

Easy and convenient installation

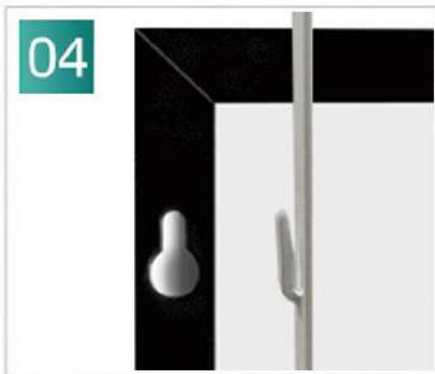

Installation method for hanging doors

01 Measure the gap between the doors to fit a coin

02 Measure the thickness of the door to be less than or equal to 4.8cm

04 Clip the hook into the hanging hole on the back of the mirror

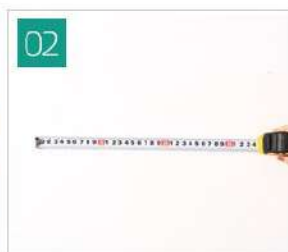

03 Just hang the door

Installation method for wall hanging without punching

01 Measure the distance between two hanging holes (based on the center point of the hanging hole)

02 Make a horizontal line on the wall and mark it according to the measured distance

03 Tear off the isolation paper for the hanging piece, align it with the center point of the hanging piece according to the mark, and paste it until there are no bubbles on the hanging piece

04 Stick adhesive on the lower half of the back of the mirror

05 Align the hanging hole and hang it on the wall

05 Simple operation without damaging the wall
