Touch Digital Display Three

If you want to heat for a long time, please set the timer to 0 hours. The maximum heating time is 24 hours. When 24 hours is reached, it will automatically shut down. The next time you turn it on, the default setting will be 0 hours (heating for 24 hours).

Smart Life Connection process

Download the APP

This topic describes how to use the latest version of the Smart Life App.
Search for "Smart Life" in Apple Store and other major app stores.

User Accounts

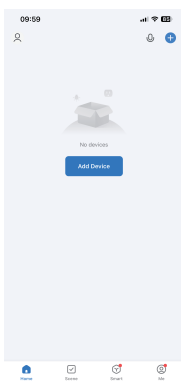

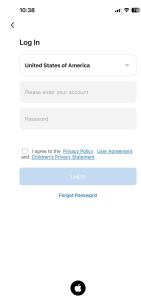

Register an account

1. Tap Sign Up and carefully read and agree on the User Agreement and Privacy Policy to go to the Register page.
2. Register an account with an email address. The State/Region field value follows the mobile phone settings by default and can also be manually changed. However, after the account is registered, this field value cannot be changed. Tap Get Verification Code.
3. Enter the returned verification code to navigate to the password setting page. Set a password as required and tap Done.

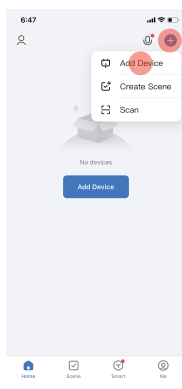

Log in with the app account

1. Open the app. If an account of Smart Life has been registered, tap Log In to go to the login page.
2. The State/Region field value is automatically specified and can also be manually changed.
3. Enter the registered mobile phone number or email address and the password and tap Log In.

Note: For an iPhone, an Apple ID can also be used for login.
