

# INSTALLATION INSTRUCTION

Compressed packaging for shipment

Open the cardboard box and take out the bean bag liner and sofa cover

Remove the outer packaging plastic bag

Due to compressed packaging and shipping, it is necessary to perform a beating after disassembly, resulting in the internal filling rebounding to the optimal full state

Wait for the bean bag sofa to rebound to a full state

Set up the bean bag sofa and put it into the sofa cover

When aligning the zipper of the sofa cover with the seam above the inner lining of the bean bag, only by pulling the zipper can the full state of the bean bag sofa be reflected

When installing the bean bag cover, be sure to align the stitching of the inner lining of the bean bag with the stitching of the sofa cover in order to achieve the best fullness of the bean bag sofa
