

BRIGHTECH

The Venus Table Lamp

ASSEMBLY

1. Screw the inner pole (part B) into the base (part A), taking care to set at a 90 degree angle and that the threading is properly aligned.
2. Next, screw the head (part C) onto the pole.
3. Plug the power adapter cord (part D) into the cord of the lamp.
4. Plug the cord into a 110v outlet. Review reverse side of this page for important warnings and safety information prior to use.

OPERATION & USE

POWER & DIMMING : The power & dimming control is located on the cord of the lamp, in the form of a slide switch. Simply slide the switch to turn the lamp on and leave it at your desired brightness level.

USING WITH A WALL SWITCH : To use this lamp with a wall switch, simply plug it into an outlet that is built to be powered with the wall switch. The lamp will be able to be turned on and off via the switch to the brightness level that it was on prior to being turned off. Dimming cannot be controlled via light switch and can only be adjusted via the controls within the lamp itself.

BRIGHTECH

SAFETY & WARNINGS

This product is intended for 110v voltage only. Use with a higher voltage is likely to cause damage to the product as well as the electrical component it is being powered by.

Do not bring this product or any of its components in contact with any water or extreme heat.

Keep between 23 degrees F & 104 degrees F, and below a humidity of 95%.

Do not use this product outside of its intended and advertised use. Do not tamper with internal parts or wiring.

Brightech is not responsible for any failures associated with modifications to this product or any of its electrical components, or when the product is used with externally purchased parts not manufactured to come with this product.

FURTHER RESOURCES | Diagnosis

Though all of our products pass rigorous pre-production quality control, we understand that sometimes things can happen. If your product is experiencing any abnormalities, please see below for some more insight as to what may be happening & if there's anything you can do to troubleshoot. If the purchase is covered under warranty, notify us of any weaknesses or malfunctions as soon as they are discovered.

Note: Never make any temporary or permanent alterations to any parts or components of this product.

Physical or Cosmetic Damage: If the damaged portions of the product are among the separate pieces listed on the opposite side of this guide (see: Assembly), these pieces might be able to be replaced. However any parts that are connected to other parts by wiring are considered one full piece as a unit.

Replacing the Lights or Wiring: The LEDs and wiring are built directly into the lamp for maximum durability and are non-replaceable at this time.

Light Flashing or Strobging: A malfunction of this sort may suggest a problem with the power adapter cord, necessitating a replacement of the cord.

Lights are Dim: If the LEDs have dimmed, or the lamp has failed after first not performing at max brightness, this may suggest a failure of the actual LED component, necessitating a replacement of the full piece containing the LEDs.

SPECIFICATIONS

Wattage | 9 watts

Color Temperature | 2700 kelvin

Brightness | 800 lumens

Adapter | Input AC100-240v ~ 50/60Hz, 0.5A

| Output 12v, 1.5A 18W
