

# Cedar Coffee Table

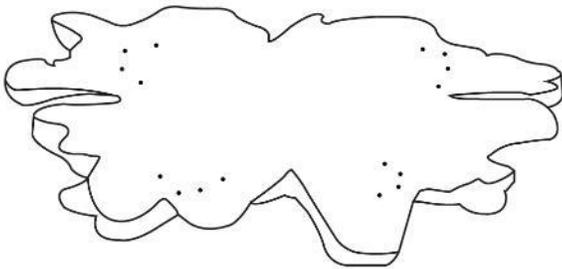

## Package Content

Wood slab x 1    Metal leg x 4    Screw x 16

## Tools Needed

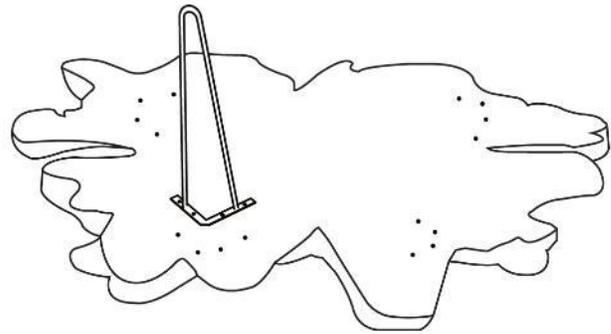

Screwdriver

## INSTRUCTION

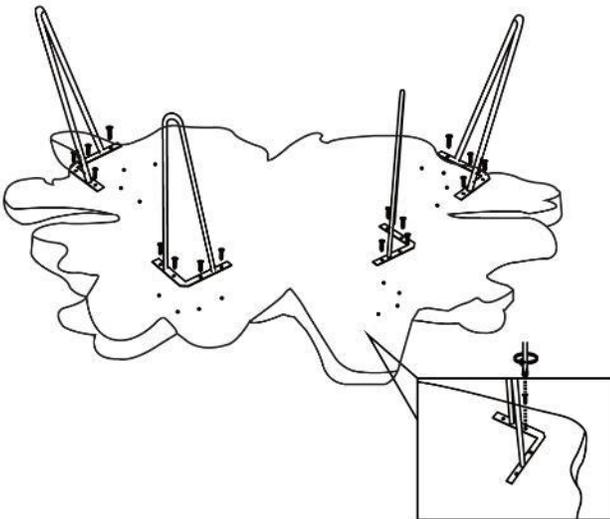

Turn your table top upside-down on a scratch free surface. The top of the table is usually the smoother and flatter side with less dents.

1.

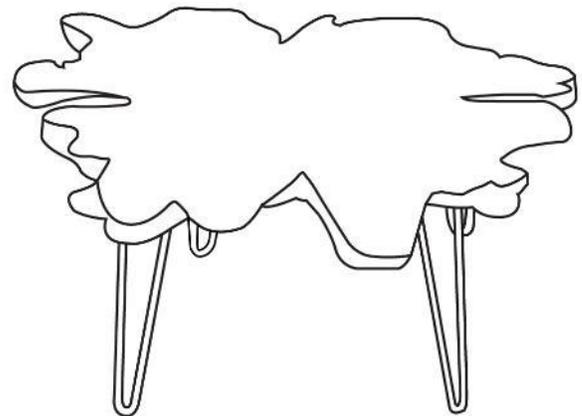

Line up one leg at a time to the holes or marked lines. If your table does not come with lines or holes, place one leg on the center of each "petal" and at 1.5" to 2" from the edge. The legs should be parallel to each other but do not need to line up in a straight line.

2.

Attach the legs with the screws provided. Please note that the screws provided are the proper length for 1.5" to 2" thick.

3.

Flip your completed table over and enjoy!

4.

Please install according to the instruction. The seller or manufacturer is not responsible for injury or damage resulting from improper installation or use.
