

Installation of Charging Base

1. The USB cable goes through a socket behind the base

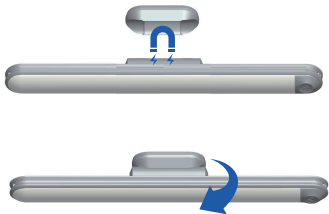

2. Insert the charging plug into its corresponding hole (P.S. Insert at a certain angle, the cable goes out from the back of the base)

3. The light bar can be charged by inserting the slot of the charging base (P.S. There is no difference between the heads and tails of charging direction)

Fixed Method by Magnetic Mount

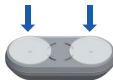

Installation of Magnetic Mount

1. Tear off the double-sided adhesive protective film

3. The base can be attached to the wall or other required surfaces (P.S The surface must be clean and free of dust)

2. Attach to the back of the base

4. Reinforcement method: the base can be rotated 90 degrees, and screws are installed through the holes (P.S. Avoid the aging of the double-sided tape or the weak adhesion of the wall causing the base to fall off)
