

Anchoring System Installation

**Know what's below.
Call before you dig.**

1

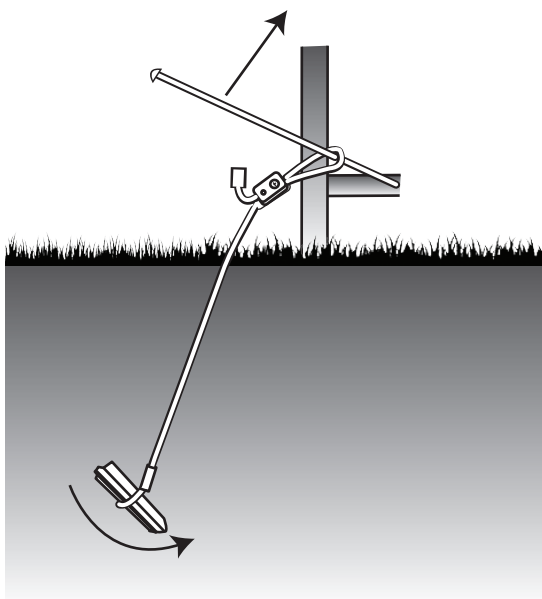

1. Drive Anchor into ground at a slight angle away from the kennel, using the included drive rod and a hammer or mallet.

2. Remove drive rod from the ground, run it through the loop on the end of the anchor cord, and use it to pull up on the cable to set the anchor.

3. Secure the anchor cord snugly to the kennel frame and tighten screws to lock it in place.
