8	TR08	Allen wrench	1

 TR01	 TR02	 TR03
 TR04	 TR05	 TR06
 TR07	 TR08	

Notes & Warnings

- This trampoline must be installed on a relatively flat floor.
- The trampoline foot tube is threaded, so the threaded tube needs to be rotated strongly during installation. Please make sure not to hurt your fingers or arms during installation.
- The elastic rope is relatively strong in the initial use and then will become relatively soft after a period of use. Please avoid hurting your hands or arms during installation.
- Trampoline handrails are only used to help users to maintain their body balance. Do not lie down or press yourself on the armrest.
- The trampoline has an overall load of 110LB.

- Please move the trampoline to a place near a wall or a large space. Do not place it in a crowded place to avoid injury during use.
- Younger children need parental guidance and supervision during use.
- During use of the trampoline, please do not step on the main frame with your feet to avoid the trampoline turning over.

- Regularly check the wear of the elastic rope, if it is worn, please replace it in time.
- When using this product, please make sure that the safety pin is installed on the trampoline.

Installation Notes

1.Take out the main body of the trampoline (as shown in the picture), and lay it flat on the ground to support both sides.

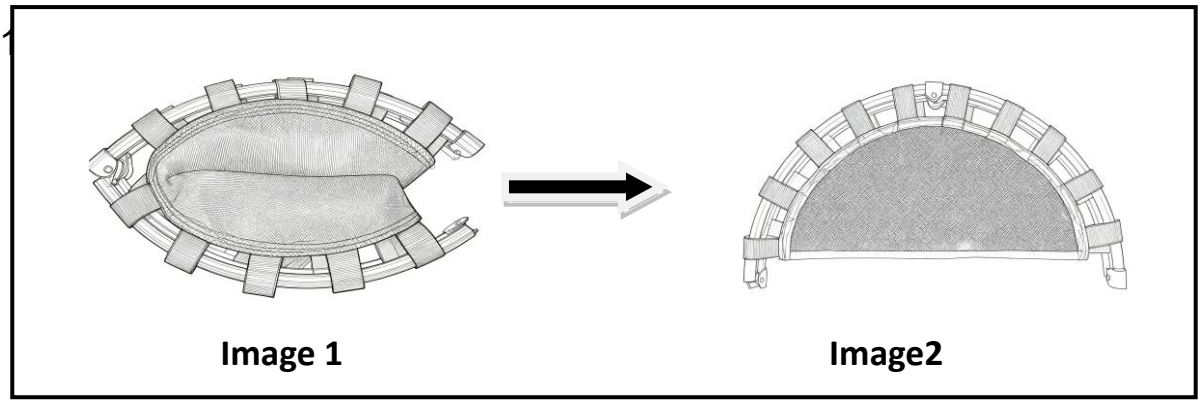

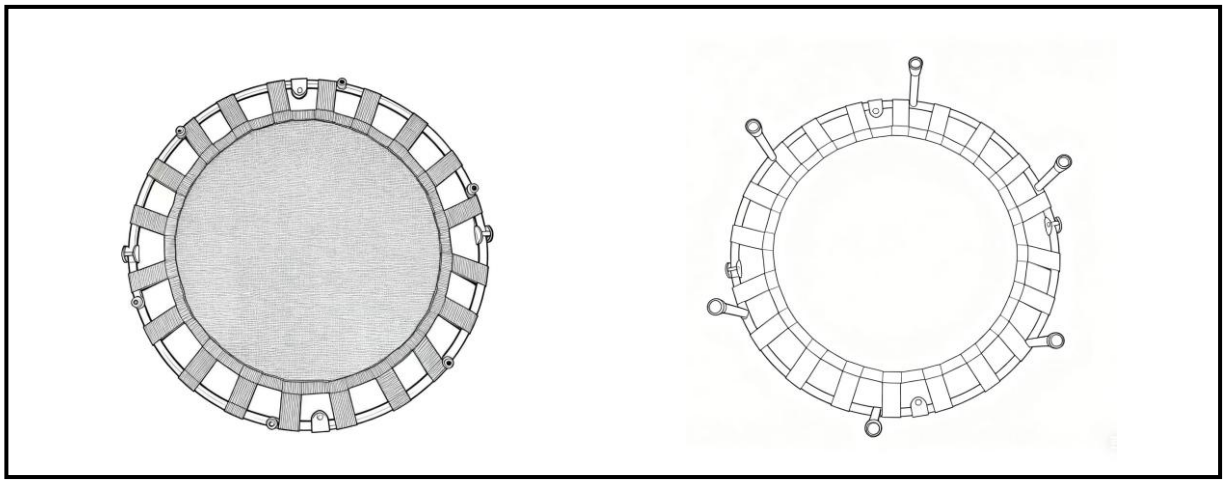

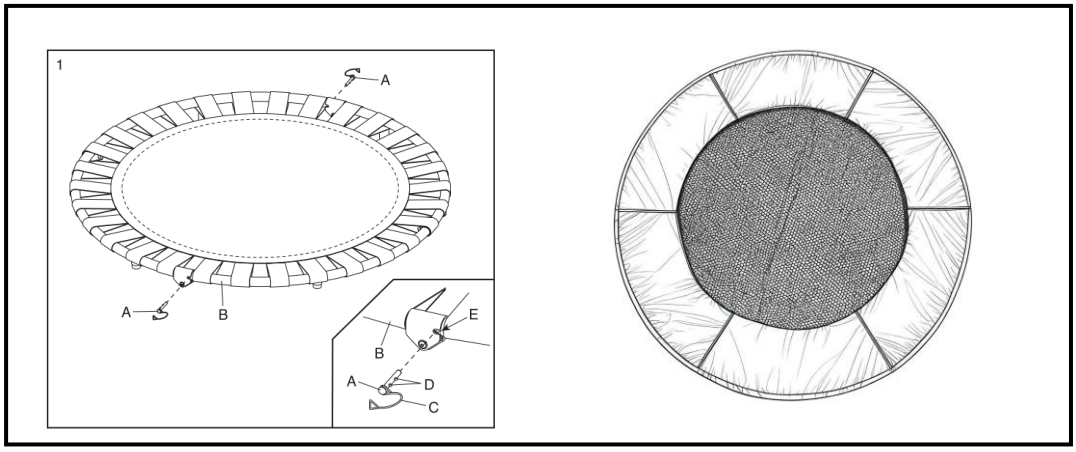

Image 1 **Image2**

2. Two people stand on the opposite sides of the trampoline, with one foot to pressure on one side, and the other side press down the trampoline bed with your hands at the same time to make the trampoline is fully opened (as picture show)

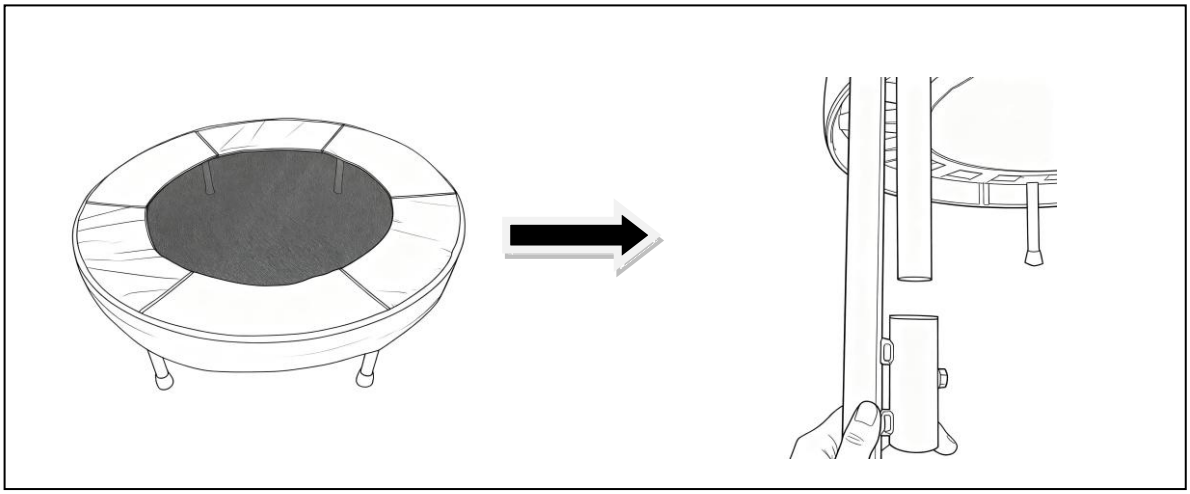

3. Take out the 6 threaded tubes in the foot tube box,Installed on eight threaded heads and tightened tightly.
4. Insert the safety pin into the hole of the side hinge (as shown in the picture), and then put the trampoline cover on it.

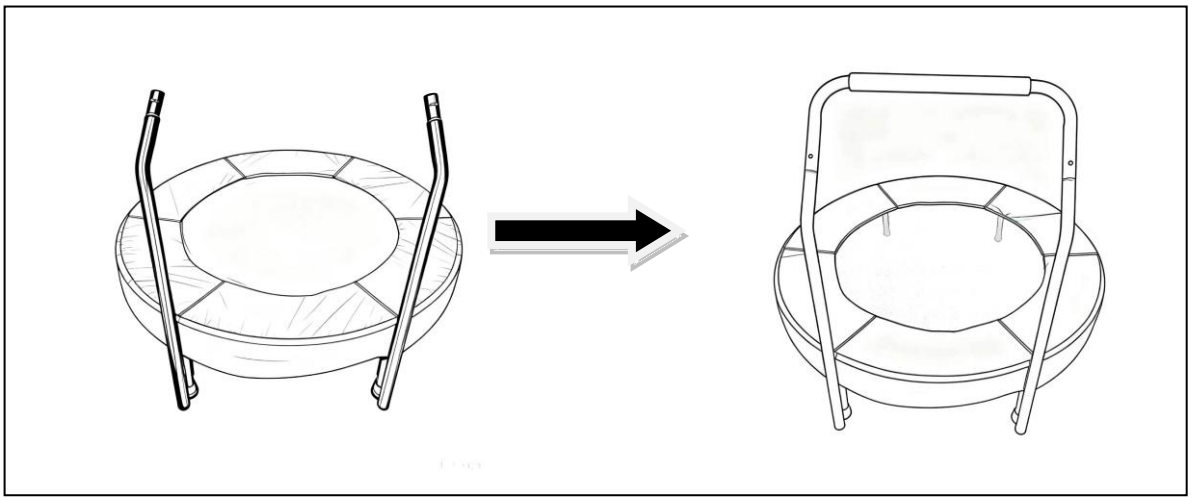

Warning: Because the trampoline has a relatively strong opening and closing force, please do not put your face on the bed during installation. At the same time, please do not put your fingers on the hinges to avoid pinching your fingers when spreading and merging the bed.

Handrail installation instructions:

1. Remove the foot covers of two adjacent foot tubes, and then put the armrest post tubes into the foot tubes respectively, and put them back into the foot tubes,as the picture shows:

2.Install the handle crossbar as shown,

3. Tighten the bottom leg screw.
