

CURREY & COMPANY

Daman Brass Disc

1200-0515

Overall: 12"h x 11"w x 3.75"d

Finish: Aged Brass/White

Materials: CAST ALUMINUM/MARBLE

Item Weight: 8 lb

The Daman Brass Disc has a heavily pitted surface that is rougher than a rough-case treatment, which brings the gold sculpture an intense texture. Adding to this effect is the aged brass finish that collects in the larger crevices to create added patina. A design detail of note is how the rectangular marble base is beveled. The

Dany Brass Disc is a similar design in a larger size.
