

# Modular Sectional Sofa Assembly & Setup Guide

Thank you for your purchase. This guide will help you properly unpack, expand, and set up your compressed modular sofa for the best experience.

## Important Before You Start

- This sofa is vacuum-compressed for shipping efficiency.
- No tools or hardware are required for setup.
- Full expansion may take 24–72 hours depending on room conditions.
- Do not sit on or place heavy objects on the sofa during expansion.

## Step 1: Unboxing

Carefully remove the outer carton and plastic packaging. Use caution when cutting plastic wrap to avoid damaging the fabric or seams.

## Step 2: Allow to Expand

Place each sofa module on a flat, open surface. Allow the cushions and structure to expand naturally after unpacking.

Gently pat and adjust cushions to help restore their original shape.

## Expansion Time

The sofa may require 24–72 hours to fully expand. Expansion time may vary based on room temperature and humidity. This is normal.

### Step 3: Arrange Modules

Once fully expanded, arrange the modular pieces into your desired configuration. Ensure all modules are placed securely on a level surface.

## Care & Use Tips

- Avoid heavy use before full expansion is complete.
- Slight wrinkles are normal and will smooth out over time.
- Keep sharp objects away from the fabric.

## Need Help?

If you have any questions or concerns, please contact customer support through your retailer. Thank you for choosing our product.
