vanity table

INSTALLATION MANUAL

This is the unified installation manual for the T68M (middle size) dressing table, suitable for three versions: simple, basic, and luxury.

Simple version: There is no mirror light, built-in socket or hair dryer stan dfunction, so there is no mirror light power plug (N), built-in socket (H) or hairdryer bracket (I) in the accessories.

Basic version: With mirror light function, no built-in socket or hair dryer stand function. Therefore, there is no built-in socket (H) or hair dryer bracket (I) in the accessories.

Luxury version: With mirror light, built-in socket, and hair dryer stand function, including all illustrated accessories.

Also note that:

1. Screw G is a drawer positioning pin that prevents the drawer from falling off when opened. After installation, please confirm that all positioning screws G have been installed.

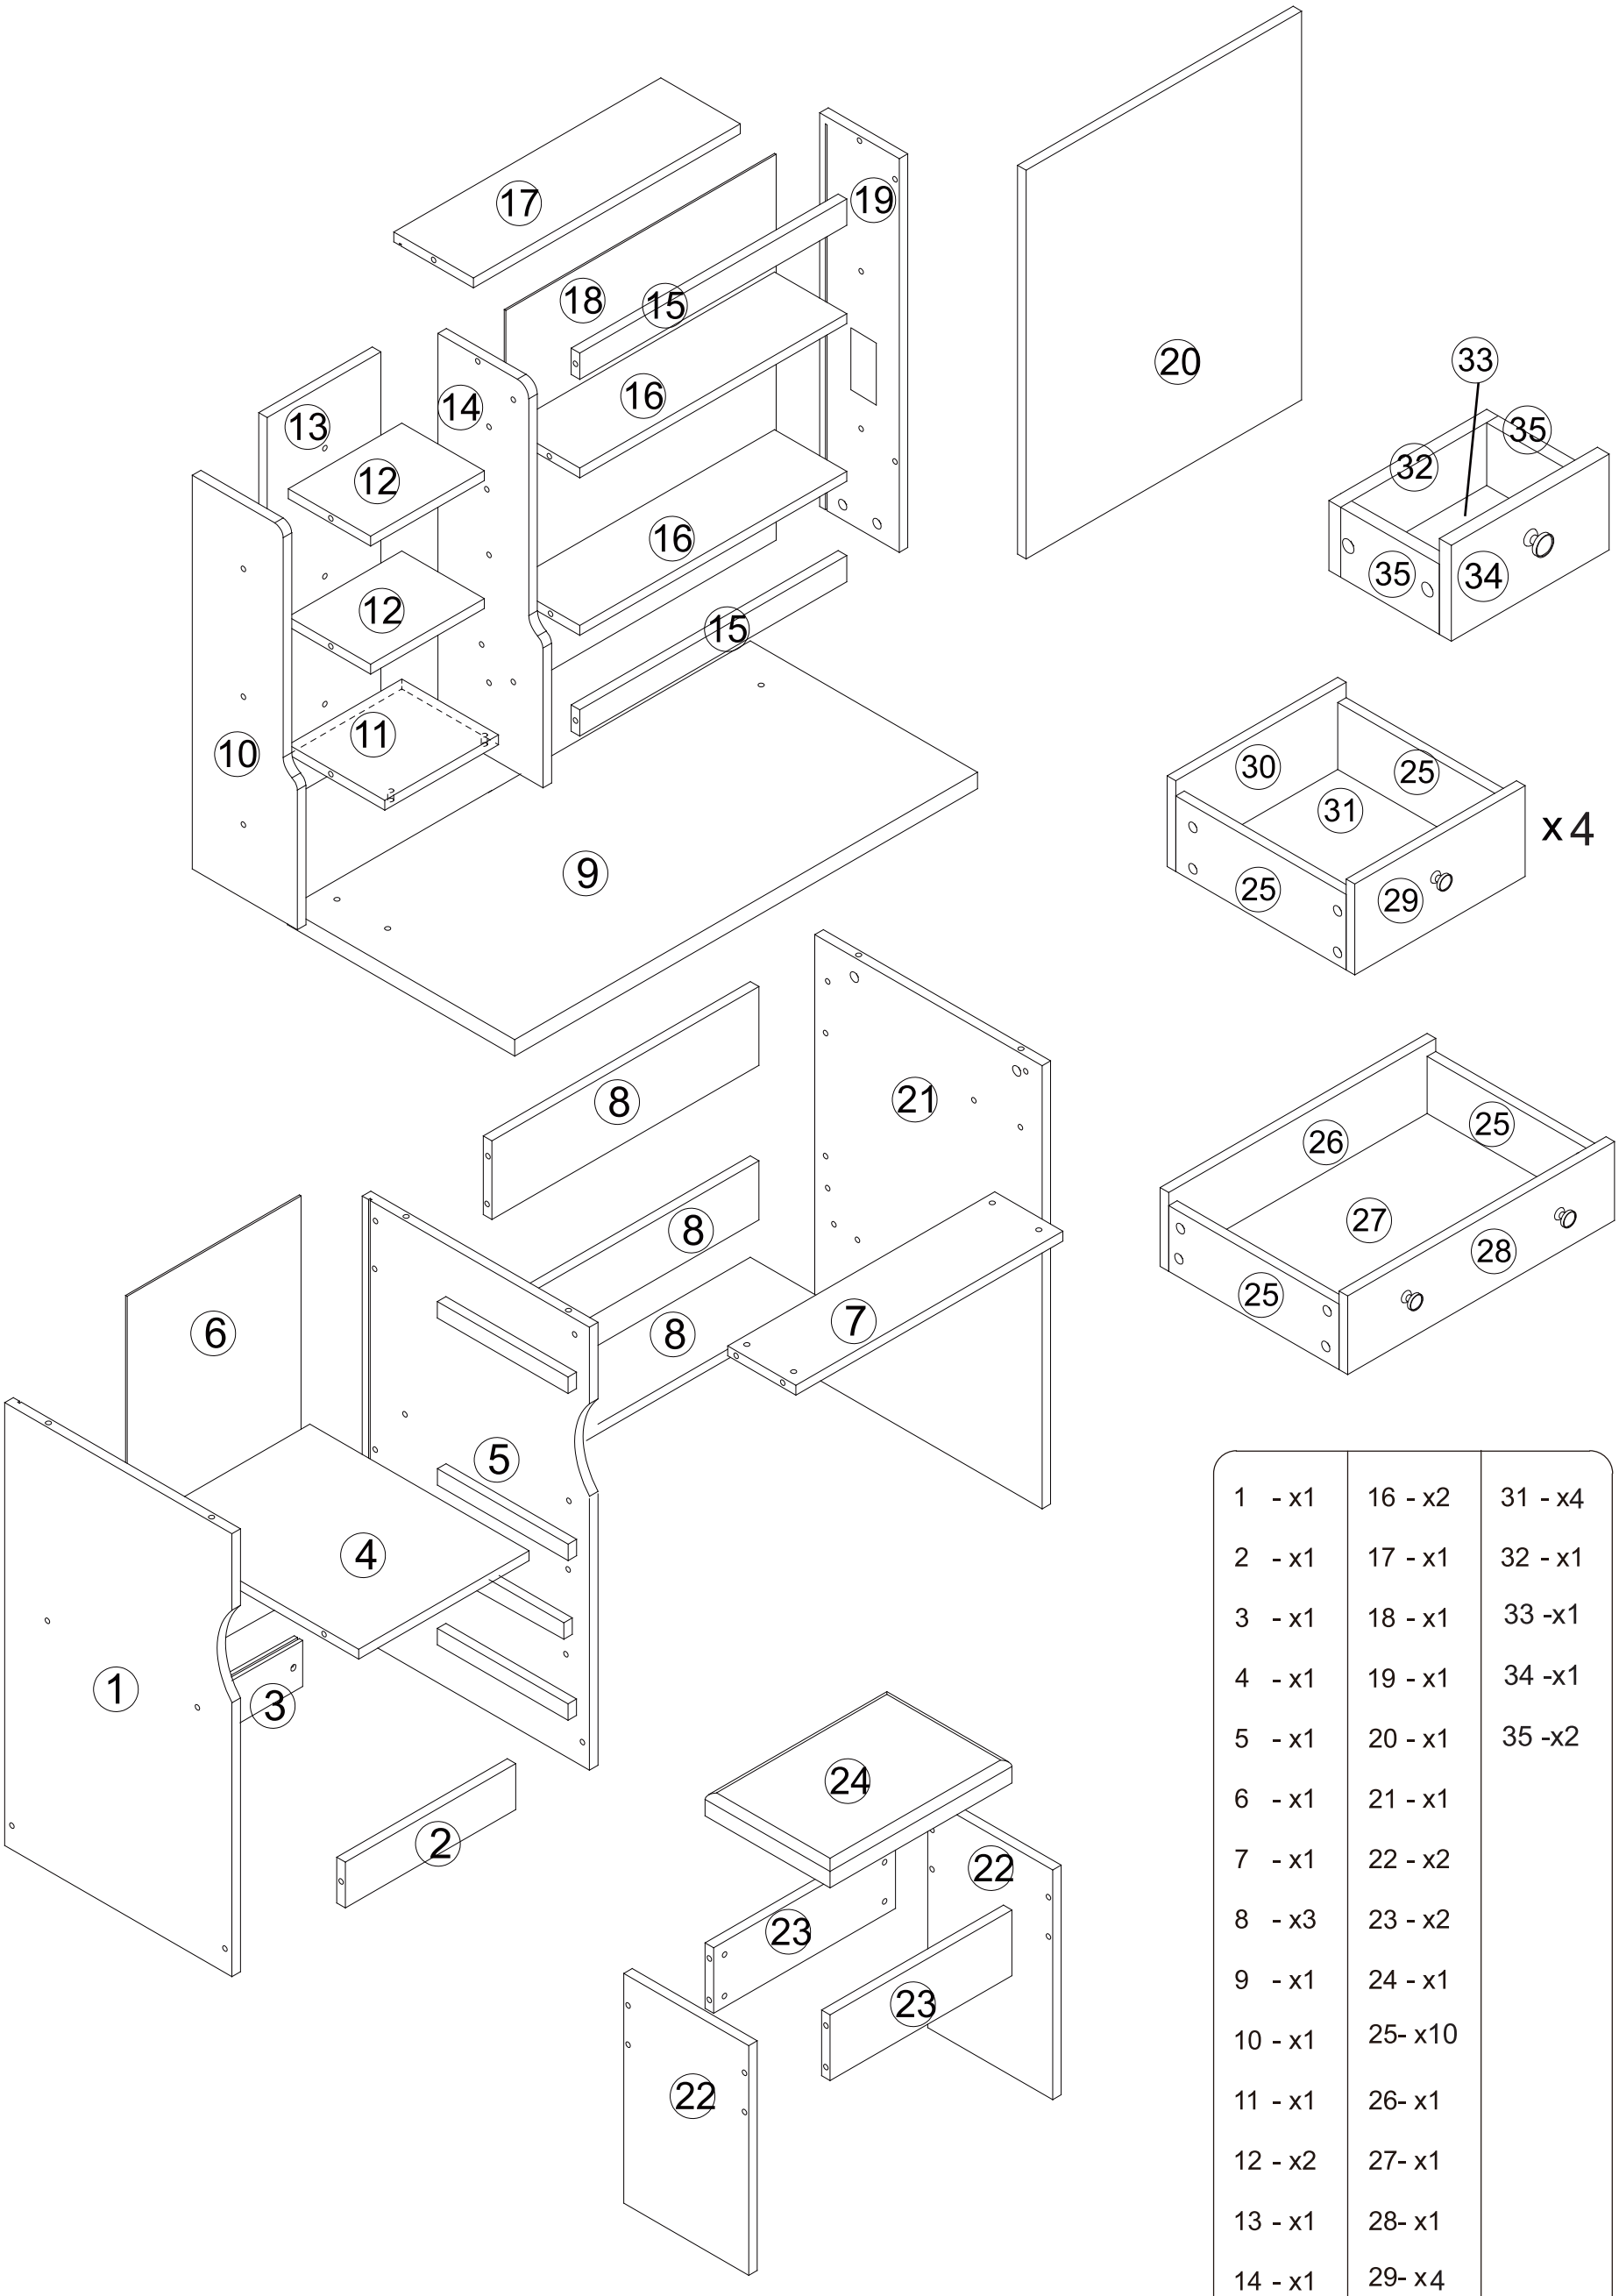

2. For luxury version, part 19 has rectangular hole for installing build-in socket, part 18 has wiring hole, and part 20 has mirror light; For basic version part 19 does not have rectangular hole for installing build-in socket, part 18 does not have wiring hole, but part 20 has mirror light; For simple version, part 19 does not have rectangular hole for installing build-in socket, part 18 does not have wiring hole, and part 20 does not have mirror light.

3. There are marked points where the track needs to be fixed. Please use 12mm screws to secure the track at the marked point.

Step 15

Step 16

For vanity table with light

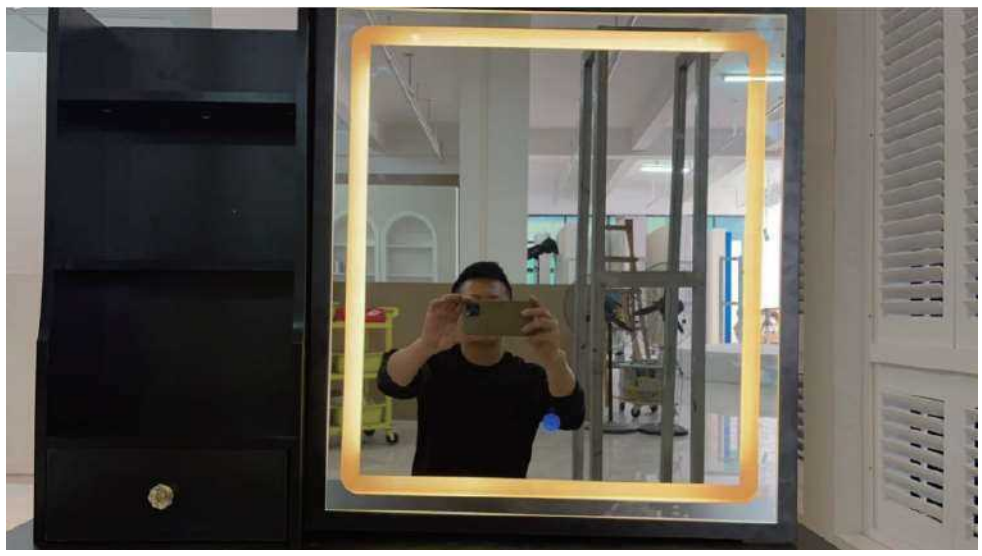

If your vanity table include a LED mirror light, please test the light in this step. Touch the switch botton on the mirror to turn on the mirror light, click the switch botton to change the color of the light, and long press the switch botton to adjust the brightness. If the switch botton is not sensitive, you can check whether the touch switch is tightly attached to the mirror back as shown in the diagram. If it is not tightly attached, please use your fingers to press the touch switch to the designated position and check if the connecting wire is OK.

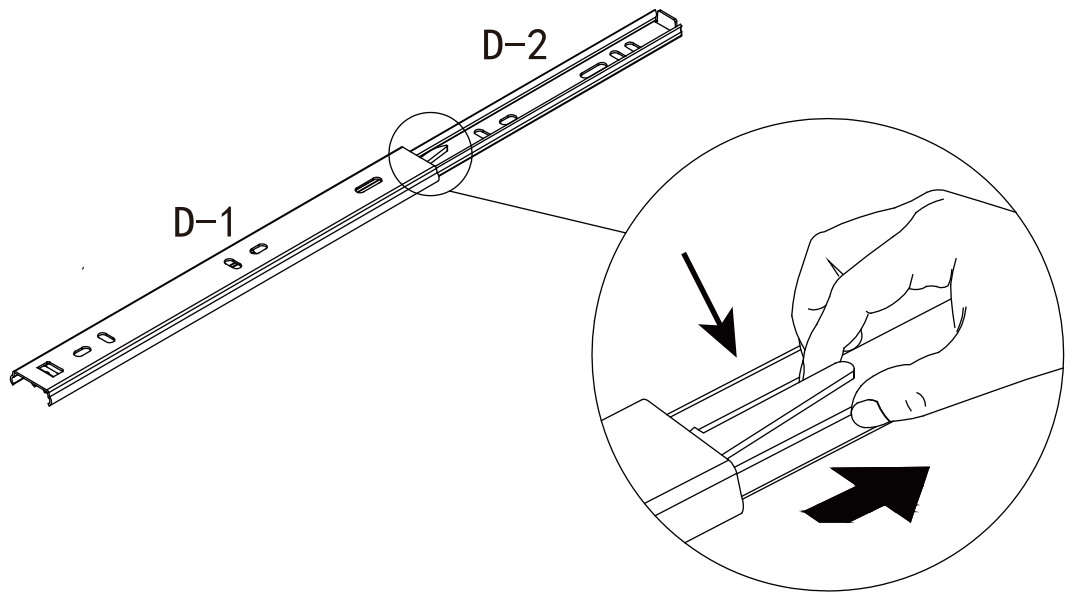

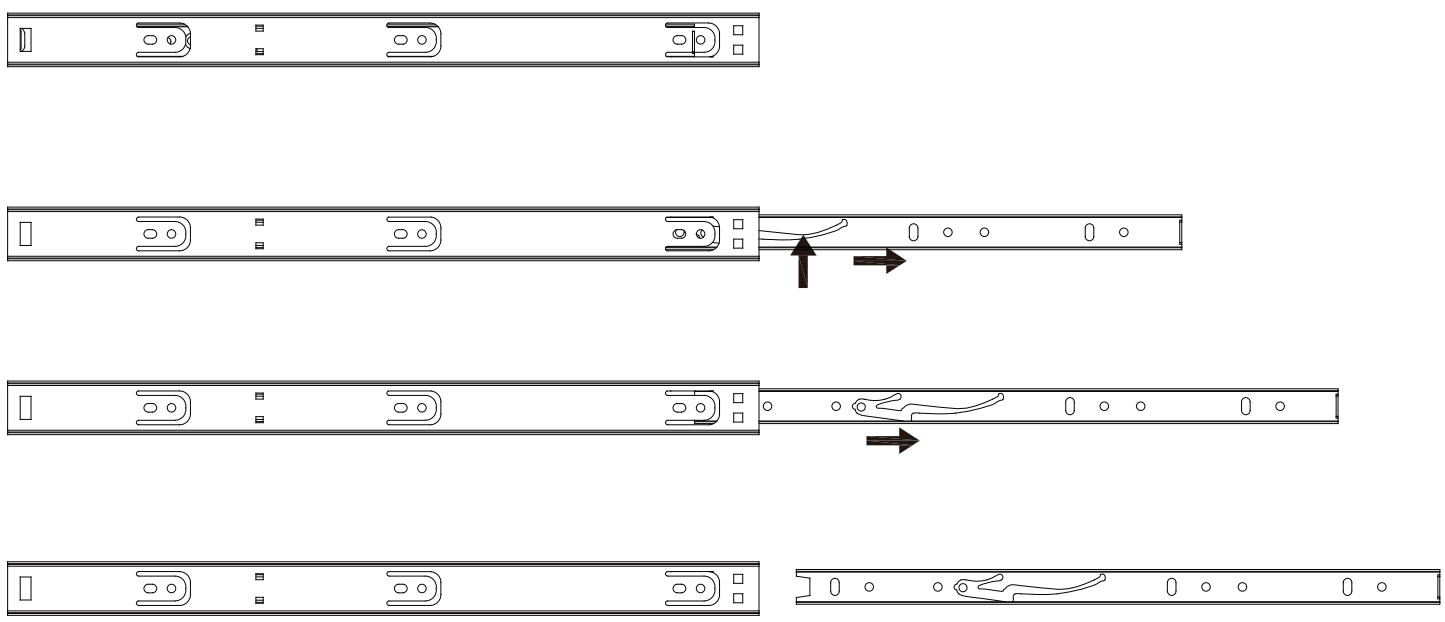

Please connect the light power cord as shown in the diagram, click the touch switch to turn on the mirror light. Please note that due to strict safety standards and heat dissipation requirements, the maximum brightness of the mirror light must be controlled below the safety standards. Therefore, the mirror light is not very bright and is not used for lighting purposes. It is only used to adjust the color of the environ ment. If you think that the light is not bright enough, it is due to safety standards limit ations, not product quality defects.
