

INSTRUCTIONS

Finish lamp installations according to below instructions

1. Connect the power cord and install E26 bulb.
2. Install the explosion-proof screw to the corresponding position of the column.
3. Fix the lamp with explosion-proof screw
4. The use of the switch: the left switch is white light, the switch is warm to the right, and it is off when the switch is in the middle.

Note:

1. remove the bulb screw, take out the foam pad, and tighten the lampshade backwards.
2. Take out the screw with the hexagon wrench to separate the base.
3. When the switch is on, it will not be on during the day. When the inductive switch senses the light, it will turn off. Only when the switch is turned on at night or when the light is dark, the light will be on
4. The solar panel is charged only when the switch is on, and stops when the switch is off.
5. Before use, please turn on the switch to charge by sunlight to ensure that the battery can be used normally.

Switch

WIRE CONNECTION DIAGRAM
