

# Clock Mechanism Instructions Fast and Easy!!

Thank you very much for your order. We hope that you will love this clock. All our clocks are handmade by a passionate artist.

In this order, you will find the clock mechanism, clock hands and hardware necessary to assemble your clock. Due to the transportation of these clocks we have stopped shipping them already installed to minimize the chance of damage to the mechanism. Behind the clock you will find the clock hands.

## Instructions:

1. Begin by removing the clock hands carefully from the back of the clock. Included on the back of the clock you will find the hanging kit used to hang your clock on the wall and a small nut cap for the clock mechanism.
2. Put the small clock hand on the protruding part and push it down until you feel it "click" into place. It should be secure and not loose.
3. Repeat step 2 for the long clock hand.
4. Once you have put the two hands on securely, install the small pin (that looks similar to a push pin) to secure the clock hands. For our larger clocks, the small pin looks more like a screw.
5. Install the battery by following these instructions. →

Thank you again for your order.
