

ASSEMBLY AND INSTALLATION INSTRUCTIONS

WARNING: TO AVOID RISK OF ELECTRICAL SHOCK, BE SURE TO SHUT OFF POWER BEFORE INSTALLING OR SERVICING THIS FIXTURE.

Installation Steps:

1. Adjust the height of the center canopy by pressing down on the metal tab to achieve the desired positioning.
2. Press down on the metal tab to adjust each power wire to the desired length for your setup.
3. Use the provided mounting screws to fasten the mounting bracket onto the electrical junction box.
4. Connect the Wiring:
 - Connect the live wire (L) from the main wire to the positive power supply wire (+) using a wire connector.
 - Similarly, connect the neutral wire (N) from the main wire to the negative power supply wire (-) using a wire connector.
 - * Ensure that bare wires are not exposed to prevent electric leakage.
 - Connect the bare copper wire to the ground wire.
- 5-6. Attach the fixture to the mounting bracket, and secure it tightly using the set screws.
7. Organize and arrange the wires neatly before installing the bulbs. (Bulbs are not included with this fixture.)
8. Attach the glass shades carefully.

▲ Important Notes:

1. Install the glass shade at the center position first before attaching the others.
2. Handle glass shades with care - they are fragile and may break if mishandled.
3. The center canopy is **adjustable** - varying the height can create different aesthetic effects with different glass shade arrangements.
4. Organize the wires properly before installing the glass shades to ensure a neat and secure setup.

Adjusting the Wire Length

Press and hold the metal tab before adjusting the wire length.

1. Each ceiling canopy has a protruding metal tab - press and hold it before pulling the wire to adjust the length.
2. The center canopy also has a wire adjustment point - press and hold the metal tab before pulling the central wire to the desired length.

Safety Instructions:

To avoid fire, shock, and serious personal injury, follow all instructions carefully.

1. Do not install or use the light fixture if any part is missing or damaged.
2. To avoid possible electrical shock be sure electricity is turned off at the main fuse or circuit breaker box before wiring.
3. Make certain no bare wires are exposed outside the wire connectors.
4. All wiring must conform to national and local electrical codes.
5. Follow the recommended instructions for the proper method of wiring your new light fixture. If you feel you do not have enough electrical wiring knowledge or experience, have your light fixture installed by a licensed electrician. Any electrical work not described in this manual should be performed by a licensed electrician.
