Parts Assembly Overview

Instructions For Fastening CAM-BOLT and CAM-LOCK

Place Cam-bolt on the designated pre-drilled holes on the panel. Use a Phillips Screwdriver to screw-in Cam-bolt vertically until shoulder is flushed (on the same level) with panel. Do not over-tighten or under-tighten.

Align the arrow on the Cam-lock to the Cam-bolt head and insert the Cam-lock. Ensure inserted Cam-lock is flushed with the panel.

Use a Flat Screwdriver to turn Cam-lock clockwise so it locks onto the head of the Cam-bolt. Turn until it is snug (about one half a turn) -- over-tightening could damage Cam-lock or/and Cam-bolt.
