eFloat Quattro

# eFloat Quattro

## Most Desks Keep You Still. This One Keeps You Moving.

Standing for just a few minutes each hour can increase energy, support long-term health, and sharpen focus. But motion alone isn't enough—it needs to be built into the space.

eFloat Quattro brings movement into the modern workspace with quiet confidence. Its distinctive frame and rounded legs offer a refined aesthetic and rock-solid stability. Designed for seamless adjustment and daily use, Quattro supports healthier work without compromising on design.

eFloat Quattro makes height adjustment second nature. Integrated controls and two programmable presets let you move from sitting to standing—quietly, quickly, and without breaking focus. Designed for everyday use, it keeps your posture fluid and your workflow uninterrupted.

# Where Movement Meets Modern

# A Four-Leg Design With Intent

With sculpted round legs and crisp, minimal lines, eFloat Quattro offers a visual clarity rarely found in sit/stand desks. Its four-leg structure brings both balance and stability—making it feel less like office equipment and more like considered furniture. Clean, architectural, and adaptable, it fits seamlessly into both commercial and residential spaces.

# Sustainably Sourced Premium Surfaces

eFloat Quattro is available in a curated selection of worksurfaces, including responsibly sourced solid wood and other durable, low-emission materials. Each option is chosen for longevity, a clean finish, and reduced environmental impact. Painted wood surfaces are formaldehyde-free, while all options are tested to ensure low VOC emissions—designed to last and made to live with.

# Organized by Design

A built-in accessories slot, Smart Channel, keeps monitor arms and cables exactly where they should be—out of sight. Pair eFloat Quattro with Humanscale’s cable management tools for a workspace that stays clear, focused, and intentionally minimal.

## Design Story

At Humanscale's New York City Design Studio, every product begins with a clear purpose: to create functional, beautiful solutions that promote well-being. That philosophy guides every decision—from the materials we source to the way each product performs in real-world spaces.

eFloat Quattro was designed to meet the growing need for ergonomic, movement-based workspaces that don't sacrifice aesthetics. Where most standing desks feel purely functional, Quattro brings balance, refinement, and stability—thanks to its clean four-leg structure and sculpted round legs.

Every element serves a purpose: sustainably sourced surfaces, PVC-free power cables, and discreet cable management work together to reduce visual and material waste. Designed to move effortlessly and built to last, eFloat Quattro reflects Humanscale's belief that good design supports both the user and the planet.

Humanscale Design Studio

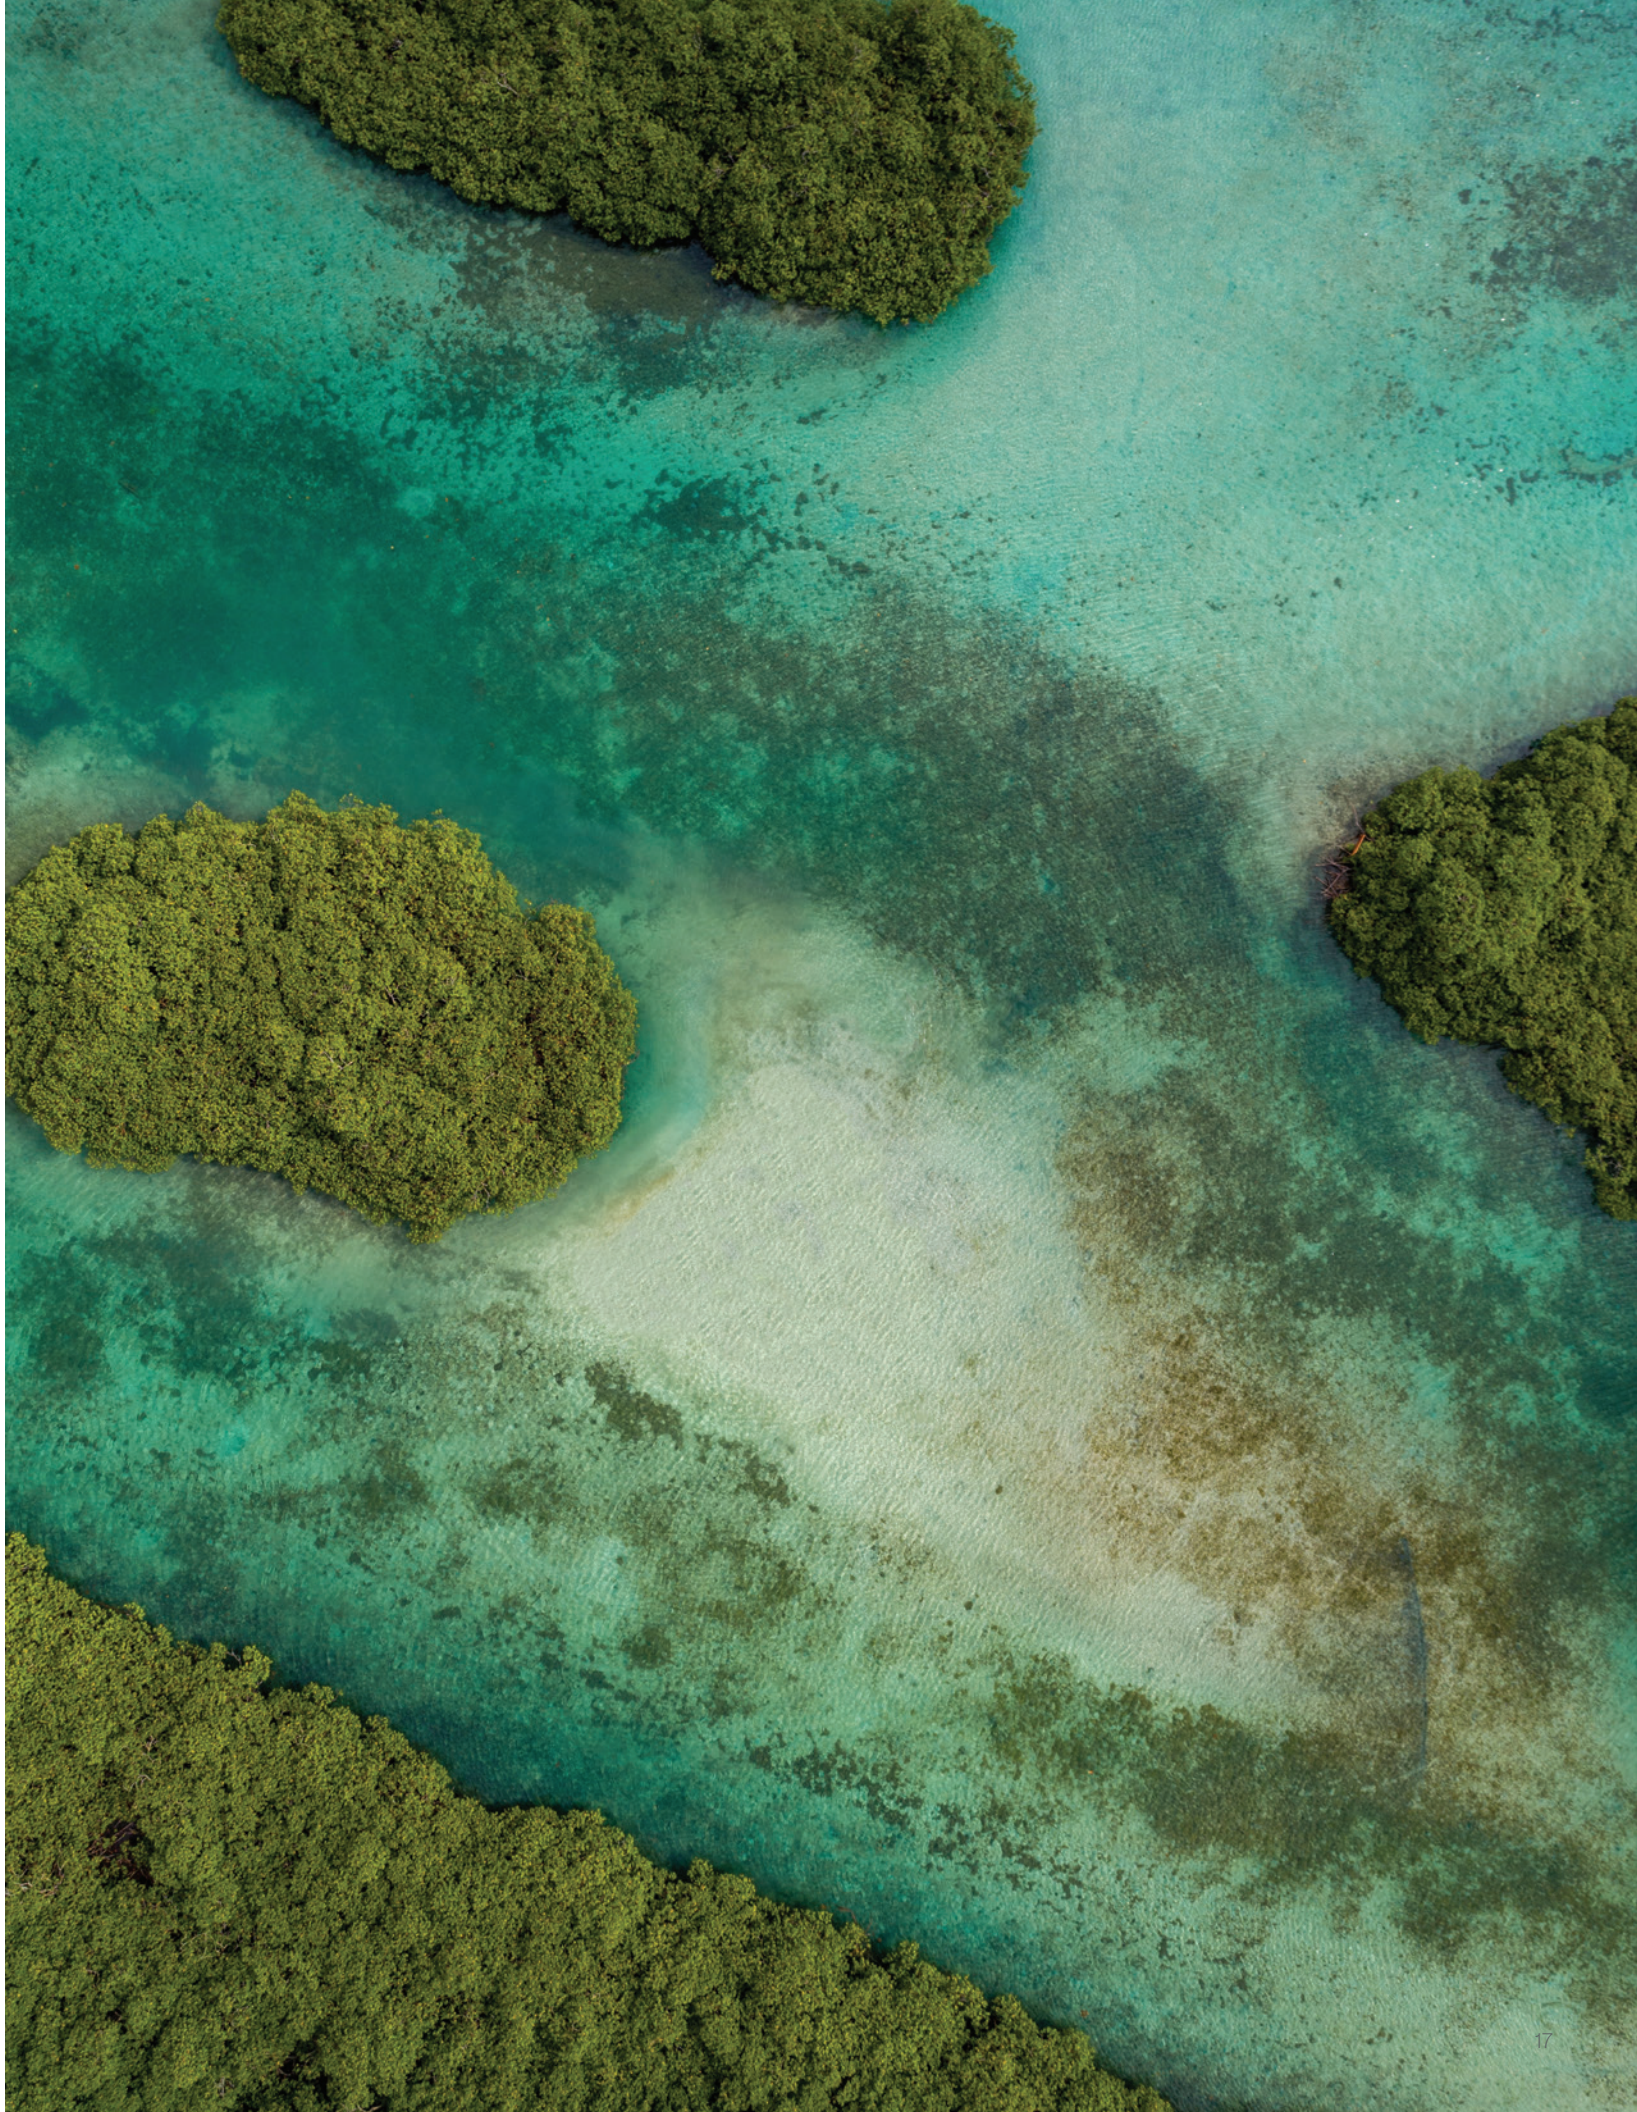

# Sustainability

At Humanscale, sustainability isn't an afterthought—it's considered at every stage of design and manufacturing. eFloat Quattro is made with environmentally responsible materials and avoids common Red List Chemicals such as PVC and Formaldehyde. All surfaces are low-emission and tested to ensure zero VOC off-gassing.

Its PVC-free power cables—made from non-toxic polyurethane—represent an industry first, offering a safer, more sustainable alternative without sacrificing flexibility or durability. And thanks to its long-lasting construction and timeless design, eFloat Quattro is built to stay in use longer, reducing waste and the need for replacement.

Every detail reflects Humanscale's belief that what's better for the user should also be better for the planet.

## Built to Perform. Made to Last.

Tested to meet BIFMA standards, eFloat Quattro is engineered for long-term reliability in both commercial and home settings. Its stable, four-leg frame handles daily height adjustments with ease. And with PVC-free, non-toxic cables—an industry first—it reflects Humanscale's commitment to healthier materials and smarter manufacturing.

### Warranty

eFloat Quattro base is backed by Humanscale's trusted 10-year warranty, covering the frame, mechanical, and electronic components.

This long-term coverage reflects our commitment to quality, durability, and responsible design. Built to reduce waste and extend product life, eFloat Quattro supports a more sustainable approach to workplace furniture. When you choose Quattro, you're choosing a product built to perform—and built to last.
