

Installation steps:

1. Thread the main wire through the lock hole on the square metal box (adjust to the appropriate length).
2. Pass the power cord through the non-slip octagonal plastic component.
3. Tighten the plastic screws on the metal part (to secure the power cord).
- 4-5. Drill two holes in the ceiling, insert the expansion bolts into these holes, secure the mounting bracket to the junction box with screws, and reinforce the mounting bracket with self-tapping screws.
6. Connect the main circuit to the reserved ceiling wires using wire nuts (white wire to white wire N, black wire to black wire L).
7. Cover the entire square metal box with the ceiling panel (it is allowed for the ceiling panel screws to protrude into the ceiling).
8. Screw the decorative nuts onto the exposed ceiling screws to secure the square metal box.
9. Install the glass lampshade onto the lamp holder.
10. Screw the lamp holder ring onto the lamp holder (to secure the glass lampshade).
11. Install all the light bulbs (bulbs not included).

Attention:

1. Please cut off the power supply before installation to prevent electric shock (installation by certified electrician is recommended).
2. Due to the different display, the actual color can be different from the image.
3. Due to the manual measurement of lamp body size, there may be a deviation of 1 / 2 inch.
4. If you have any questions or lost parts, please feel free to contact us and we will try our best to help you.
