ASSEMBLY AND INSTALLATION

INSTRUCTIONS

CAUTION

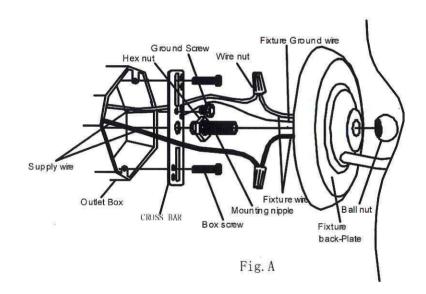

Read instructions carefully and turn electricity off ay main fuse box before beginning installation

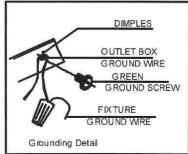

Installation(see Fig. A)

- 1. Disconnect power at main electrical panel before installation.
- 2. Follow wiring instructions carefully(listed below)
- Attach cross bar to outlet box using box screws provided with outlet box.
- Thread the mounting nipple into the same side of the cross bar from the Green ground screw.and secure with hex nut.
- Mount fixture by aligning mounting holes in backplate with mounting nipple and threading ball nut onto mounting nipple. Tighten to firmly hold backplate in place against wall(mounting nipple may require adjustment).

Wiring (see Fig. B)

- Split the conductors of the fixture wire about 4 inches. Being carefull not to expose any of the wire inside of the insulation.
- 2.Connect the fixture ground wire to the outlet box ground wire using wire nut(not provided).Connect outlet box ground wire to mounting plate with GREEN hex-head ground screw to tapped hole in mounting plate marked "GND".
- 3. Connect the half of the fixture wire that is white,marked or has a ribbed surface to the outlet box supply wire (white).connect the other half of the fixture wire that is black, unmarked or has a smooth surface to the outlet box supply wire(BLACK or RED). Use wirenuts provided.
- 4. Spread the electrical splices so that the black wire are on one side of the outlet box and the white wire are on the other side.
