Green Trace 5

D2206S44105-3574

Green Trace V is a fine art print of a Cordyline (Dracæna) Indivisa leaf that evokes the charm of a vintage accademia gallery wall of botanical illustrations. Native to New Zealand, the leaf is an impressive and visually captivating botanical specimen. Commonly known as the “cabbage tree,” this plant is characterized by its elongated, sword-like leaves that create a striking shape. Touches of burgundy stripes alternate with hues of emerald and sage green to create a sense of depth and dimension. Its dramatic shape and bold coloration make it a standout addition to any art collection of exotic foliage.

An exquisite display of color and depth in a famous botanical form, Green Trace 5 is part of the carefully curated ART by TA Collection.
