E		GALVANIZED HOOK	30
F		UPPER POLE	6
G		LOWER POLE	6
H		SCREWS	30
I		ALLEN KEY	1
J		HOOK TOOL	2
K		PROTECTIVE OUTER POLE COVERS	6

ASSEMBLY

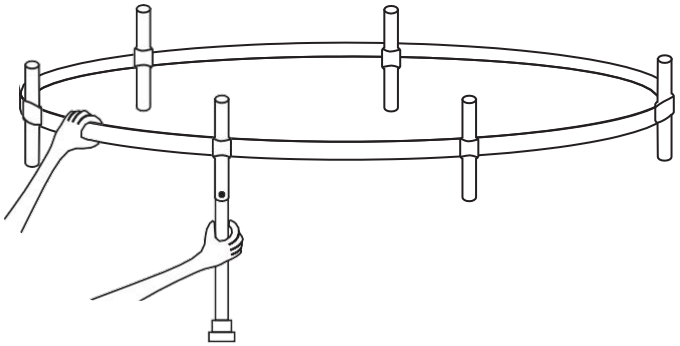

Warning!

NOTE: Before you attach the mat to the top rail, align the net in a way that the enclosure entrance will be between two poles, and that the hook and loop straps align to each pole.

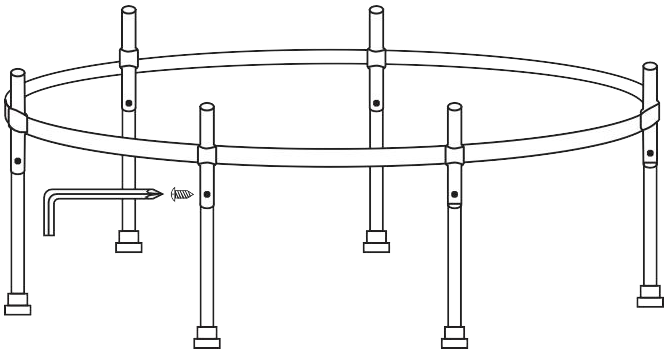

STEP 1

Connect all top rail parts (part C) together, forming a circle. Make sure to insert each short curve into to a long one to properly space the trampoline legs.

STEP 2

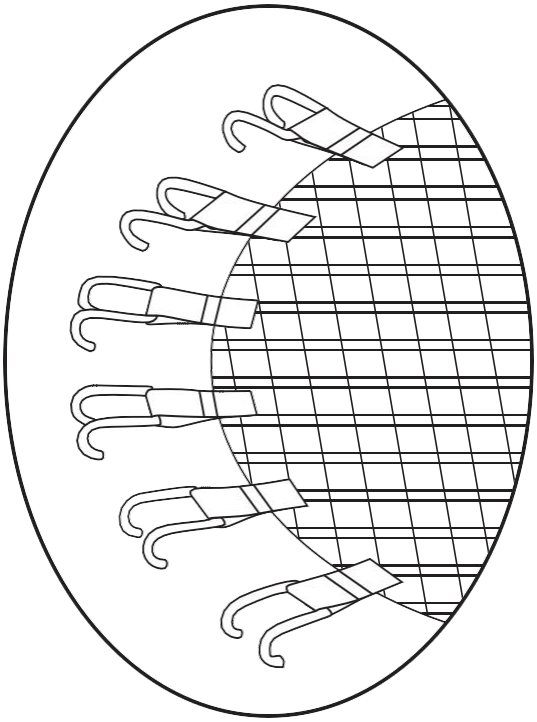

When the circle is complete, attach the legs (Part D) to the top rails.

STEP 3

After inserting all the legs into the top rail, secure the legs tightly with screws (Part H).

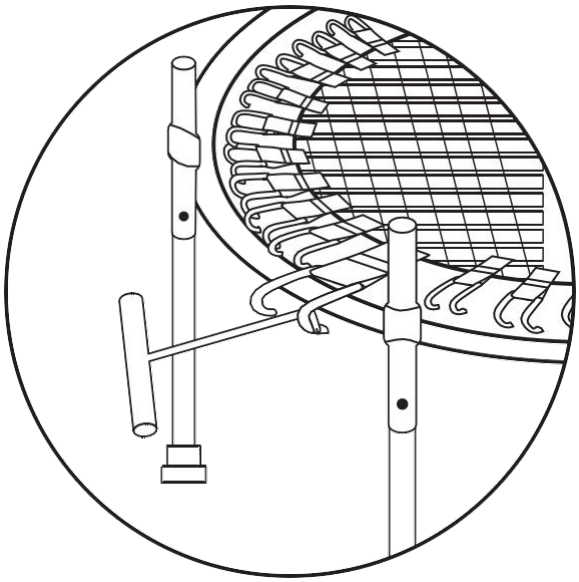

NOTE: Before you attach the mat to the top rail, align the net in a way that the enclosure entrance will be between two poles, and that the hook and loop straps align to each pole.

STEP 4

Insert the steel hooks through the mat's elastic straps.

NOTE: Please follow the suggested pattern of hook assembly. The mat will not attach otherwise, and you would have to start over.

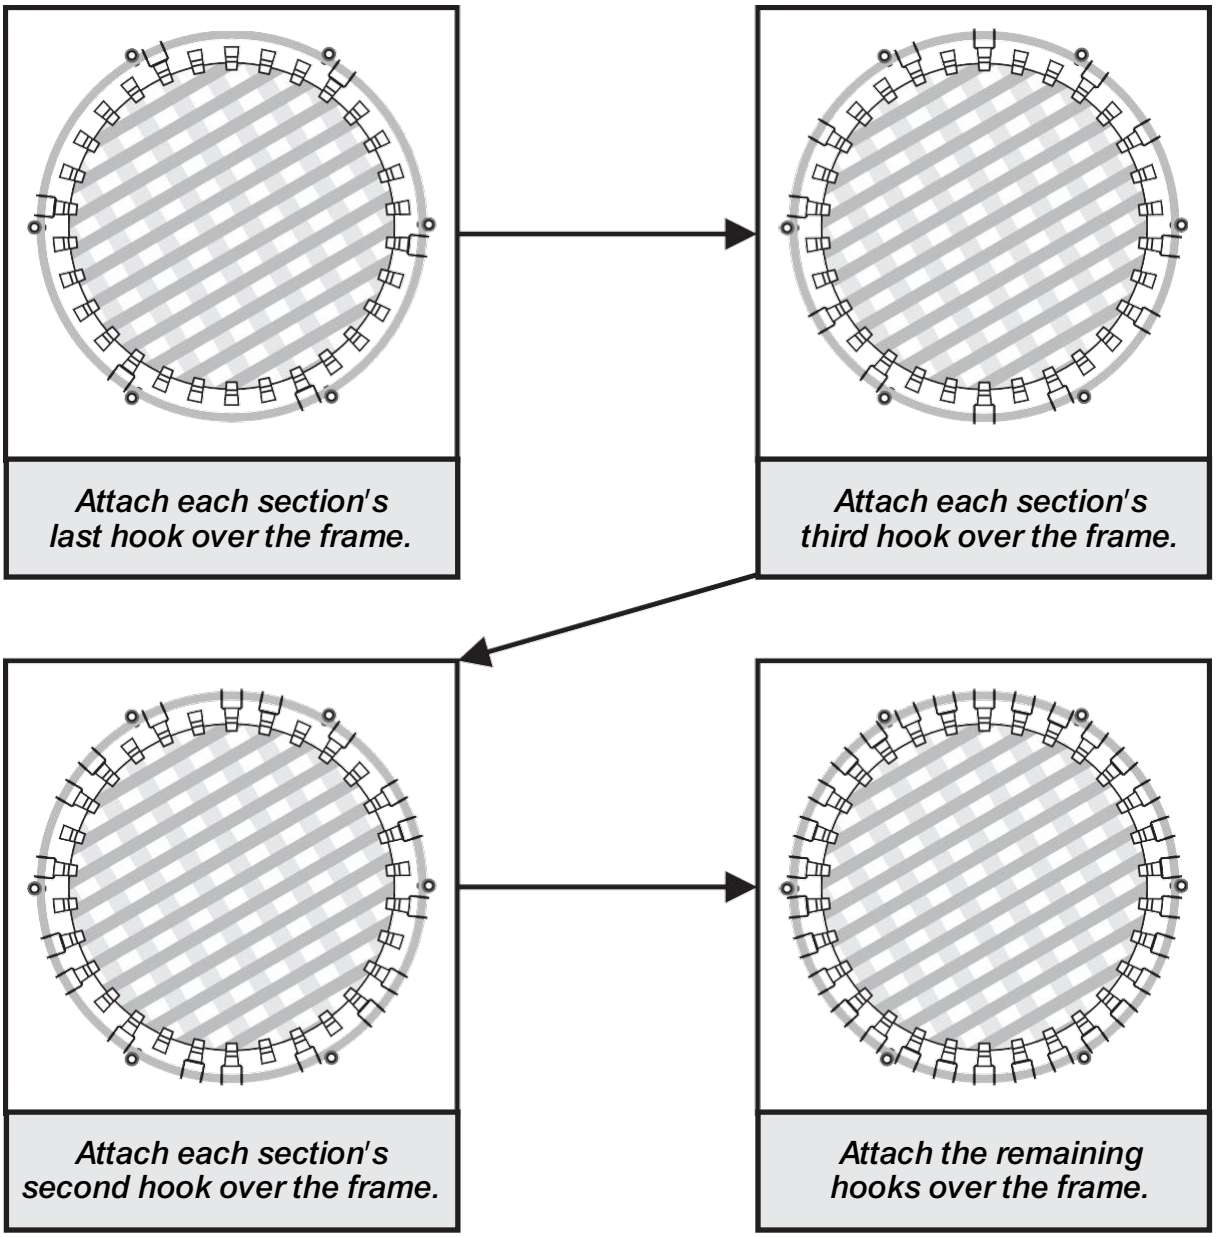

STEP 5

When attaching the jumping mat to the trampoline frame, please be careful as the connecting points can pinch since the trampoline is tightening up.

To assemble the jumping mat, you will need to use the hook tool **(Part J).** Pull the galvanized hook over the frame of the trampoline using the hook tool, as shown in the figure. There should be 5 galvanized hooks for each section of the rail frame.

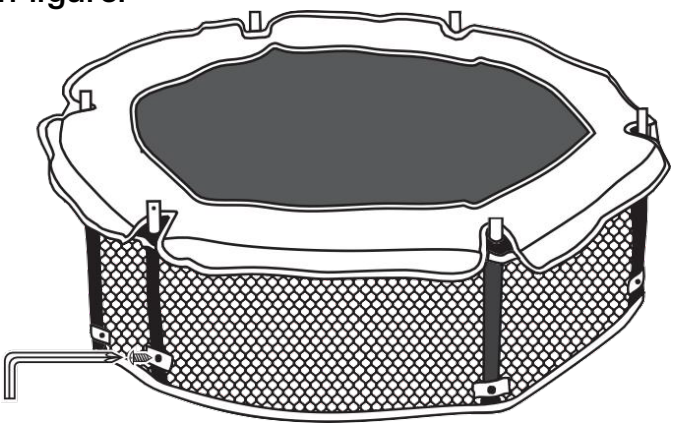

STEP 6

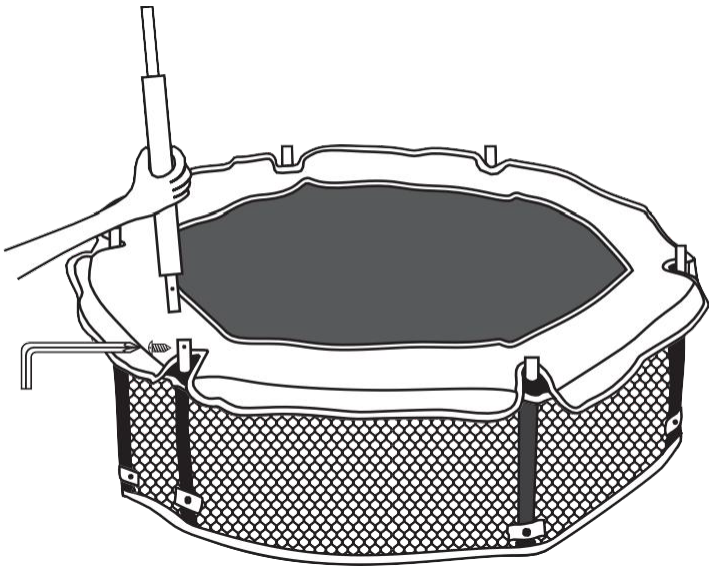

STEP 7

Frame Pad with Skirt Assembly

Position the frame pad over the trampoline so that the hooks and steel frame are covered. Lay the skirt around the legs and secure it with screws on the bottom of the legs as shown in figure.

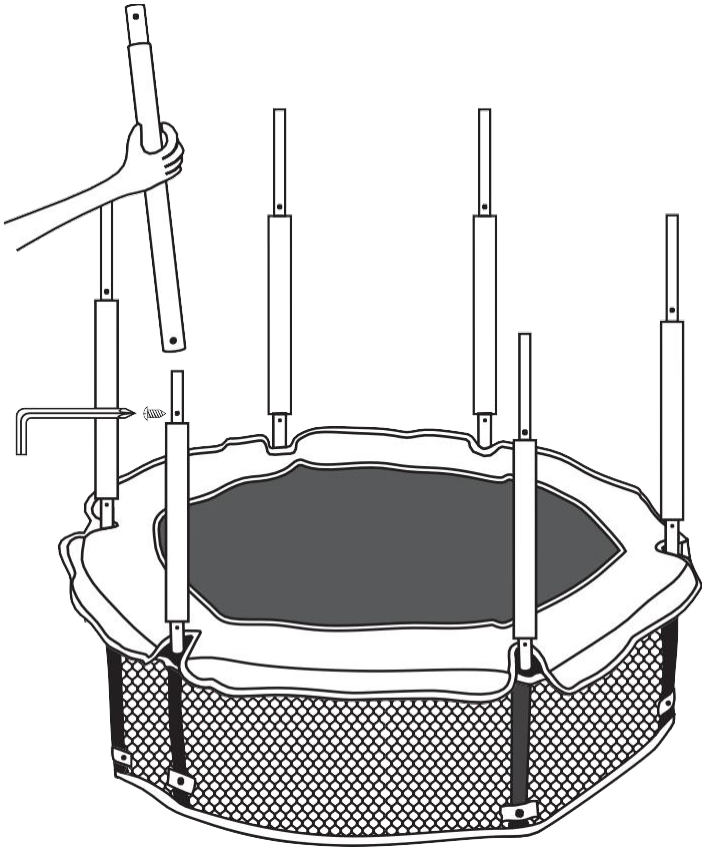

STEP 8

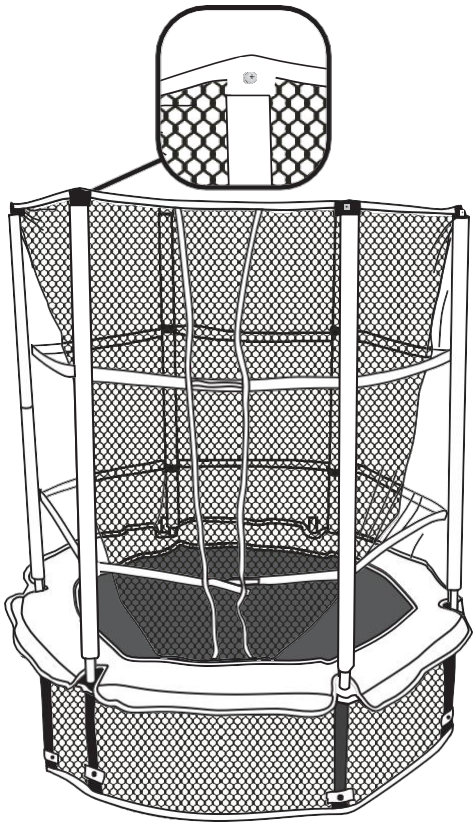

Safety Net Assembly.

Insert the lower pole (Part G) into the rail while lining up the screw holes and secure with a screw (Part H). Repeat for remaining lower poles.

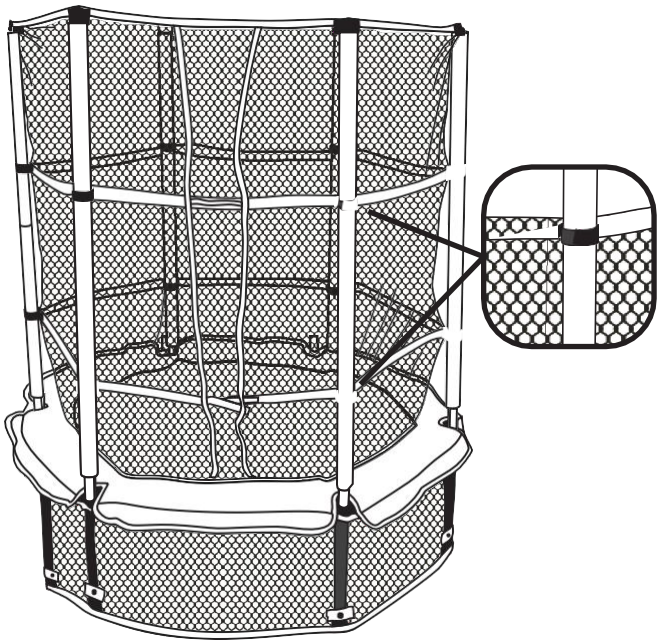

STEP 9

Insert the Upper Pole (Part F) over the Lower Pole (Part G) **and tightly secure with a screw.** Slide the Protective Outer Pole Covers over the enclosure poles and foam sleeves (Part K)

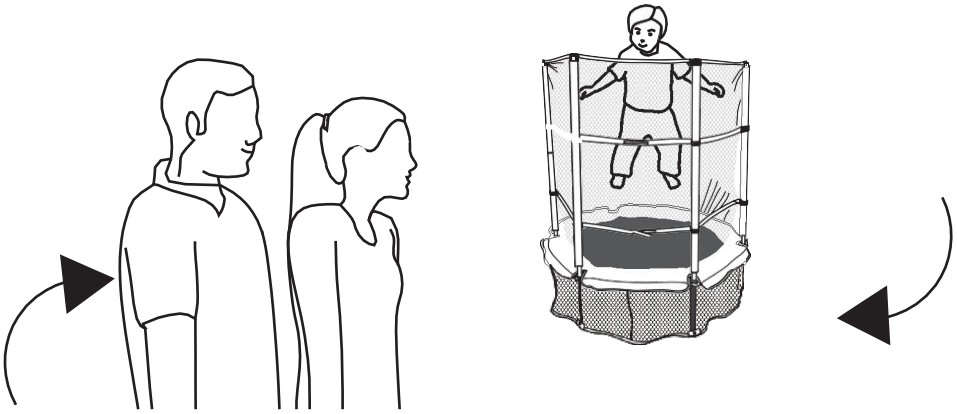

STEP 10

Pull the net over the enclosure poles from inside the trampoline, and secure each strap bracket with a screw.

STEP 11

To secure the net to the poles, pull both “Hook & Loop” straps around the upper and lower poles on all the poles of the trampoline

WARNING!

1 The trampoline must be set on flat ground. It is recommended to place the trampoline on a level surface at least 2 feet from any structure or obstruction such as a fence, garage, house, overhanging branches, laundry lines or electrical wires.

2 The trampoline should not be installed over concrete, asphalt, or any other hard surface.

3 Don't allow more than one child at a time on the trampoline. A majority of accidents take place due to the presence of more than one person on the trampoline.

4 Chidren should always be supervised by an adult when on or near a trampoline. Kids tend to attempt experiments with new jumps in the absence of parents.

5 Don't hang from, kick out, or climb on the safety net. Additionally, do not attempt to jump over or climb under the safety net.

6 This tramoline is not suitable for children under 3 years of age due to small parts.

7 For family/domestic use only

8 Intended for indoor use.

9 Comply with all warnings and recommendations provided by the trampoline manufacturer

10 Keep assembly and installation instructions for future reference.

11 Only Authorized Machrus accessories are safe to use with this trampoline.
