

# DIGITAL AIR **ROLLED & READY**

SETUP INSTRUCTIONS FOR FREEDOM-AIR & DIGITAL-AIR 2.0 SLEEP SYSTEMS

Today we will be showing the ease of setting up your new Rolled & Ready bed. Your complete bed is in this box. Simple, Convenient, and Easy to Install.

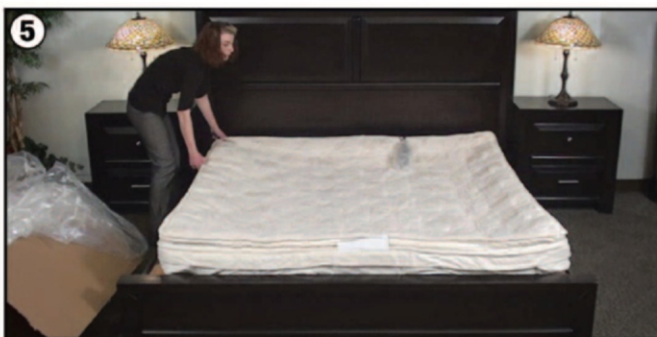

This roll you are looking at is an Eastern King mattress, no extra assembly required. This roll contains your air chambers, bolsters, anatomic layer, and the Freedom-Air™ pump at the foot of the bed.

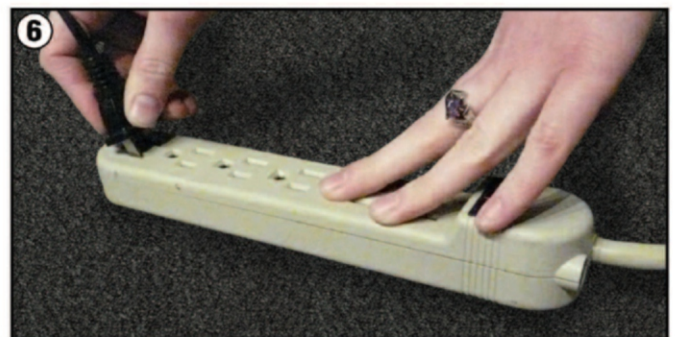

You will use the tool attached to cut the plastic and access the mattress. Place the mattress on the foundation with the law tag on top so it rolls toward the head of the bed when the bag is opened.

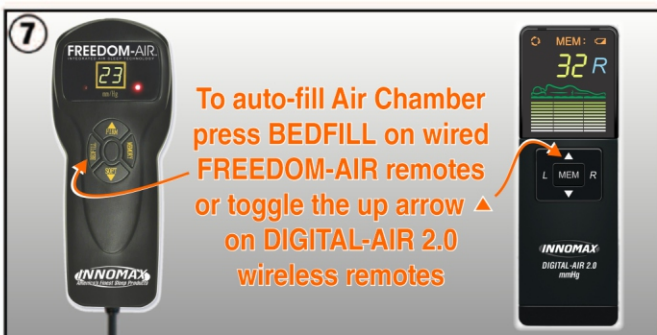

Once plastic is removed, set it aside to be later discarded. Unroll the mattress, align the head of the bed, and sides to where the mattress will be placed.

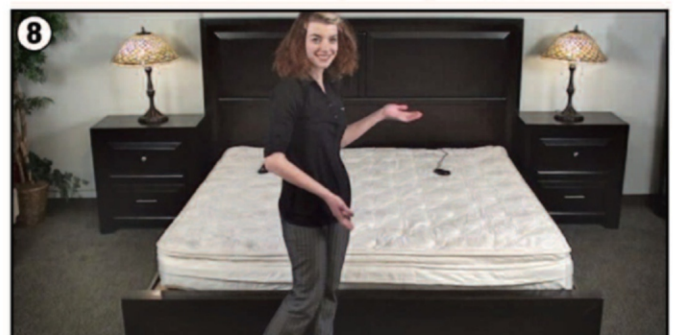

After your bed is unwrapped you will want to allow the bed to decompress - which can take approx. 30 minutes to 1 hour. Like bread - the bolsters will need to rise.

The power cable is in the packaging with the remotes. Once plugged into a surge protector (not provided), your remote will come to life. Your remote has an LED display with lights designating right & left sides.

To learn more about FREEDOM-AIR SQ & DIGITAL-AIR 2.0 visit <https://innomax.com/product-assembly-instructions/> and click on Air Inflators & Chambers Assembly Instructions

Congratulations, you have now set up your new bed! The only thing left is to put on your sheets, and go take a well-deserved nap! Enjoy!
