FAQ

1. What should I do when I received a defected item?

Please feel free to contact customer service via the link where you purchased this item with your order ID and pictures of the defective areas. We are eager to help you resolve the issue.

2. Is it easy to put the screws to the panels?

Yes. As long as you follow the instruction and use the correct screws and put it in correct holes, it is easy to screw it into pre-drilled holes.

3. What should I do if I have a problem with the drawers not closing flush?

The problem with the drawers not closing flush is usually caused by the assembly of the drawer slides. Here are the solutions as below:

- 1) Please check whether the slide rail is damaged, for example, the ball of the slide rail has fallen out, if so, please ask us for replacements of the drawer slides;
- 2) Refer to the assembly manual to check if the holes for the slide rail are assembled correctly. If there is no problem with the assembly, but the slide rail is stuck in the process of pushing in, please release the entire drawer as you did the first time you removed the drawer slides, and then push it back in again.

Any query, please contact us directly.
