your full weight on the roof or any part of the shed.

SAFETY & PRECAUTIONS

5. Do not attempt to assemble the shed on a windy day. Shed panels can be whipped across by the wind making the worksite difficult and dangerous.

IMPORTANT

1. Wear eye protection when using any form of the power tool. Do not use voltage power tools in a wet or damp environment to avoid electric shock.
2. Do not use any part of the shed as a means of personal support while attaching components during assembly.
3. The shed must be constructed on a solid base foundation. A concrete pad or a large size concrete patio stone squares is recommended for a suitable floor base. Make sure it is firm and level and will allow drainage away from the site.
4. For a concrete pad base, prepare a level bed for a firm footing layer of crushed stone. The concrete pad should then be poured to a thickness of 4 inches (100mm) to 5 inches (125mm). Allow drying thoroughly for at least 48 hours.
5. Your shed must be firmly anchored to the concrete pad or large concrete patio stone squares, to help protect against damage in high winds.

Care & Maintenance

Although this unit does not require any maintenance, care should be taken to prolong the life of your shed.

ROOF: Keep the roof clean of leaves and snow with a long-handled, soft-bristled broom. Heavy amounts of snow on the roof can damage the shed making it unsafe. Do not step on the roof.

WALLS: Do not rest any object against the wall panels of the shed.

DOORS: Keep doors closed to prevent wind damage.

FASTENERS: Regularly check your shed for loose screws, bolts, nuts, etc. And retighten them as necessary.

MOISTURE: With changing temperatures, condensation will accumulate inside the shed. Good ventilation will help in regulating and avoid moisture.

TIP: A noncorrosive caulking is helpful to seal the shed.

**DO NOT store swimming pool chemicals in your building.
Combustibles and corrosive must be stored in airtight containers**

GROUND MUST BE EVEN

The ground must be even, otherwise the holes will not line up properly!!!

The shed must be constructed on a solid base foundation. A concrete pad or a large size concrete patio stone squares is recommended for a suitable floor base. Make sure it is firm and level and will allow drainage away from the site. The base foundation should be at least 4 inches(100mm)larger than the shed dimensions. The manufacturer is not responsible for the choice and construction of the foundation

Note: For a concrete pad base, prepare a level bed for a firm footing layer of crushed stone. The concrete pad

should then be poured to a thickness of 4 inches (100mm) to 5 inches (125mm). Allow drying thoroughly for at least 48 hours
