TIPS & PREP

Your new ottoman comes with an easy tool-free assembly that you can do at home using the provided instructions. But before we dive in, here are some key tips and prep steps to make the assembly process as smooth as possible.

Get a buddy or family member

Even though the assembly is completely tool-free, it involves lifting and aligning various parts. To make assembly easier, we suggest having at least two people there throughout the process.

Left or right matters!

Throughout assembly, we'll mention the Left and Right Arm Panels and movements to the left and right. We'll be using "left" and "right" based on the perspective of standing in front of your ottoman.

Don't overlook the glossary!

We've included a glossary with these instructions to help you identify every part and piece of hardware. If you run into any issues, consult the glossary to ensure you're using the right components.

Unbox and check your hardware

The hardware pack for your ottoman is in the seat base. Open it up, lay out each piece, and double-check with the checklist to make sure you have everything you need. If anything's missing, reach out to customer service before moving forward.

Have your scissors handy!

Make sure you have scissors nearby. The cushions and seat pads are in compression bags. Carefully open them to prevent any damage or injury while unpacking.

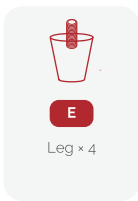

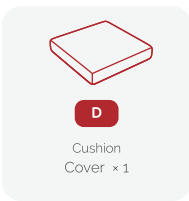

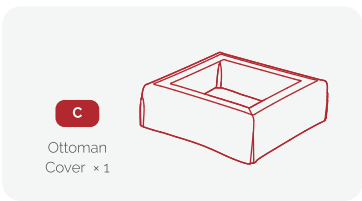

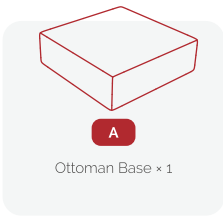

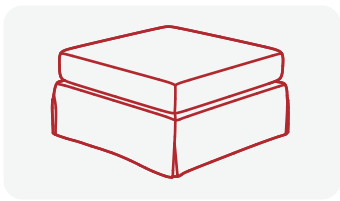

Clear the space!

We recommend putting your ottoman together in a roomy, clutter-free area, away from pets and little ones. Lay down a sheet to keep the armchair components clean and free of debris during assembly.
