TIPS:

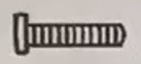

1, In order to facilitate the assembly, the screw holes related to the product structure have an adjustable range.
2, When assembling, please align the screws on the armrest and the beam and install them to 50% first.
3, After all the screws are installed, then tighten them all to 100%.
(The screws connecting the seat and the backrest can be directly screwed to 100%)

You can also watch the installation video on the product page.
If you have any questions, please contact us on amazon, we will give a solution within 24 hours
