- ☒ Tape Measure
- ☒ Silicone Glue

- ☒ Pencil
- ☒ Utility Knife

Options

BABELIA

ETHEREAL

SAHARA

SILVERSPARK

VIVIDIA

SHALESTONE

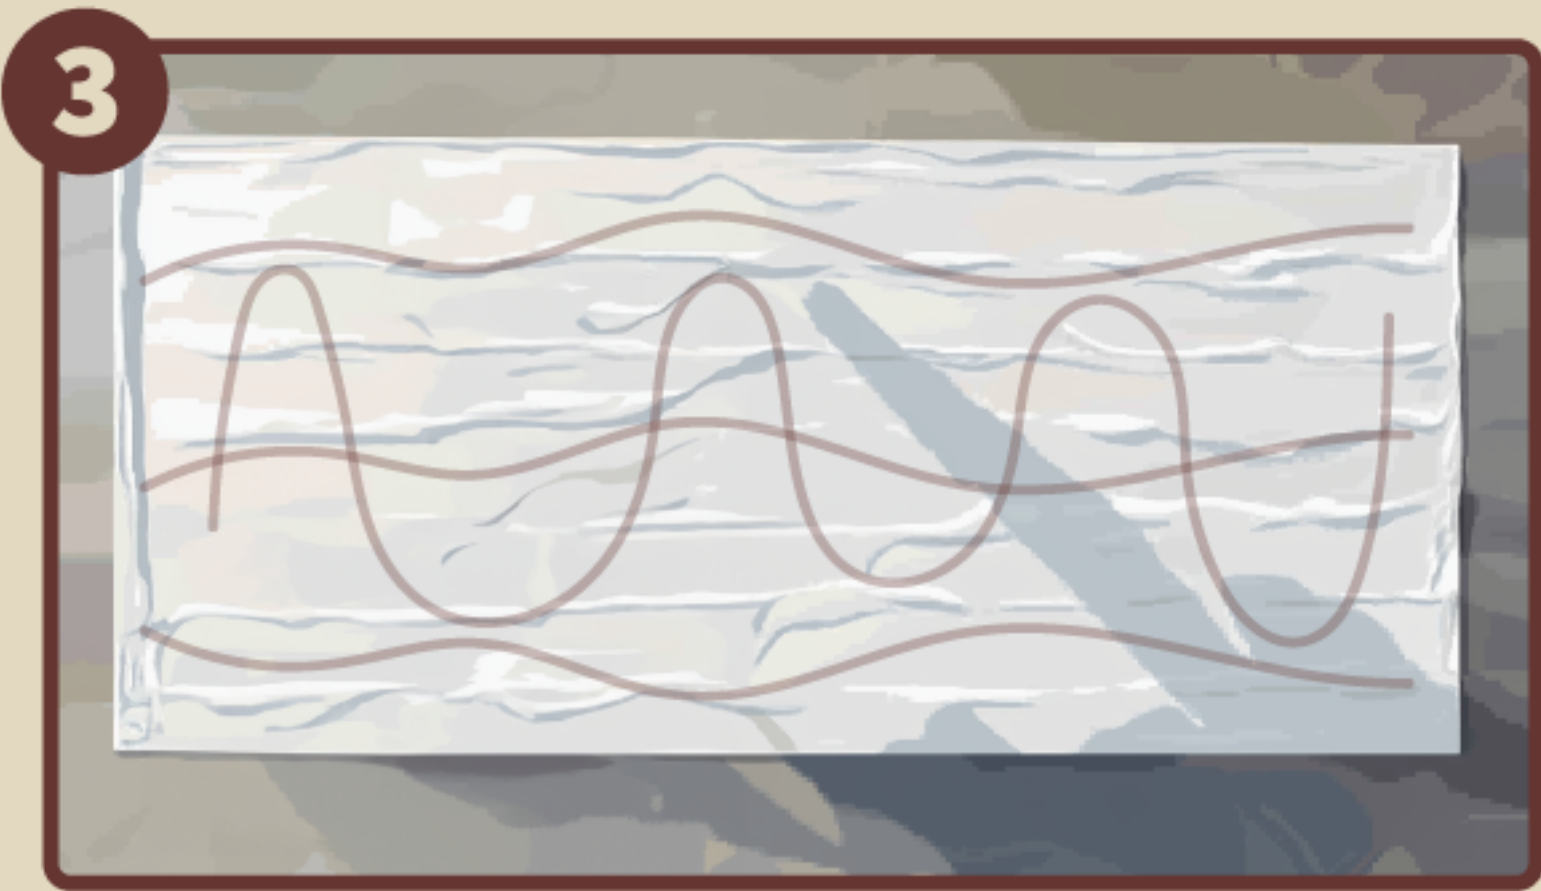

GRANITE

Prepare and measure your wall
Make sure your wall is clean, dry and dust free. Then measure your wall.

How many panels do you need?
Each Panel: 20" X 40". Each panel covers approximately 5.38 sq. ft. One box contains 9 panels and covers 48.42 sq. ft. The area of a 12 feet wide and 8 feet tall wall is 96 sq. ft., which can be covered by 2 boxes.

Glue the Panels
Apply the silicone adhesive on the back of the panel as shown in the image the stick the panel to your wall. You can start the installation process from the lower right or upper left corner of your wall. For a more dynamic view, you can use a panel that you previously cut out in the next sequence.
