

Notes

1. Bamboo frames are spliced together and will inevitably have wood knots and spliced textures. Please make sure that you do not mind before ordering.
2. This item does not include fish. Fighting fish cannot live in groups, they will fight and only one should be kept in a container.
3. When keeping fish, please keep the water level at 1 inch from the mouth of the bottle so that they have enough space to breathe from the water's surface.
4. We recommend waiting until you receive the product and install it, add water, and keep it for about 3 days before buying the fish. Please pass the fish through the water before placing them in the bathtub.
5. Lights can be turned on for a short time when viewing and feeding fish. It is recommended to turn on 8 hours to replenish the light to the aquatic plants usually about every 3-5 days. Please avoid long-time sunlight as too long a time is easy to breed algae.
6. Please allow the slight color difference caused by the shooting light and 1-3 cm error due to manual measurement, and make sure you do not mind before ordering.
