CARE GUIDE

Following this fabric care guide will help to prolong the lifespan of your furniture, and maintain their performance, comfort, and appearance.

- Clean the slipcovers once a week with a soft brush or vacuum cleaner, as accumulated dirt will accelerate wear and dull the color of the fabric.
- After spot cleaning, use a dry cloth to remove excess moisture from the fabric. Allow the upholstery to dry completely before use.
- Do not expose the fabric to direct sunlight. With extended exposure, ultraviolet rays can create hairline cracks in leather or cause fading or discoloration of fabric.
- If a snag occurs in your fabric, trim it using scissors. Do not attempt to pull it out, as this could damage the surrounding fibers.
- Spillage on fabrics may result in discoloration. Any spillage should be wiped with a dry cloth immediately. Do not use bleach (including oxygen-based or commercially advertised as color protection bleach) on the fabric unless advised by our CX agents.
- Ensure no sharp objects (or claws) come into contact with the slipcovers to the best of your ability as this may cause snags or tears in the fabric.

Natural Fabrics Care Guide:

This applies to Brushed Cotton, Cotton Canvas, Everyday Linen, Pure Linen.

All natural fabrics will soften over time after a few washes. It is also normal to see some pilling in the first few weeks of use for natural fabric. This pilling will stop once the loose fibers in between the thread are gone.
