

## **FLEX TRIM MILLWORK GENERAL INFORMATION & LIMITED LIFETIME WARRANTY**

Before you use or install any PCI Enterprises products, please review the information below. PCI Enterprises flex trim products:

- ALWAYS lay out the material to let it relax back into its original shape; this is a good time to double-check molding style and application.
- NEVER pre-finish the material prior to installation. The material may flex during installation and cause fractures in the finish.
- ALWAYS make certain that the surface you are applying the material to is flat and smooth.
- Flexible molding will follow any irregularities in the surface.
- NEVER use staples or nails with large heads. Keep nails to a minimum and away from edges to avoid “bumps” at the edge.
- ALWAYS use a construction adhesive in conjunction with (or in lieu of) nails or screws. This will ensure a quick and easy application and a cleaner finished look.
- **Exterior products must be finished after painting or staining with an exterior grade topcoat.**
