

## Introducing the Cascade Collection

QA Group's modular Cascade Collection of restaurant booth seating is the best value in food service for high quality, commercial-grade furniture. Thoughtfully designed to enhance any dining space, our booths offer style, comfort and durability without breaking the bank. Our modular booths help you get the most out of your space, whether you need straight, double, or corner units. *The result? A polished, efficient layout that looks as good as it functions.* The sophisticated styling sets and careful construction set it apart from lower-quality alternatives and create a lasting impression on patrons. We offer two heights, three lengths, and a variety of vinyl colors and back designs so you can create a look that fits your brand perfectly!

Every booth is handcrafted by a team of skilled, experience craftsmen who know what it takes to build seating that lasts – upholsterers who understand design and comfort, former restaurateurs who know what works in a busy dining area, and engineers who design frames to last.

The real difference lies in the details:

- We use furniture-grade hardwood birch plywood for superior strength and longevity, not MDF like other competitors.
- We design with comfort and durability in mind.
- Our high-density, fire-retardant foam is sculpted to provide the look and feel of a spring seat, without the added cost.
- Our upholstery work is built to last, featuring double-reinforced vinyl that withstands over 100,000 double rubs, is fire-retardant and additive-free.

We're so confident in our craftsmanship that we back our frames with a 5-year warranty - five times longer than the industry standard! In nearly a century of business, we've never had a single replacement request.

*Upgrade your space with the Cascade Collection by QA Group. Built to last, designed to impress.*
