LPFM Low Profile Flush Mount Panel

LPFM Offers Maximum Versatility

The LPFM low profile flush mount panel is precision-engineered for unrestricted mounting opportunities. The integral driver sits recessed below the frame making it perfect for direct ceiling mounting the LPFM to a hard surface. LPFM's rigidity and ultra thin design creates clean lines for suspension mounting. Integral T-grid clips make mounting in a T-grid ceiling a breeze.

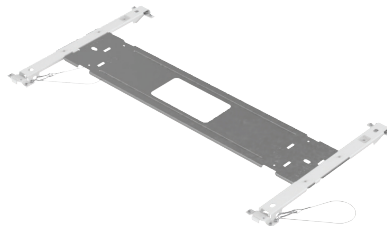

- LPFM offers switchable color temperature (SWW) for three color temperatures in one panel.
- Distributors can stock less SKUs while providing increased flexibility to customers

Direct Ceiling Mount Kit

The LPFM fixture paired with a Direct Ceiling Mount Kit (DCMK) bracket provides a crisp and clean aesthetic with a solution that extends less than 1.6" below your ceiling. DCMK accessory bracket is included and requires minor assembly with no additional tools.

- Minimal 5/16" gap from ceiling to fixture
- Audible locking click lets you know exactly when the LPFM correctly is in place
- Clip tether cable for easy wiring

See LPFM specifications sheet for full list of compatible accessories.
