Assembly Instruction

3/5

Remove the decorative bolt before mounting the ladder rail. Please: Do not fully tighten ladder rail bolts until library wall is assembled, leveled, and ladder rails between units are attached.

Use a screwdriver to loosen the screw of each Tab before flipping up the Tabs.

Levelers

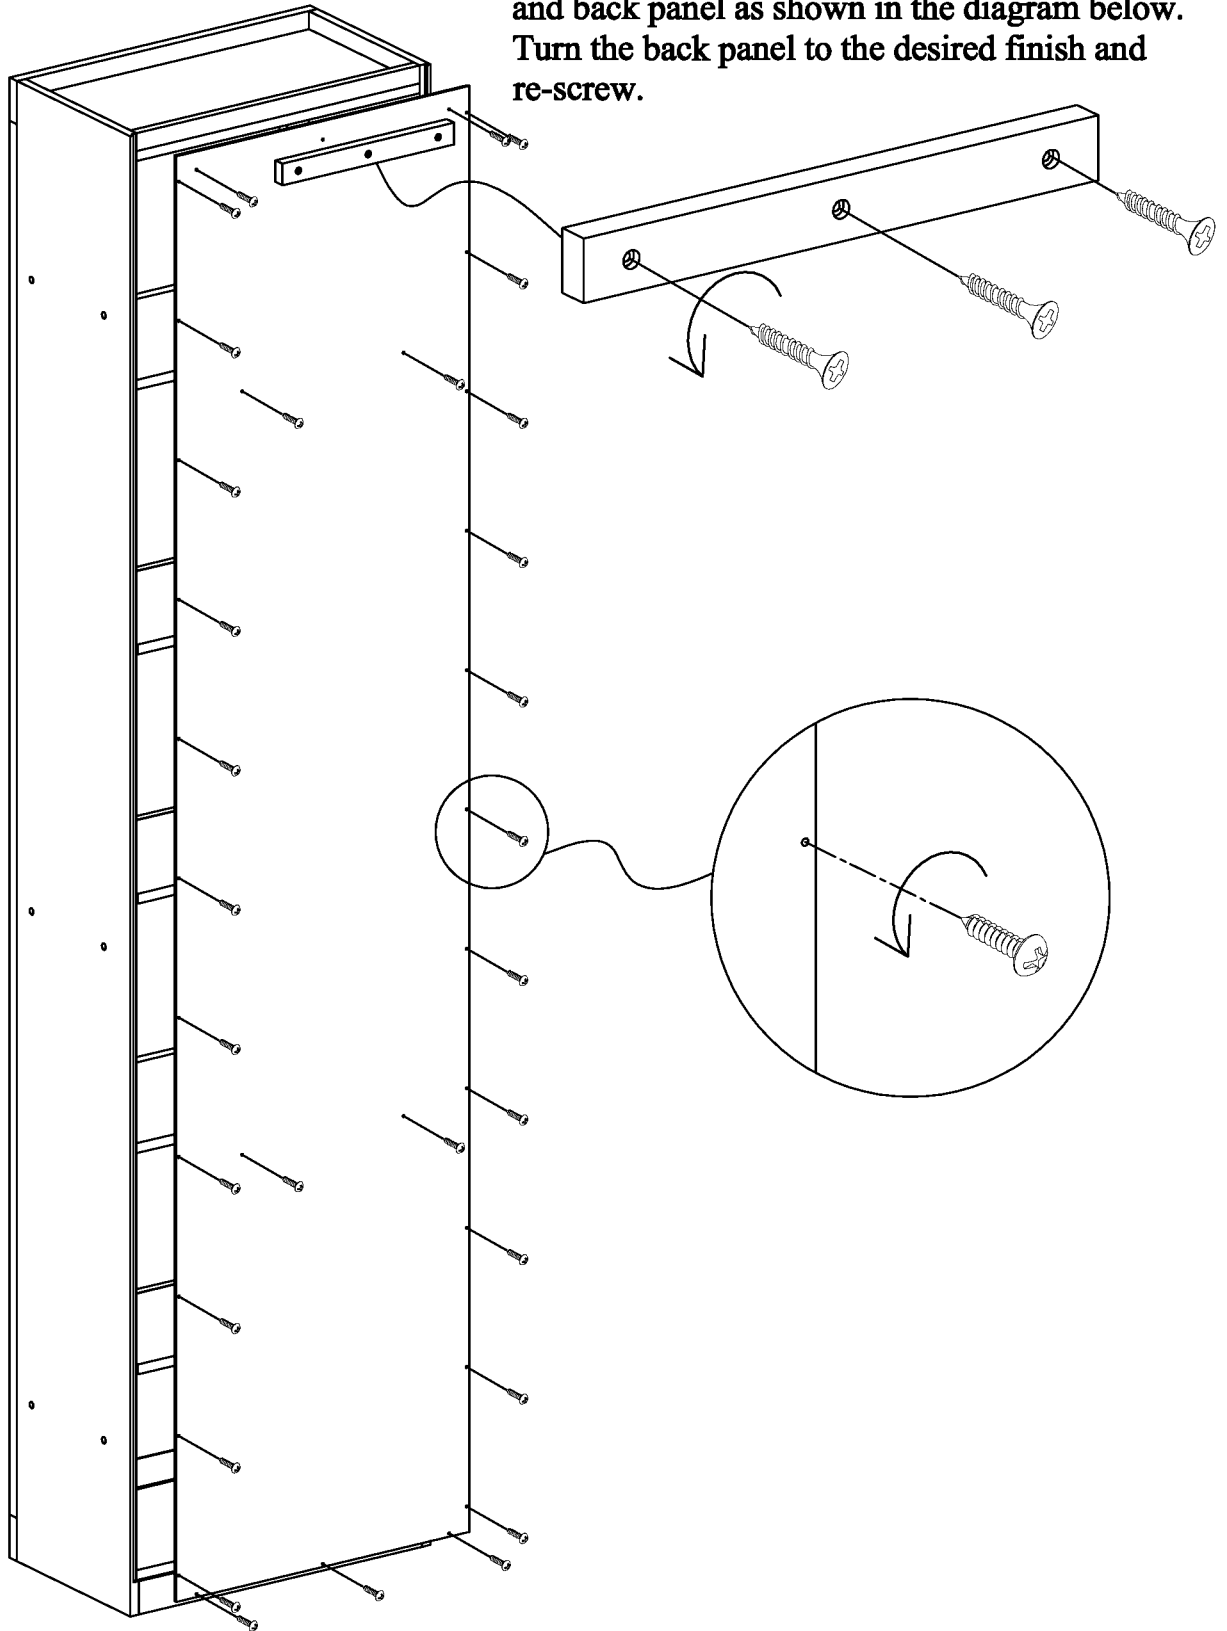

Inside the bottom panel on the forward RSF side is a cap with the leveler below. To adjust the leveler remove the cap and turn the leveler to adjust the height of the bookcase with Allen Wrench(P).

The front door panel is reversible. To change the the door panel, flip up each tab and push door panel out. Turn the panel around and place back inside the door and flip the tabs down to hold it in place.

Assembly Instruction

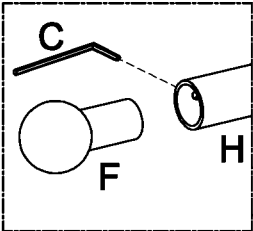

4/5

To reverse the back panel, unscrew the cleat and back panel as shown in the diagram below. Turn the back panel to the desired finish and re-screw.

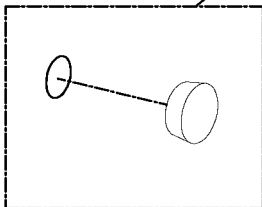

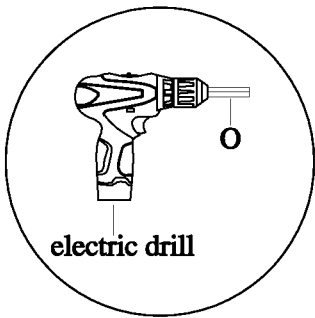

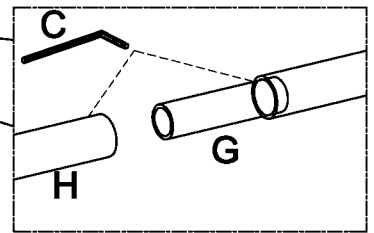

Assembly Instruction

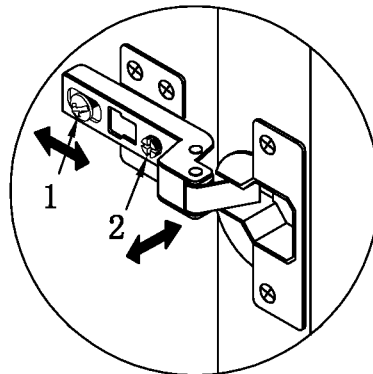

If setting up an end piece, use Allen Wrench(C) to loosen retaining screw found on each rail end, secure Ladder Rail Finial (F) to ladder rail end to complete finished look.

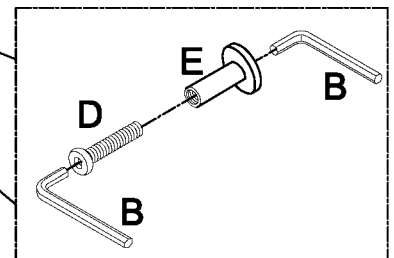

To connect ladder rails, loosen retaining screw found on each rail end, insert ladder rail coupler (G) about 1" on one side, and tighten. Align cabinets and push together, aligning ladder rails in the process. Tighten opposite retaining screw to secure ladder rail coupler.

Remove the wood plugs before connecting the cabinets together.

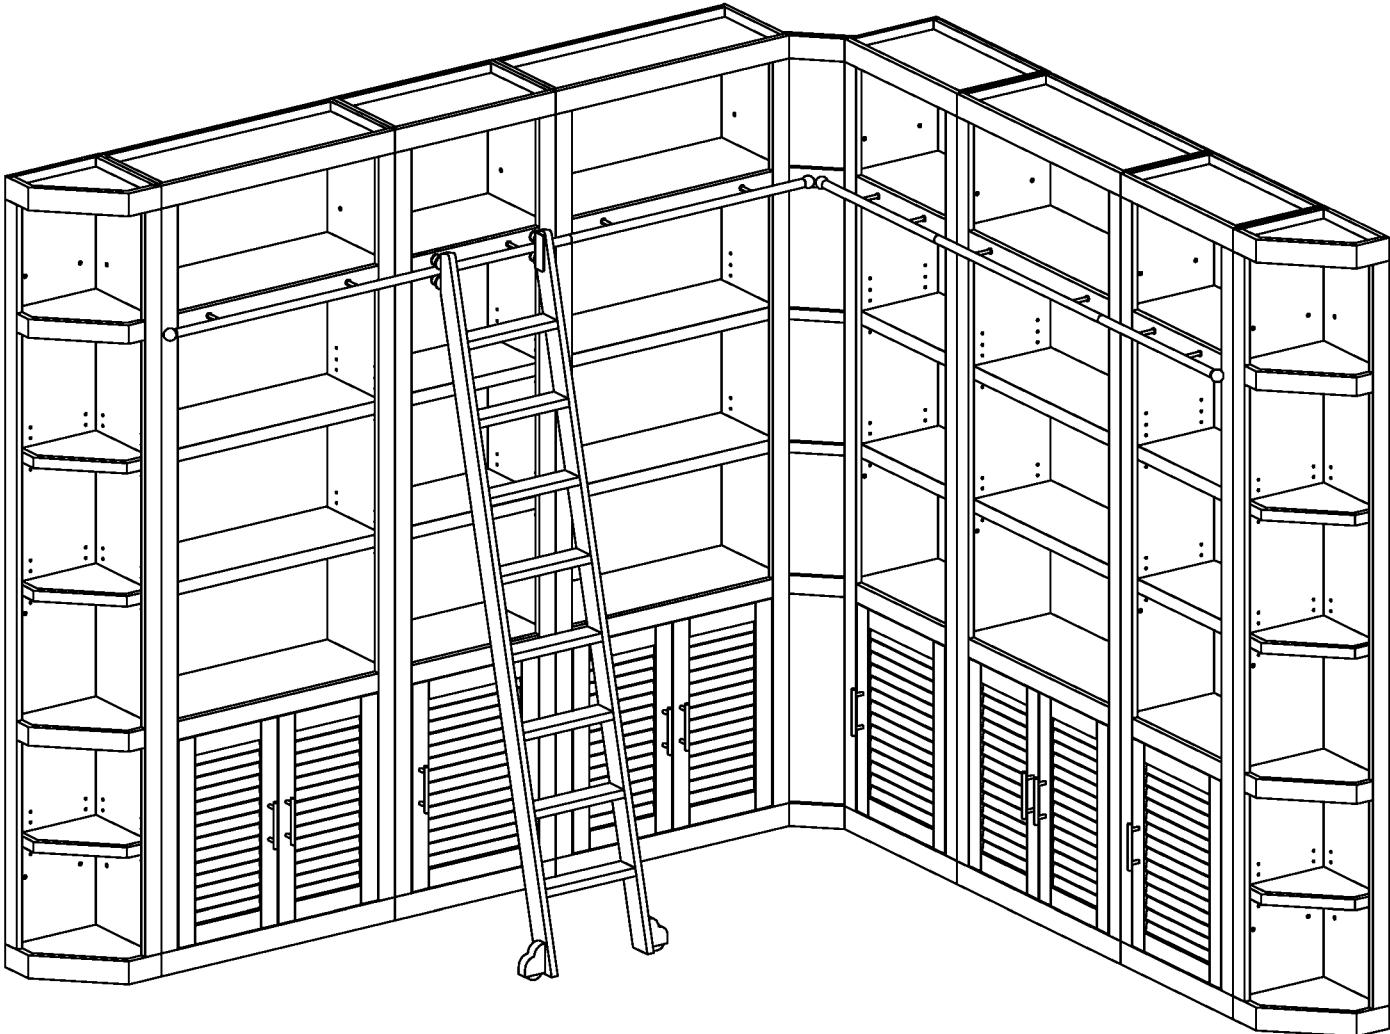

The library self closing hinges can be adjusted with the above diagram screws

Align and connect cabinets with Connector Bolt (D) and Connector Cap (E).
