

Light Assembly Diagram

This product will be shipped in two packages (lamp body package, crystal ball package). If you only receive one package at the same time, please be patient and wait for the other package or contact us.

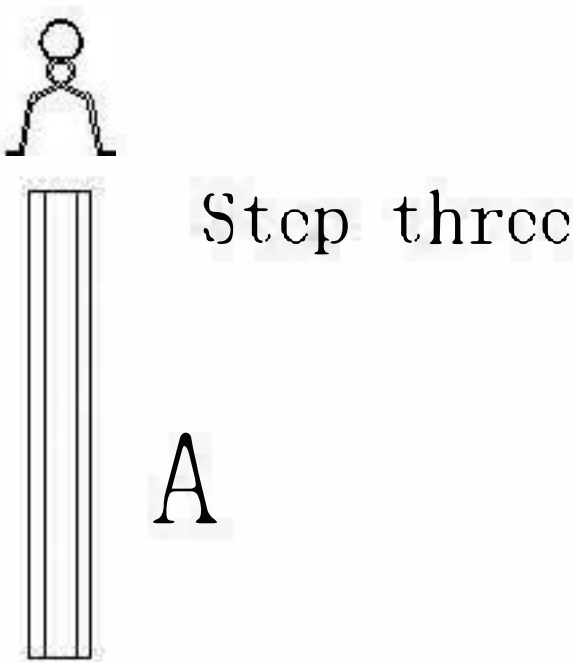

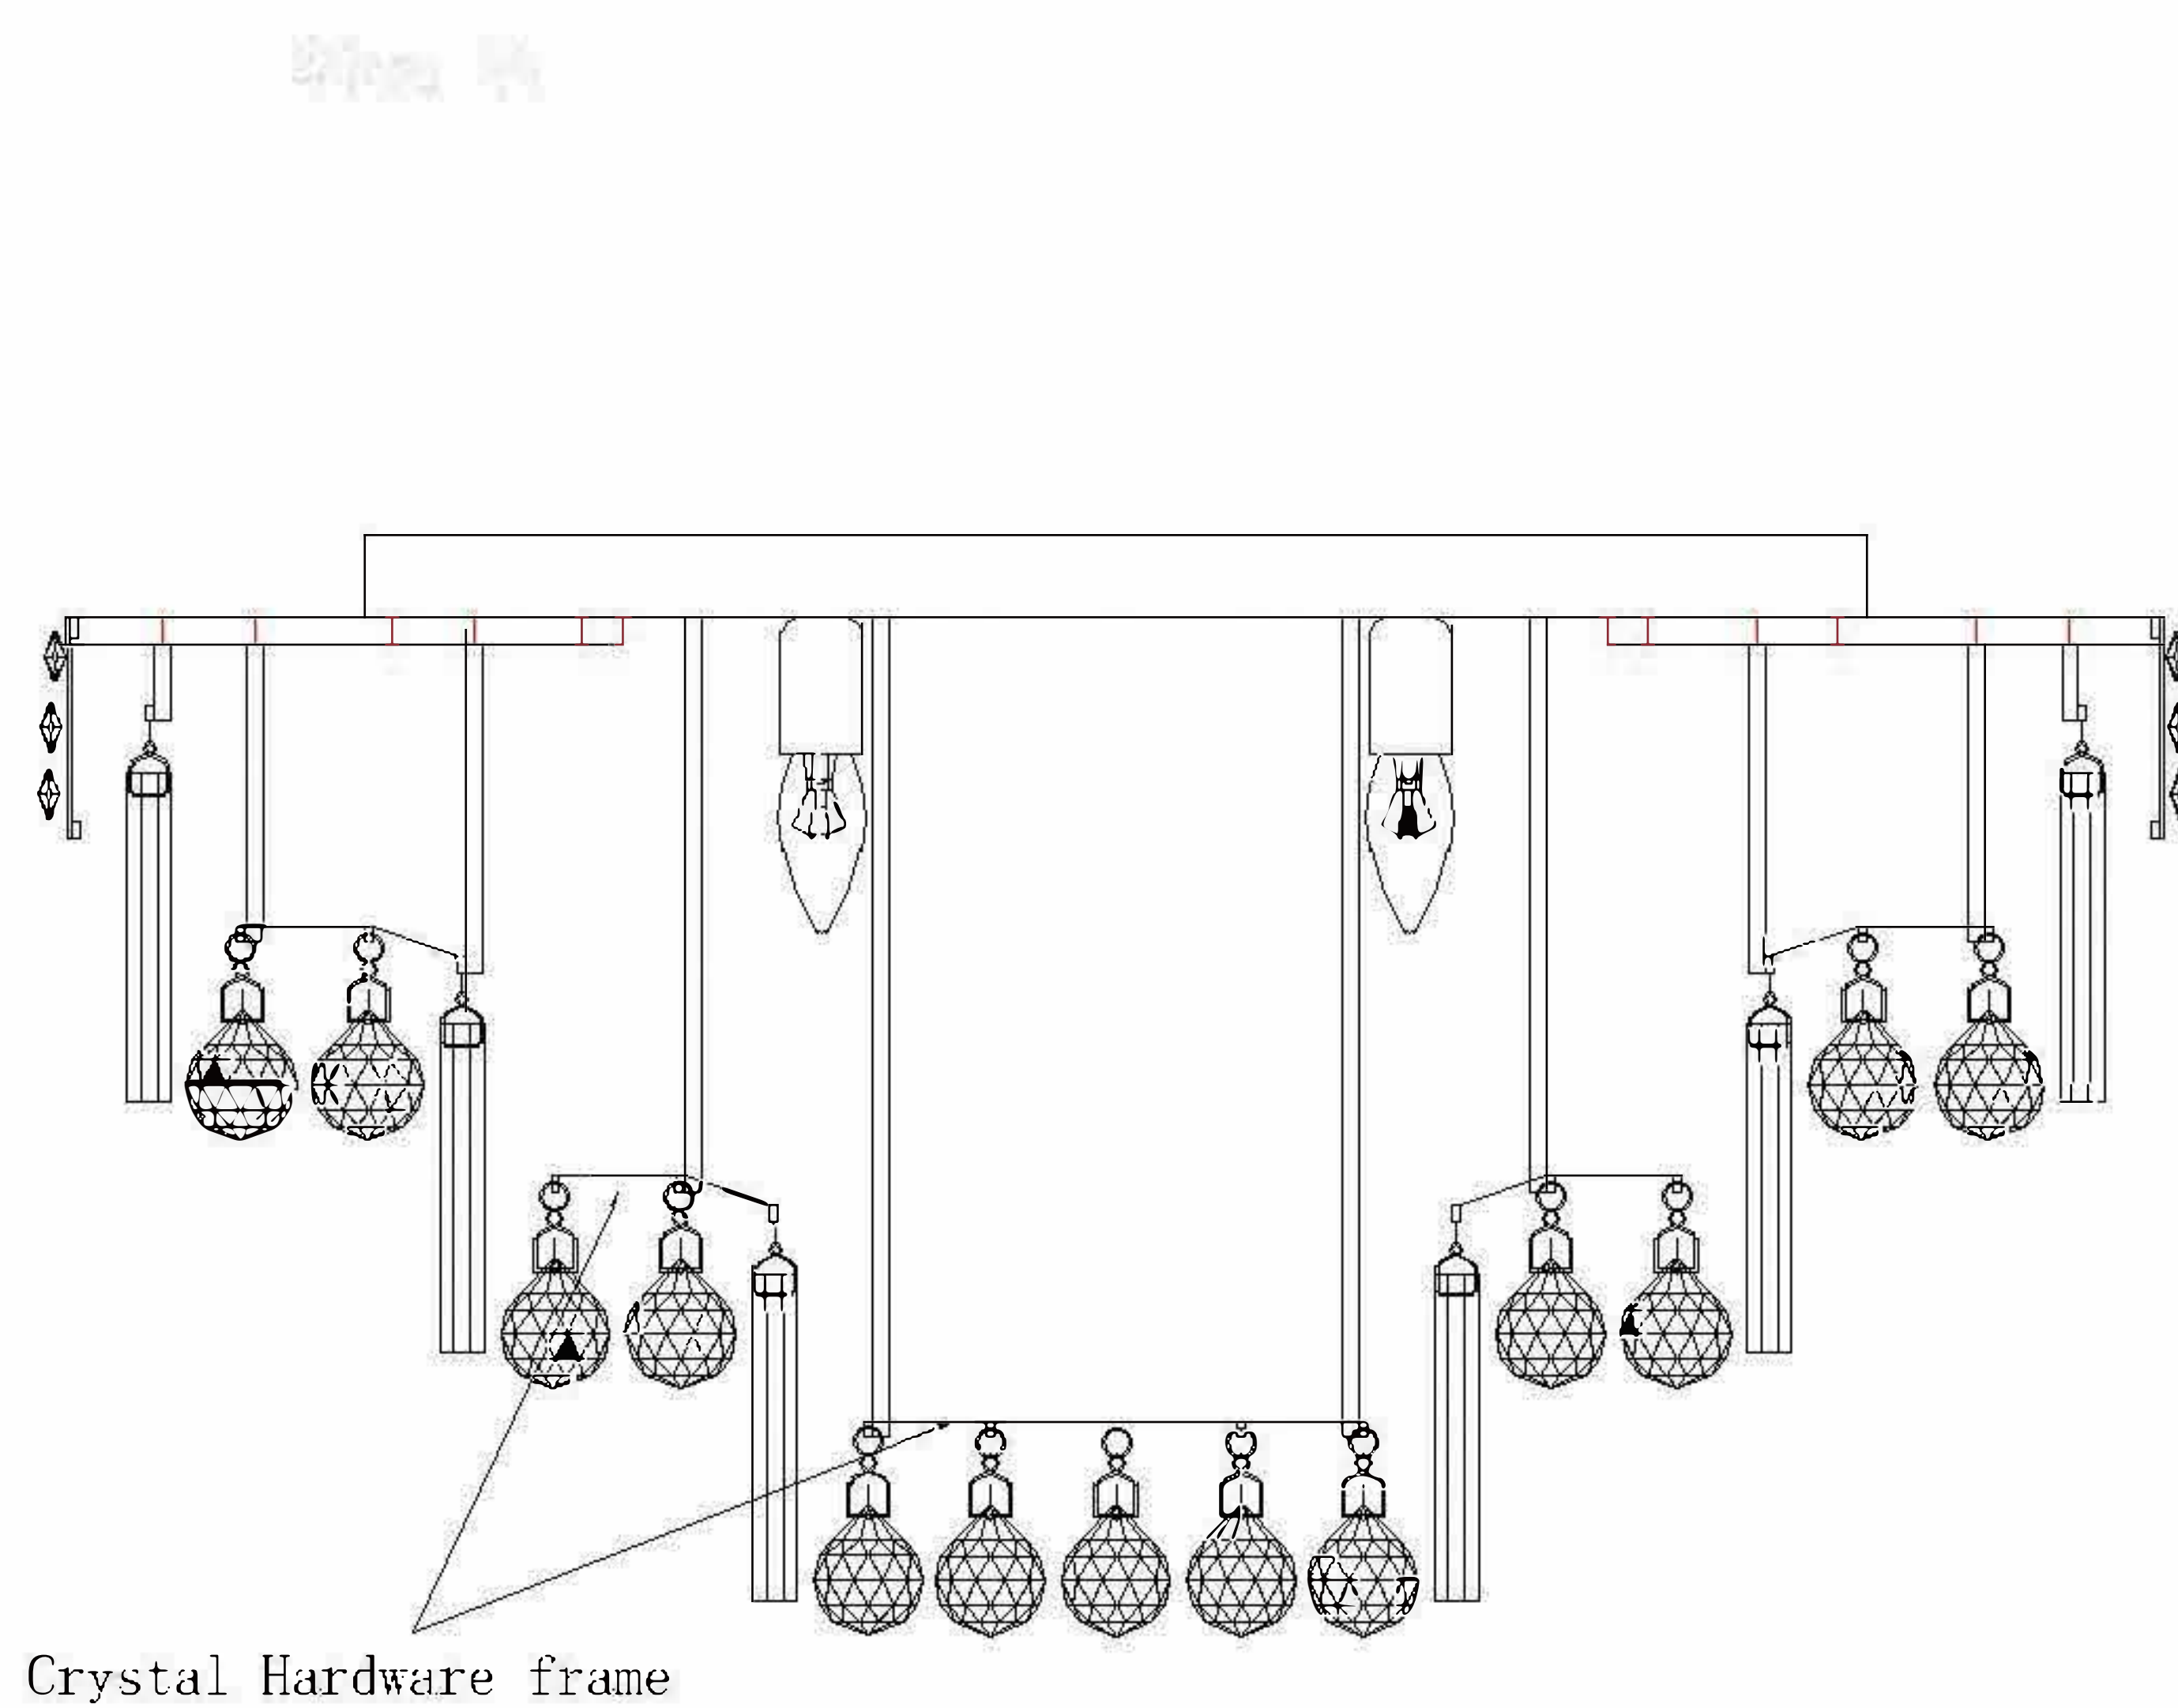

- Step 1: The large shelf is locked with 130 long square branches, one side is locked on the iron tray, the other is locked on the shelf
- Step 2: The large shelf is locked with 210 long square branches, one side is locked on the iron tray, the other is locked on the shelf
- Step 3: The small shelf is locked with 300 long square branches, one side is locked on the iron plate, the other side is locked on the shelf
- Step 4: Turn the light bulb on, and then test the electricity, whether it is all bright, and whether the remote control works properly,

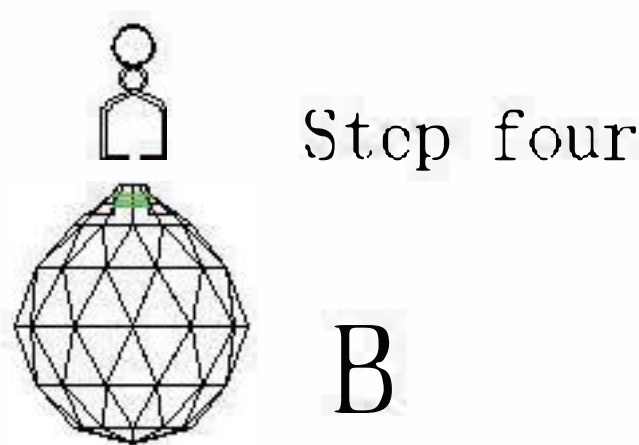

Note that the expansion screw must be close to the hanging plate screw to install

Step 5: First push the hanging plate to the ceiling with expansion screws, and finally lock the chassis to the hanging plate and lock it tightly with the inner teeth.
