

ASSEMBLY INSTRUCTION

FLOATING WALL SHELF

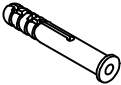

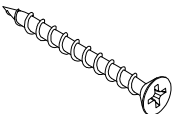

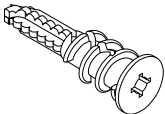

Packing list

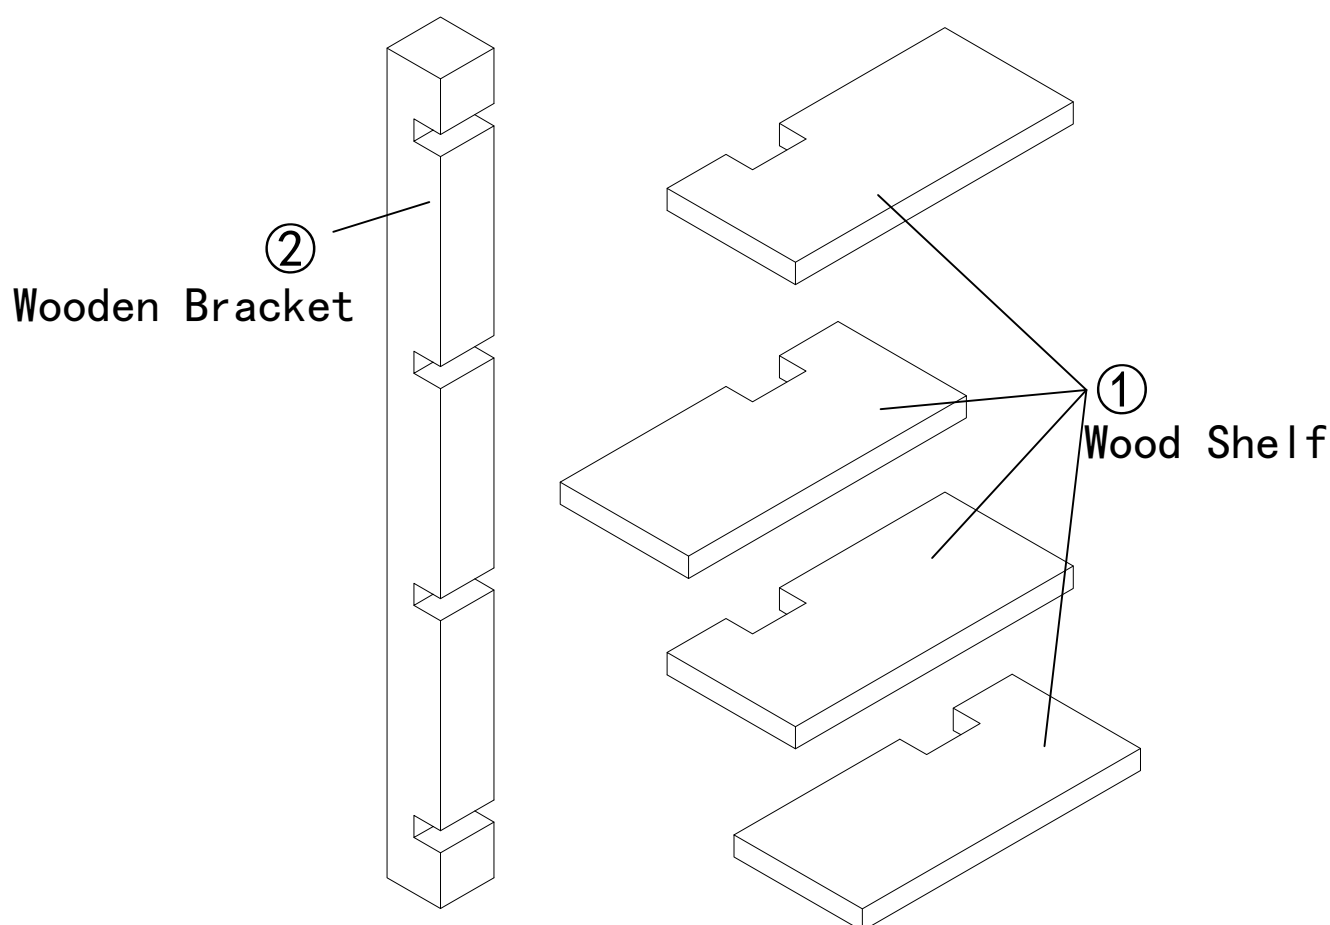

Please check the contents to make sure you have received all components and accessories before installing.

Before you start:

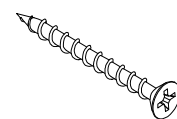

For solid walls (brick or concrete), use part A.

For lightweight walls (plasterboard or hollow), use part C.

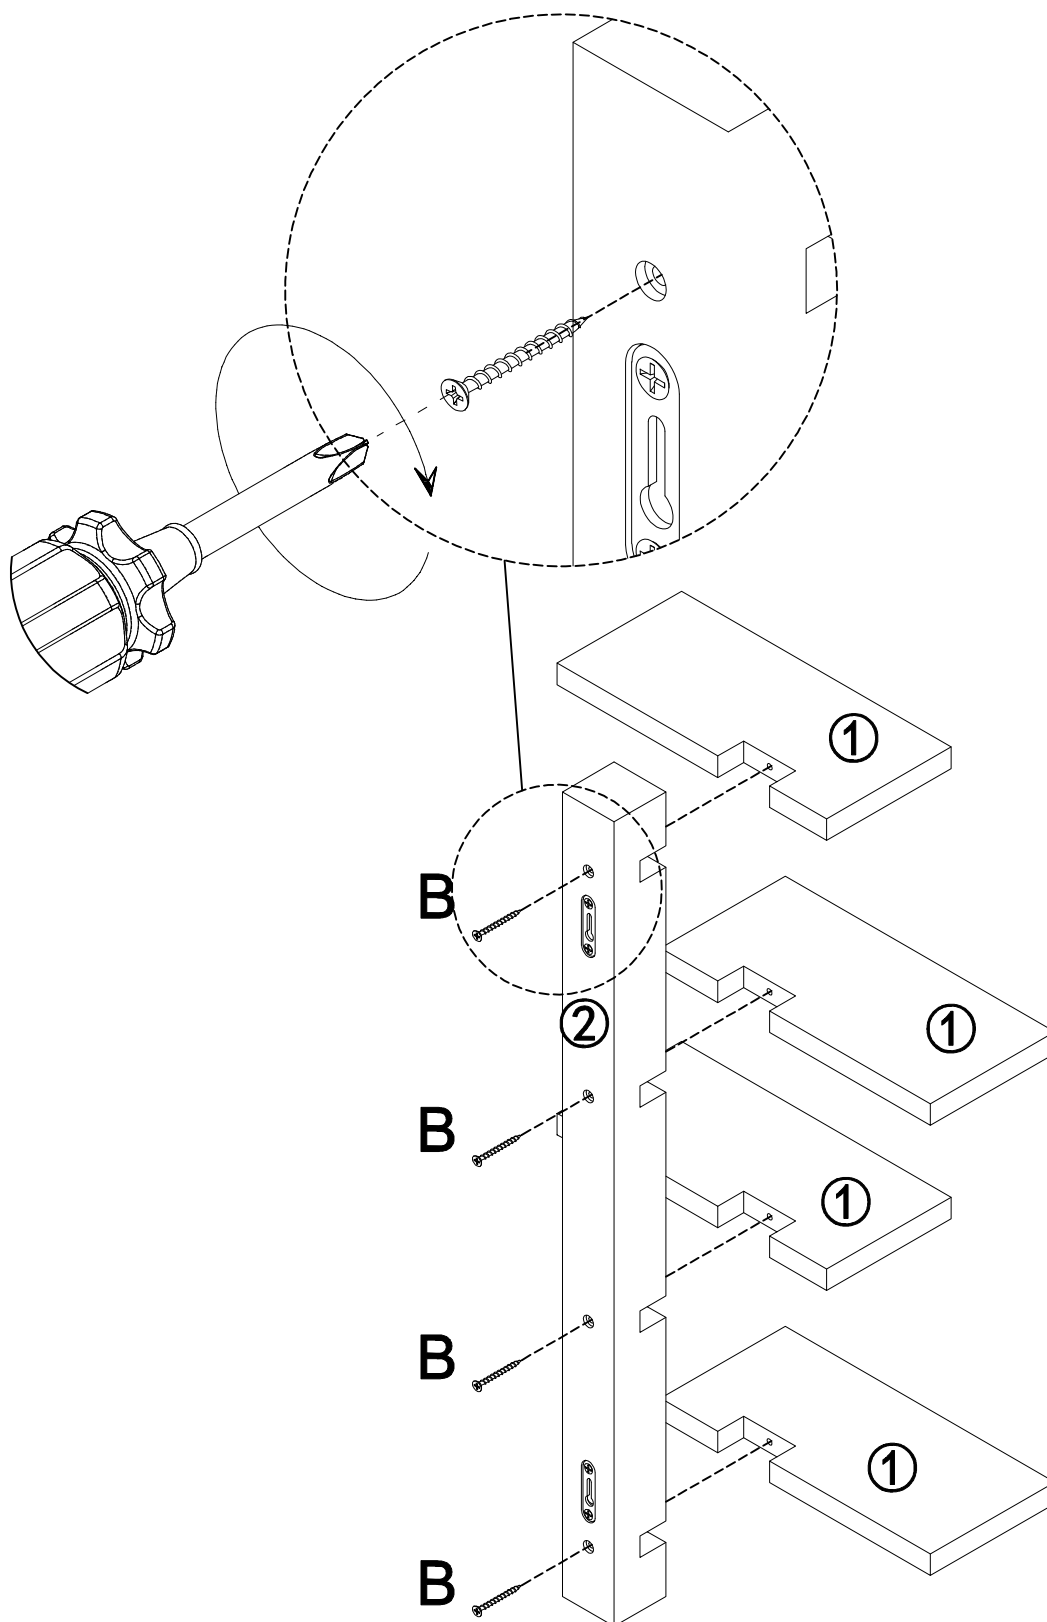

A×2	B×6	C×2
		
6x40mm	4x40mm	M14x40

B×4

4x40mm

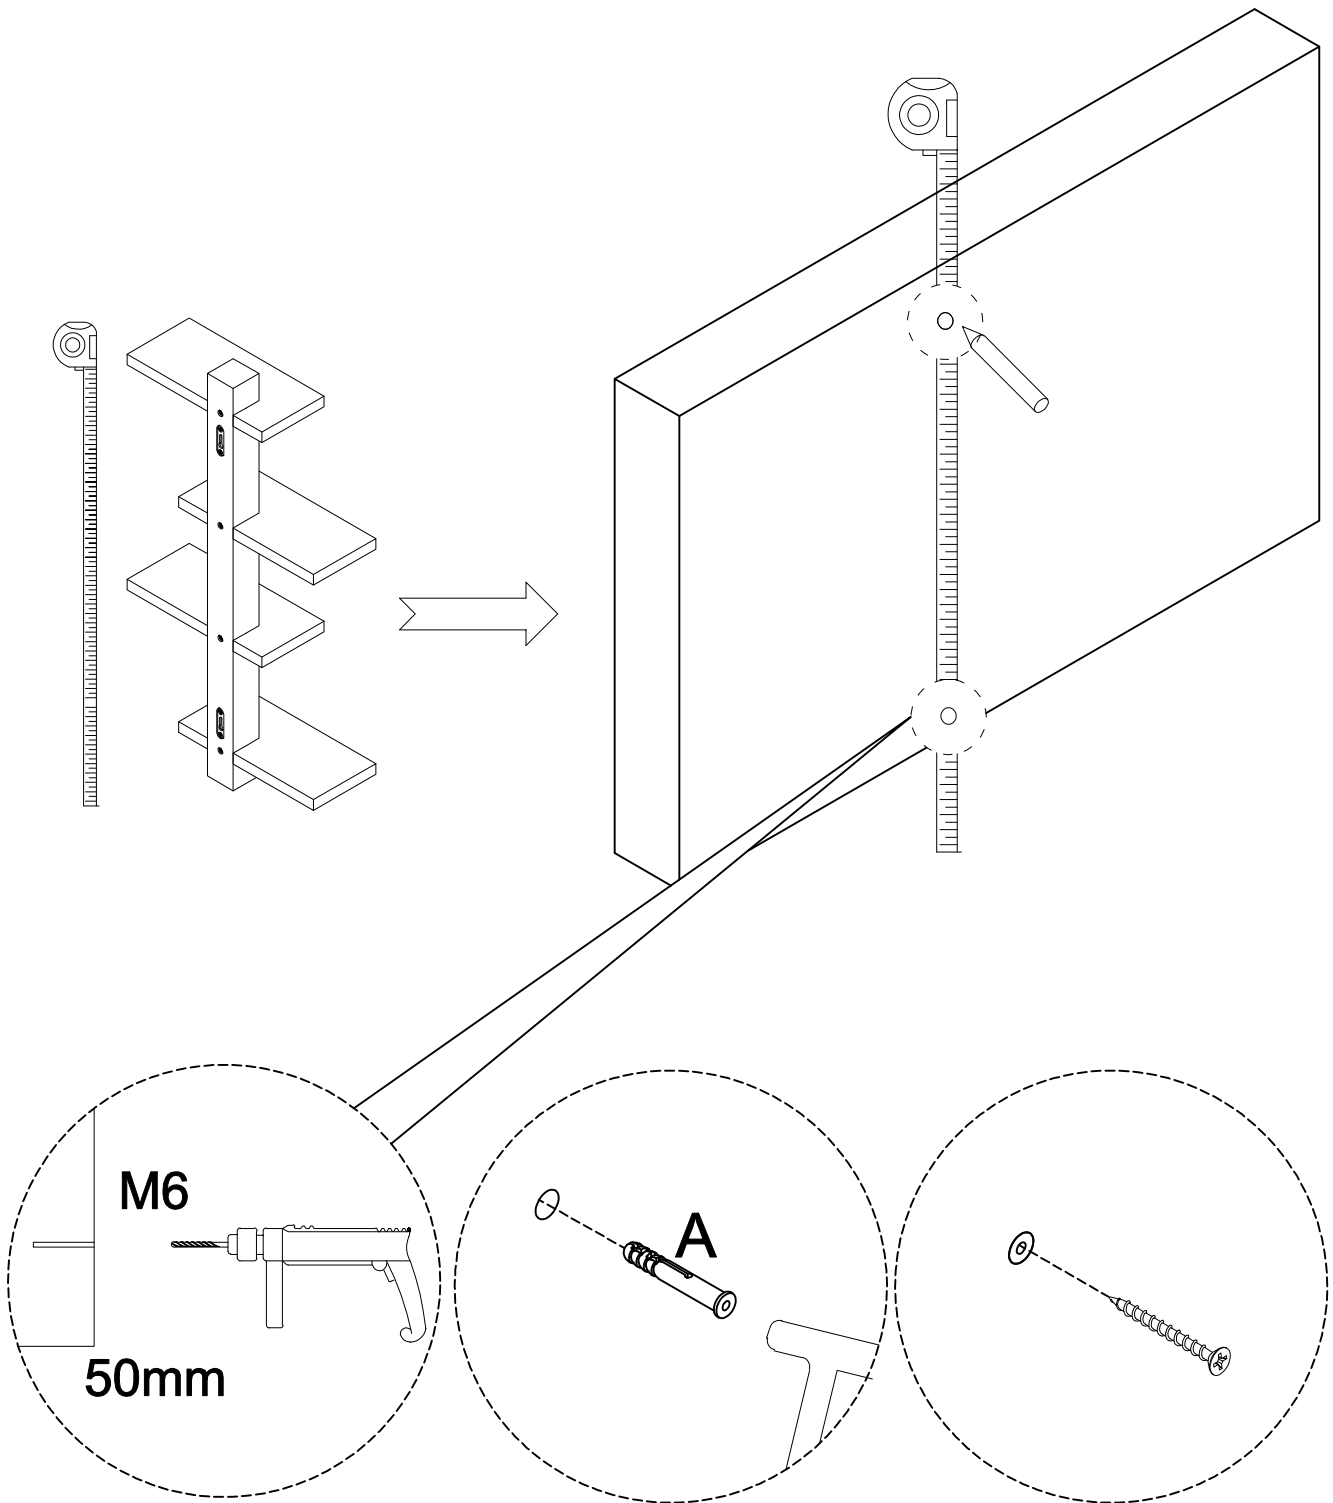

Step 1.

Fasten Part ① to Part ② using self-tapping screws B.

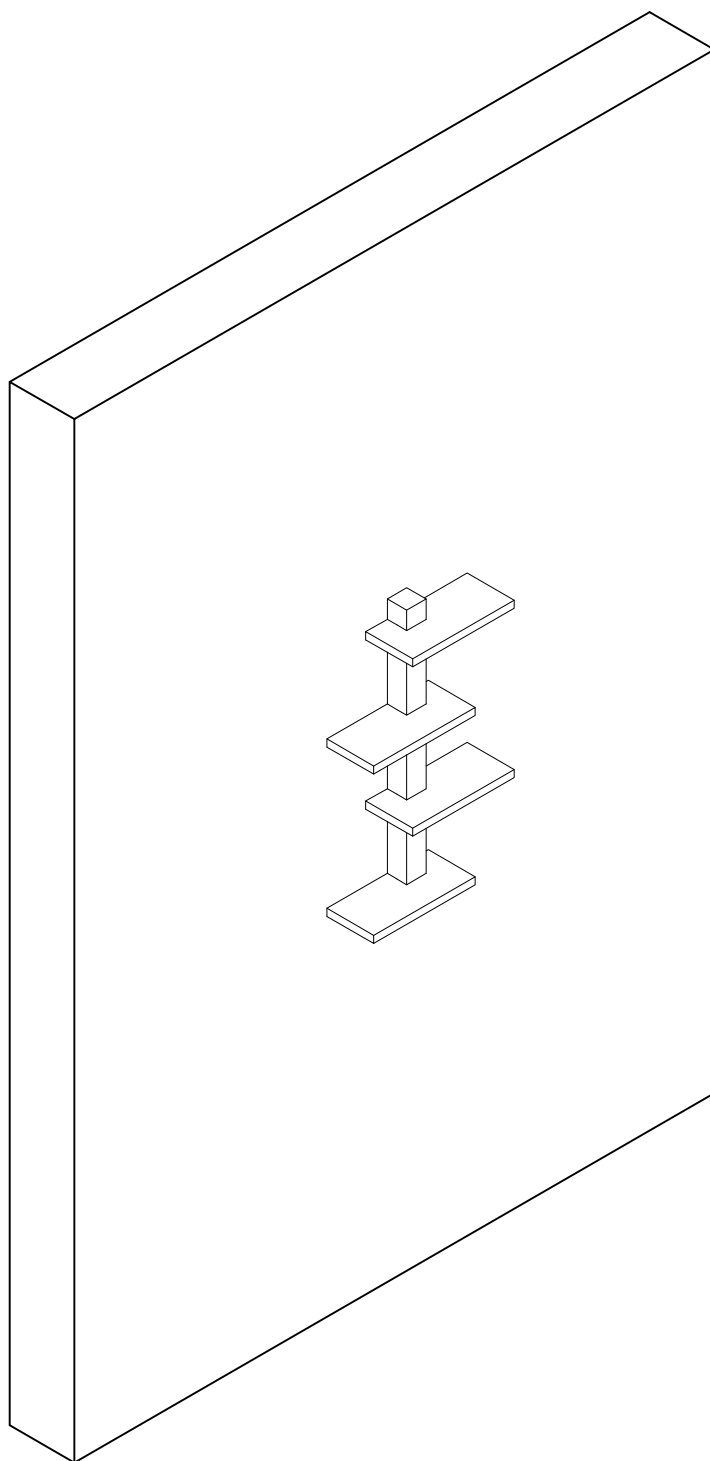

NOTE:

1. All 4 holes need to be installed before proceeding to the next step.

Step 2.

Measure Part ② with a measuring tool first. Mark vertical mounting positions on the wall with a measuring tool and ensure vertical alignment. Drill holes at the marked spots with an electric drill, and tap expansion anchors A all the way into the holes with a hammer.

Step 3.
Hang the assembled shelf unit directly onto the wall.
