

Cleaning Instructions-Model#HB-2016

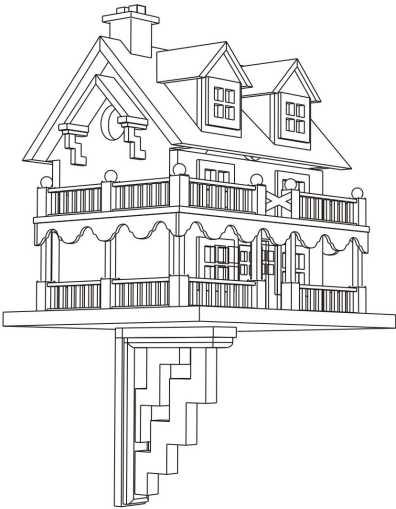

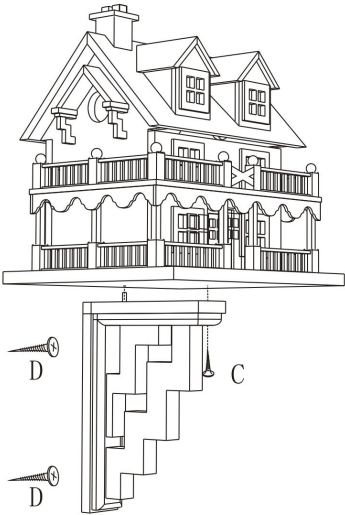

Mounting Instructions-Model#HB-2016 with Bracket
Cleaning Instructions-It is recommended that you clean out the old nest from the birdhouse before the season.Using a Phillips head screwdriver remove the screws from the back wall of the house and remove the old nest.Replace the screws.

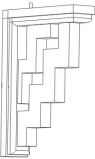

Mounting Instructions-
First determine where you will be mounting the house.Make sure that you are positioning the house at a height that will be accessible for cleaning and tending to the house.
A height of between 4-6 feet is most desirable.

Affix bracket to the bottom of the house bu driving a screw through hole in bracket and secure bracket to the floor of the house.(Underside).For permanent installation,place wood plug into the hole.
Put nail or screw into area to be mounted and place eyehole onto nail or screw.See picture attached.
